BRITEWOOD DFG Fungicidal Agent
For industrial use only as a preservative for aqueous compositions including paints and staines and wood preservation.

ACTIVE INGREDIENT:
3-keto-2-propenyl butyl carbonate.... 40%
Insert Ingredients (Others) .......................... 50%
Total ................................................................ 100%

FIRST AID:
IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, continuing rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
• Call a poison control center or doctor immediately for symptoms of unconsciousness.
• Have affected person sip a glass of water if able to swallow.
• Do not induce vomiting unless told by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

HOT LINE NUMBER
IN CASE OF AN EMERGENCY: endangering life or property involving this product call
(800) 424-8300 CHEMTEC. Have the product container or label with you when calling a Poison Control Center or doctor.

NOTES TO PHYSICIAN: Probable mucosal damage may contribute the use of gastric lavage. Exposure to high concentrations via inhalation may result in the activation of acetylcholinesterase and produce related symptoms.

PAINTS AND STAINS:
BRITEWOOD DFG Fungicidal Agent, used in solvent and waterborne paints and stains, will inhibit the growth of mildew. Addition should be at the end of the manufacturing process and allow to mix long enough to be adequately dispersed and should not be added to hot paint. Typical levels for protection against mildew on painted surfaces are 0.12% by weight on wet paint. For example, house paint with a wet density of 10 lbs per gallon would use 2.5-12.0 lbs of this product per 100 gallons of wet paint. Where the climate is severe and mildew growth is a major problem for painted surfaces, more would be required, usually around 2.0% by weight in the paint. For exterior paint, approximately half the exterior concentrations should be used; 0.1-0.6% by weight in the paint. Appropriate levels are best determined by field trials.

WOOD PRESERVATION:
BRITEWOOD DFG Fungicidal Agent is a liquid designed for use as an additive to interior or exterior protective coatings to inhibit the growth of mildew on the film surface. It is also recommended as a wood preservative for use in above ground applications. All recommendations of use levels are in percentage by weight and refer to this product. Dosage ranges are given for the various applications to indicate the approximate levels for a particular application. Exact levels of use should be determined by field trials. BRITEWOOD DFG Fungicidal Agent may be applied from solvent solutions or aqueous dispersions to new lumber, plywood, particle board, millwork, etc. to prevent the growth of mildew, sapstain and wood rot on these substrates. This product is recommended for use on wood in above ground use only.

Treating solutions may be prepared by diluting this product in alcohols or aromatic solvents or by dispersion in water. Levels of 0.25-3% of this product are suggested depending upon the severity of conditions for end use, and the extent of time that protection is required.

For freshly sawn lumber, a concentration of 0.5% of this product is suggested as a starting level. A one minute dip at ambient temperatures in a solution or aqueous dispersion containing 0.5% of this product should be adequate to control the development of mildew and sapstain organisms on the lumber. Because of the great variation in susceptibility of fresh sawn lumber relating to the type of wood, sawing and storage conditions, concentration and humidity, method of treatment, equipment, and species of wood, it is necessary to carry out field tests to determine the most appropriate means of application and the optimum concentration of this product to be used within the range specified.

For treated woods and substrates, twenty-four hours after treatment.

The lumber should be completely immersed in the treating bath, and the treating vat designed to permit easy Immersion and removal, and to minimize spillage. The vat may be dried by draining and rinsing with a suitable solvent or by use of an inert gas solution. To add additional product while treating, first prepare the proper solution or emulsion in a separate container (of wood, plastic, or stainless steel construction) and add to the treating vessel.

After treatment, lumber should be stocked in a properly maintained seasoning yard with good drainage so that no water will accumulate, in any area. The yard should be kept free from weeds and vegetation, which may hold moisture and promote growth of decay and stain producing fungi. All debris and lumber scraps should be removed from the area. A properly laid out yard should take advantage of prevailing winds to permit good air circulation. Main alleys should be at least 16 feet wide. Stack foundations should be sufficiently elevated to permit ready access of air to the pile, and allow water to drain off easily.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This formulation is not cleared by the Federal Food, Drug and Cosmetic Act for use in manufactured food grade adhesive, paper and paper board products and paper coating.

KEEP OUT OF REACH OF CHILDREN DANGER-PELIGRO
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS CORROSIVE Substances may burn and lower visibility.
Do not get in eyes, on skin, or on clothing. Harmful if swallowed, inhaled or adsorbed through skin. Avoid breathing vapor or spray mist. Wear goggles or face shield, protective clothing, chemical resistant (such as nitrile or butyl) gloves. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit. Discharge to the environment without the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE & DISPOSAL
Do not contaminate water, food, or feed by storage and disposal. Open dumping is prohibited.

Pesticide Storage: Store original container in a cool place. Protect from excessive heat.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, pesticide spray, or rinsate is a violation of Federal law. If these wastes are to be destroyed, according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Do not reuse empty container. Triple rinse (or equivalent) and offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate, or, if allowed by state and local authorities, by burning. If burned stay out of smoke and keep a distance of twenty-four hours after the fire.

Returnable Refillable Container: If this product is packaged in a returnable refillable container, then, after use, reuse or return container. Return container intact to point of purchase. This container must only be refilled with this product. Do not reuse the container for any other purpose.

Before refilling, inspect thoroughly for damage such as cracks, punctures, abrasions, and damaged or worn threads on close clises. Check for leaks after refilling and before transport.
