SUPPLEMENTAL LABEL

Maestro® 2EC Herbicide

Nufarm

EPA Reg. No. 71368-29
March 24, 2009

LABEL REVISIONS: Additional use directions added for Conservation Reserve Program (CRP) and Grass Grown for Seed and Sod Production.

READ AND FOLLOW THE ENTIRE LABEL BOOKLET FOR THIS PRODUCT BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

"Label" as used in this supplemental labeling refers to the master label booklet for this product and this supplemental.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN ANY MANNER INCONSISTENT WITH ITS LABELING. This label must be in the possession of the user at the time of application.
Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS IN THE PRODUCT MASTER LABEL BOOKLET MUST BE FOLLOWED, INCLUDING STATEMENTS PERTAINING TO THE WORKER PROTECTION STANDARDS, ON THE EPA REGISTERED MASTER LABEL.

### Restrictions and Precautions

**CRP Areas:**
- Do not allow livestock to graze in treated areas or feed treated grasses and forage, hay, straw, silage, or seed to livestock for 12 months following treatment.
- Do not add spray adjuvants or fluid fertilizers when applying this product to CRP areas planted with alfalfa or other legumes.
- Do not apply this product to CRP areas planted with alfalfa if temperatures are expected to exceed 80°F or severe crop injury may occur. If legumes other than alfalfa have been planted, severe crop injury may occur at any application temperature.
- Do not apply more than 1-1/2 pints/A of this product to CRP areas that are underseeded with alfalfa.

</tr>
</thead>
<tbody>
<tr>
<td>Maestro 2EC</td>
<td>1 to 2 pints</td>
<td>0.375 to 0.75 fluid ounces</td>
<td>Apply to established and newly seeded grasses for seed or sod production before the boot stage. Established grasses tolerant to this product include bentgrasses, Kentucky Bluegrass, Fescues, Ryegrass, Bermuda-grass, St. Augustinegrass and Zoysia grass. This product may also be used on seedling grasses such as Merion, Park, Delta, or common Kentucky Bluegrasses, Pennlawn, Chewings, Ilahas or Alta Fescues, Orchardgrass, Highland, Seaside or Astoria Bentgrasses, perennial Ryegrasses, Beha-grass and Zoysia grass. Refer to the GENERAL WEED LIST for a listing of susceptible broadleaf weeds. Optimal control will be attained when weeds are treated in the seedling stage (less than 4 leaf stage, 2 inches in height, or 1 inch in diameter).</td>
</tr>
<tr>
<td>Chemigation</td>
<td>2 pints only</td>
<td>0.75 fluid ounces</td>
<td>Apply to established and newly seeded grasses grown for seed or sod production before the boot stage. Apply through automated sprayer irrigation systems with mechanical transfer loading system only. See MIXING, LOADING AND HANDLING INSTRUCTIONS section for complete details. Refer to the list of established grasses that are tolerant to this product.</td>
</tr>
</tbody>
</table>

### Restrictions and Precautions

**Grasses Grown for Seed and Sod Production:**
- Do not allow livestock to graze in treated areas or feed treated grasses, forage, hay, straw, silage, or seed to livestock for 12 months following treatment.
- Do not apply this product to grasses grown for seed or sod production with backpack or hand-held application equipment.
- Do not apply more than 2 pints per acre of this product in a single growing season.
- Do not plant rotational crops within 30 days following application of this product.
NOTICE
Read the "WARRANTY DISCLAIMER" and "LIMITATION OF LIABILITY" in the master label booklet for this product before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.
