ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Precautions and Restrictions:
• Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until sprays have dried.

PROHIBITIONS
• Apply when daytime temperatures are between 50° and 90°F (do not apply above 85°F for bermudagrass). Do not treat when air temperatures exceed 90°F as damage to turfgrass may occur.

• Do not apply this product to food crops (gardens, fruits and vegetables), forage crops, or ornamental plants including flowers, trees, shrubs, hedges, woody ornamentals, groundcovers established in landscape plantings and other nontarget plants.

• Do not spray exposed roots of ornamentals and trees.

SHAKE WELL BEFORE USING
PRODUCT FACTS

What It Does: Kills major broadleaf and troublesome grass weeds including dandelion, chickweed, clover as well as crabgrass and foxtail. (See inside for complete list)

Where to Use: Lawns: Kills the weeds not the lawn when used as directed.

When to Use: Apply when daytime temperatures are between 50° and 90°F, (do not apply above 85°F for bermudagrass).

HOW IT WORKS

Fertilome Weed Out With Q Ready To Use contains three proven weed killers that target lawn weeds and crabgrass. The herbicides enter the lawn weeds through their leaves and move inside the weeds, even down into the roots. And lawns listed on this label will not be harmed when used as directed.

WHERE TO USE

Fertilome Weed Out With Q Ready To Use is intended for the treatment of individual weeds, patches of weeds or sparse weeds scattered throughout home lawns. Fertilome Weed Out With Q Ready To Use can be applied to the following established turfgrass species:

WHEN TO USE

Apply this product when weeds are small and actively growing.

CRABGRASS (large and smooth):

- **Spring**: Apply this product from crabgrass emergence until the crabgrass is 3-4 inches in height. This period begins the first time that you can see crabgrass in your lawn. Re-treat at 14 days later for dense populations.

FOXTAIL (GREEN GIANT AND YELLOW):

- **Spring and early summer**: Apply this product to foxtail during the early growth stages or when foxtail is 1-4 inches in height. Re-treat at 14 days later for dense populations.

BROADLEAF WEEDS:

- **Spring**: Apply when dandelion, plantain, buttercup, speedwell, knotweed and other broadleaf weeds are young and actively growing with adequate soil moisture for best results.
- **Fall**: Apply when henbit, chickweed, white clover, ground ivy,
lawn burweed and other broadleaf weeds are young and actively growing with adequate soil moisture for best results.

**TRIGGER SPRAYERS:**
1. Shake well.
2. Adjust the nozzle to coarse spray pattern to minimize wind drift. Spray the weeds only. Spray to lightly cover broadleaf and grass weeds. Excessive spraying can injure some lawns. Do not apply when daytime temperatures are above 90°F as lawn injury can occur (do not apply above 85°F for bermudagrass).

**CULTURAL TIPS:**

*For newly seeded areas:*
- Do not apply within 4 weeks after seedling emergence of Kentucky bluegrass, fine fescue mixtures and perennial ryegrass. Apply this product to newly seeded grasses when well-established (approximately 6 weeks after seedling emergence) or after the third mowing.

*For newly sodded, sprigged, or plugged areas:*
- The application of this product to newly sodded, sprigged, or plugged grasses should be delayed until 3 to 4 weeks after the sodding, sprigging, or plugging operations.

*Seeding:*
- Turf species listed on this label can be seeded into the treated areas at four (4) weeks after the application of this product.

*Irrigation:*
- Do not apply this product immediately before rainfall or irrigation. For best results, do not irrigate or water the turfgrass within 24 hours after application.
- Avoid applications of this product when turfgrasses are under stress since injury may result.

*Mowing:*
- Delay mowing 2 days before and until 2 days after the application of this product.
- Do not spray exposed roots of ornamentals and trees.
