SUPER EXTENDED algae guard™
use against green, black, and mustard algae
• single treatment lasts 3 months
• compatible with pools using salt chlorine generators.

COMPATIBLE WITH POOLS USING SALINITY SYSTEMS

GENERAL DIRECTIONS:

1. Maintain pool water in the pH range 7.2 to 7.6. Adjust pH to 7.2 to 7.6 when using with salt chlorine. No pH adjustment is required for pools using chlorine or bromine.

2. Ensure that filtration system is working properly and that water is being circulated continuously.

3. A regular brushing program will assist in the removal of factors that can contribute to algae growth.

4. While this product controls algae it is important that adequate levels of sanitizer (chlorine) be maintained.

5. Add this product directly to the pool, distributing over as wide an area as possible. Avoid concentrating the application in only one spot.

6. While this product controls algae it is important that adequate levels of sanitizer (chlorine) be maintained to control bacterial growth.

7. While this product controls algae it is important that adequate levels of sanitizer (chlorine) be maintained to control bacterial growth.

SAFETY INSTRUCTIONS:

1. Read entire label and use strictly in accordance with these directions.

2. Use as directed on the label.

4. Consult your pool service or chemical supplier if you are unsure of treatment advice.

5. Shock the pool at least once a week.

6. Shocking frequencies will vary depending on the condition of the pool and the desires of the pool owner.

7. Shocking is required for control of algae after treatment with this product.

8. The effectiveness of this product may be reduced if the pH level is adjusted to more than 7.6 during or after treatment.

9. Do not allow children to swim for 24 hours after treatment with this product.

10. Do not allow children to swim for 24 hours after treatment with this product.

11. Do not allow children to swim for 24 hours after treatment with this product.

12. Do not allow children to swim for 24 hours after treatment with this product.

13. Do not allow children to swim for 24 hours after treatment with this product.

14. Do not allow children to swim for 24 hours after treatment with this product.

15. Do not allow children to swim for 24 hours after treatment with this product.

16. Do not allow children to swim for 24 hours after treatment with this product.

17. Do not allow children to swim for 24 hours after treatment with this product.

18. Do not allow children to swim for 24 hours after treatment with this product.

19. Do not allow children to swim for 24 hours after treatment with this product.

20. Do not allow children to swim for 24 hours after treatment with this product.

21. Do not allow children to swim for 24 hours after treatment with this product.

22. Do not allow children to swim for 24 hours after treatment with this product.

23. Do not allow children to swim for 24 hours after treatment with this product.

24. Do not allow children to swim for 24 hours after treatment with this product.

25. Do not allow children to swim for 24 hours after treatment with this product.

26. Do not allow children to swim for 24 hours after treatment with this product.

27. Do not allow children to swim for 24 hours after treatment with this product.

28. Do not allow children to swim for 24 hours after treatment with this product.

29. Do not allow children to swim for 24 hours after treatment with this product.

30. Do not allow children to swim for 24 hours after treatment with this product.

IF IN EYES:

1. Hold eyelids open and rinse slowly with water for 15 minutes.

2. Remove contact lenses if present after 5 minutes.

3. Call a poison control center or doctor for treatment advice.

4. Have the product container or label with you when calling a poison control center or doctor for treatment advice.

5. IF INHALED:

6. Take off contaminated clothing. Place in a covered, dry, well-ventilated area. Keep away from heat or open flame.

7. Call a poison control center or doctor for treatment advice.

8. IF SWALLOWED:

9. Do not induce vomiting.

10. Call a poison control center or doctor for further treatment advice.

11. HAVE THE PRODUCT CONTAINER OR LABEL WITH YOU WHEN CALLING A POISON CONTROL CENTER OR DOCTOR FOR FURTHER TREATMENT

12. IF ON SKIN OR CLOTHING:

13. Take off contaminated clothing. Place in a covered, dry, well-ventilated area. Keep away from heat or open flame. Call a poison control center or doctor for treatment advice.
