Instructions:
• Determine the total lawn area to be sprayed. For rectangular areas, multiply the length by the width to obtain total square feet.

• CONNECT: Attach garden hose to spray nozzle. Turn the spray nozzle lever to the “OFF” position.

• SPRAY: Turn on water at faucet. Extend hose to the farthest area of lawn to be treated. To begin spraying, turn the spray nozzle lever to the “SPRAY” position. The herbicide mixes automatically with the water. Walk at a steady pace while spraying evenly and working towards the faucet.

• FINISH: To stop spraying, turn spray nozzle lever to the “OFF” position. Turn off water at faucet. To relieve pressure, turn spray nozzle to the “ON” position and point sprayer away from any desirable plants before disconnecting the sprayer nozzle from the garden hose.
