† When used as directed
**WHEN TO USE:**

Apply this product when weeds are small and actively growing.

**CAUTIONS & EYEWASH**

- **Spring -** Apply this product from mid-February until the end of March, provided there are no hard frosts and the temperature remains above 60°F for at least 21 days before the product is applied.
- **Fall -** Apply this product before the first killing frost. If the temperature remains above 60°F for at least 21 days before the product is applied, weeds can be expected to germinate and should respond to this product.

- **Winter -** Apply this product in the late fall after the first killing frost has occurred and the ground is not frozen. This product will not control winter annuals that are currently in the soil. Winter annuals will germinate in the spring and be controlled by this product when applied in the spring or early summer.

**HOW TO USE:**

**TRIGGER SPRAYER:**

1. Use a trigger sprayer when spraying small, active weeds.

2. Adjust the nozzle to coarse spray pattern to minimize wind drift. Spray the weeds to lightly cover broadleaf and grass weeds. Excessive spraying can injure some lawns. Do not apply when daytime temperatures are above 90°F as lawn injury can occur (do not apply above 85°F for bermudagrass).

- Do not apply with other products that contain surfactants or oils.
- Spraying may temporarily reduce the effectiveness of this product. Reapply at the recommended rate for best results.

- Do not apply this product in the late fall after the first killing frost has occurred and the ground is not frozen. This product will not control winter annuals that are currently in the soil. Winter annuals will germinate in the spring and be controlled by this product when applied in the spring or early summer.

**STORAGE & DISPOSAL**

- Do not dispose of this product in any manner other than by shipping to a licensed waste generator for disposal.

- Keep from freezing. Store in original container in a locked storage area inaccessible to children and pets.

- Do not apply more than the recommended rate of this product, as it may result.

- Do not apply this product to the soil of a vegetable garden or to the lawn if it is going to be used for food crops or ornamentals.

- For best results, do not apply this product in the late fall after the first killing frost has occurred and the ground is not frozen. This product will not control winter annuals that are currently in the soil. Winter annuals will germinate in the spring and be controlled by this product when applied in the spring or early summer.

- Do not apply more than the recommended rate of this product as it may result.

- Do not apply this product to the soil of a vegetable garden or to the lawn if it is going to be used for food crops or ornamentals.

- For best results, do not apply this product in the late fall after the first killing frost has occurred and the ground is not frozen. This product will not control winter annuals that are currently in the soil. Winter annuals will germinate in the spring and be controlled by this product when applied in the spring or early summer.

**LIMITED WARRANTY AND DISCLAIMER**

FOR LEGAL PURPOSES, THIS PRODUCT IS COVERED BY THE LIMITED WARRANTY AND DISCLAIMER ON THE BACK COVER. FOR ADDITIONAL INFORMATION, CONTACT THE MANUFACTURER OR YOUR LOCAL DISTRIBUTOR.
**ACTIVE INGREDIENTS:**
- 3,6-dichloro-o-anisic acid equivalent, 0.024%

**TOTAL WEIGHT:**
- 100.000%

**GARDEN USE:**

17924 - Trimec Crabgrass Plus LWK RTU (755) 32 oz (2.5 x 4) ETL (6-2017).qxp  6/14/17

**BROAD LEAF WEEDS:**
- broadleaf signalgrass
- kikuyugrass

**APPLICATION:**
- around a cistern or well may result in contamination of drinking water or ground water.
- that target lawn weeds and crabgrass. The herbicides enter the lawn weeds through their leaves and move inside the weeds, even down into the roots.
- crabgrass (large and smooth)

**ENVIRONMENTAL HAZARDS:**
- hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off streams, ditches, gutters or surface waters. Applying this chemical in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.
- in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground water contamination. To protect the environment, do not allow pesticide to enter or run off streams, ditches, gutters or surface waters. Applying this chemical in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.

**PRODUCT FACTS:**
- This product has properties and characteristics associated with chemicals detected through their leaves and move inside the weeds, even down into the roots.
- And lawns not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.
- Gibraltar
- Mixture is for spot treatment only.
- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of treated areas during application.
- Do not apply this product when rain is not predicted for the next 24 hours. When rain is not predicted for the next 24 hours, this product will not blow drift and runoff into these areas.
- This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off streams, ditches, gutters or surface waters. Applying this chemical in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.

**DIRECTIONS FOR USE:**
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Weeds: Kills the weeds not the lawn when used as directed.
- Watershed: Keep out of reach of children.

- Grass weeds containing fine fescues (red, hard and chewings) and bentgrass and other ornamental plants.
- Weeds: Keep out of reach of children.

**PRODUCT SAFETY:**
- This product has properties and characteristics associated with chemicals detected through their leaves and move inside the weeds, even down into the roots.
- And lawns not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.
- This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off streams, ditches, gutters or surface waters. Applying this chemical in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.

- Watershed: Keep out of reach of children.

**IN CASE OF ACCIDENT:**
- If in eyes: Hold eye open and rinse slowly and gently with water for 15 - five minutes, then continue rinsing eye.
- If on skin: Wash off with soap and water.
- If on clothing: Remove clothing if possible. Wash clothing before reuse.
- If swallowed: Do not induce vomiting. Call a poison control center or doctor for treatment advice.
- If inhaled: Move to fresh air. If not breathing, give artificial respiration. Call a poison control center or doctor for treatment advice.

**PRODUCT DISPOSITION:**
- This product must be disposed of properly to prevent harm to the environment.

**WARNING:**
- This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off streams, ditches, gutters or surface waters. Applying this chemical in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow drift and runoff into these areas.
WHEN TO USE:
Apply this product when weeds are small and actively growing.

CRAIG-RASS (large and small):
Apply this product from Craig-rass emergence until the Craig-rass is 3 to 4 inches in height. Apply this product at the first crabgrass you can see in your lawn. Repeat at 7 to 10 days interval for dense populations.

PORTABLE SPRAYER AND TANKS:
• Spring and early summer. Apply to foliage to slow the early growth of weeds before they begin to flower. For best results, apply this product when daytemperatures are below 90°F.
• Fall. Apply when weeds, crabgrass, white clover, ground ivy, barn burned, and other broadleaf weeds are young and actively growing with adequate soil moisture for best results.

HOW TO USE:
TIGGER SPRAYERS:
1. Shake well.
2. Adjust the nozzle to coarse spray pattern to minimize wind drift.
3. Apply to foliage to slow the early growth of weeds before they begin to flower. For best results, apply this product when daytemperatures are below 90°F.

STORAGE AND DISPOSAL
PESTICIDE STORAGE:
Keep from freezing. Store in original container in a locked area.

REPLENISHMENT DISPOSAL AND CONTAINER HANDLING:
Nonrefillable container. Do not refill. For disposal, see the applicator instructions. This product is nonrefillable and should be disposed of in the trash or offered for recycling if available.

LIMITED WARRANTY AND DISCLAIMER
The limited warranty and disclaimer limits our liability for any warranty or implied warranty, including any warranty of merchantability or fitness for a particular purpose, which are hereby disclaimed. To the extent consistent with applicable law, this warranty and disclaimer shall be the exclusive remedy of the purchaser and the exclusive remedy of the purchaser and the exclusive remedy of the purchaser.
