**TURF APPLICATION DIRECTIONS**

Begin applications when conditions favor disease development or when the disease first appears unless otherwise noted.

Do not exceed the maximum labeled rate for any tank-mix partner. Interface Fungicide should be applied at the prescribed rate and not exceed the registered rate per application or for any tank-mix partner. When applications are repeated at shorter than recommended intervals, it is the responsibility of the user and applicator to ensure that the tank-mix partner is registered in the state where the application is made. Do not exceed a total of 30 fl oz Interface Fungicide per 1,000 sq ft per year with a maximum of 6 applications.

**INTERACTIONS**

**ADDITIONAL DISEASE CONTROL**

If turf is threatened by additional diseases, Interface Fungicide is compatible with most commonly used fungicides such as ProStar®, Chipco Triton®, and Pythium Blight. If a tank-mix is used, follow label directions for the use of that product and apply at the rates labeled for control of the target diseases.

**ADDITIONAL DISEASE CONTROL**

**TANK MIXES**

If a tank-mix is used, follow label directions for the use of each product. When tank-mixing with other products, it is the responsibility of the user and applicator to ensure that the tank-mix partner is registered in the state where the application is made. Do not exceed a total of 90 fl oz of tank mixture per 1,000 sq ft per year with a maximum of 4 applications.

**Important: Read Before Use**

Read and follow all directions for use. Conditions, climatic, and climatological variations vary. Follow label directions for the use of this product. If you are not acceptable, read the entire Directions for Use, Conditions, Disclaimers of Warranty and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Conditions, Disclaimers of Warranty and Limitations of Liability:

**Iprodione:** (3,3-dichlorobenzyl)-N-(1-thienyl)methyl-1,4-dioxa-5,6-diazole (idoxuridine)

**Iprodione** and **Manganese**

**Additional Information on Compatibility (Collective)**

To prevent injury to yourself or others, read and follow all directions and precautions on the product label. Do not exceed a total of 30 fl oz Interface Fungicide per 1,000 sq ft per year with a maximum of 4 applications.

**A Fungicide for the enhancement of greener and more dense turfgrass and for the protection against winter stress and for the prevention and control of certain diseases of turfgrass.**

ENGINEERING CONTROLS

PERSONAL PROTECTIVE EQUIPMENT
For high-pressure hand wand and backpack sprayer application, mixers, loaders and applicators must wear:

- Chemical-resistant gloves,
- Chemical-resistant apron when cleaning equipment,
- Chemical-resistant footware, and
- If there is a risk of ingestion, a protective mask with a respirator.

For other handling activities and in case of a spill or other emergency exposure, handlers must wear:

- Chemical-resistant gloves,
- Chemical-resistant apron when cleaning equipment,
- Chemical-resistant footware,
- For high-pressure hand wand and backpack sprayer, aprons, boots, and aprons and gloves must be worn.

Application of this product must be made by a thoroughly trained and qualified operator who is knowledgeable of the hazards of spraying and the required protective equipment.

NON-AGRICULTURAL USE REQUIREMENTS

In general, begin with clean spray equipment and add one-half of the required amount of water to the spray or mixing tank and start agitation. Add the pesticide and react. If using a high-pressure hand wand or backpack sprayer, use the manufacturer’s directions for mixing and agitation. Never mix or load under pressure. Do not apply via drift. Do not apply this product in a manner to cause drift or spraying to contact persons, other crops or plants. Never apply by chemigation. Spray equipment must be thoroughly cleaned after each use. Before applying any pesticide, the operator shall read and understand the instruction label and the section of the Worker Protection Standard that pertains to the content of this box. The operator shall evaluate the conditions under which the product is to be applied before beginning the operation. The operator shall make any adjustments necessary to be able to use the product safely.

PESTICIDE STORAGE

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL

Do not apply by chemigation.

DIRECTIONS FOR USE

IF SWALLOWED:

- Call a poison control center or doctor immediately for treatment advice.
- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.

Note to Physician:

- Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting.
- Wash the skin carefully with soap and water. Take the person to the hospital if symptoms persist.

Do not spill or pour pesticide on water. Do not allow pesticides to contact water. Do not contaminate water, food, or feed by storage or disposal. Do not apply by chemigation. Read the label before using this product.

PESTICIDE DISPOSAL

Do not apply this product in a manner to cause drift or spraying to contact persons, other crops or plants. Never apply by chemigation. Spray equipment must be thoroughly cleaned after each use. Before applying any pesticide, the operator shall read and understand the instruction label and the section of the Worker Protection Standard that pertains to the content of this box. The operator shall evaluate the conditions under which the product is to be applied before beginning the operation. The operator shall make any adjustments necessary to be able to use the product safely.

PESTICIDE STORAGE

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL

Do not apply by chemigation. Do not apply this product in a manner to cause drift or spraying to contact persons, other crops or plants. Never apply by chemigation. Spray equipment must be thoroughly cleaned after each use. Before applying any pesticide, the operator shall read and understand the instruction label and the section of the Worker Protection Standard that pertains to the content of this box. The operator shall evaluate the conditions under which the product is to be applied before beginning the operation. The operator shall make any adjustments necessary to be able to use the product safely.

**NOT REGISTERED FOR USE IN CALIFORNIA TO CONTROL THIS DISEASE.**

**Under severe conditions, use the higher rate and/or shorter interval of applications for all diseases. When disease pressure is light to moderate, use the lower rate and/or longer interval of applications as necessary.**

**APPLICATION DIRECTIONS**

**Begin applications when conditions favor disease development or when the disease first appears unless otherwise noted.**

**Do not exceed the maximum labeled rate for any single treatment.**

**INTERFERENCE**

Do not exceed the maximum labeled rate for any single treatment.

**SUMMARY OF DISEASE CONTROL**

**TURF FUNGICIDE**

**GROUP 2 11 FUNGICIDE**
Agricultural use of Interface Fungicide is intended for growers and applicators who intend to use Interface Fungicide in the following situations: turf grown in non-agricultural environments, such as golf courses, parks, sod farms, athletic fields, industrial landscapes, and large landscapes in commercial or institutional settings. Interface Fungicide is labeled for use in turf grown in non-agricultural environments, including commercial golf courses, sports fields, parks, athletic fields, and industrial landscapes. It is specifically labeled for use on turfgrass species, including zoysia, bermudagrass, bentgrass, and creeping bentgrass.

General Precautions and Restrictions

Use of Interface Fungicide is subject to the following precautions and restrictions:

**General Precautions and Restrictions**

- **Non-Residential Use Requirements**
  - Use Interface Fungicide in non-residential areas, such as commercial golf courses, sports fields, parks, athletic fields, and industrial landscapes.
  - Follow the label instructions for application rates and timing of applications to ensure effective disease control.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.

**Storage and Disposal**

- **Disposal of Container and Wastes**
  - Do not contaminate water, food, or feed by storage or disposal.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.

**Engineering Controls**

- **Engineering Controls**
  - When handling erosolized sprays, use personal protective equipment (PPE) that is rated for the specific label use.
  - Wear eye protection and gloves that are rated for the specific label use.

**User Safety Recommendations**

- **User Safety Recommendations**
  - Personal protective equipment (PPE) must be used when handling Interface Fungicide.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.

**Restriction on Use**

- **Restriction on Use**
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.

**Turf Specific Use Directions**

- **Turf Specific Use Directions**
  - Use Interface Fungicide according to the label instructions for treating turfgrass species, including zoysia, bermudagrass, bentgrass, and creeping bentgrass.
  - Follow the label instructions for application rates and timing of applications to ensure effective disease control.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.

**Environmental Hazards**

- **Environmental Hazards**
  - Do not contaminate water, food, or feed by storage or disposal.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.
  - Do not apply Interface Fungicide to soil or other non-turfgrass areas.
PRESATURE STATEMENTS

Hazardous to Humans and Domestic Animals

CAUTION

ENVIRONMENTAL HAZARDS

*When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS), it may be necessary to provide engineering controls.

*Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber

*Chemical-resistant aprons when cleaning equipment...

*Chemical-resistant gloves, gen and hot water. Keep and wash PPE separately from other laundry.

*IF SWALLOWED:

*Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency

*Note to Physician:

• Do not induce vomiting unless told to by a poison control center or doctor.

• Call a poison control center or doctor for treatment advice.

FIRST AID

If in Eyes:

• Hold open eyes and rinse slowly and gently with water for 15-20 minutes.

• Cover eyes with wet cloth until medical attention is available.

• Do not rub eyes.

• Call a poison control center or doctor for treatment advice.

IF INHALED:

• Get person into fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

• If person is unconscious, move to a recumbent position.

• Do not give anything by mouth to an unconscious person.

• Call a poison control center or doctor for treatment advice.

If on Skin:

• Wash skin with soap and water. If irritation continues, notify a physician.

• Change clothing immediately.

• Use readily available first aid materials, such as water or alcohol, to treat the affected area.

• Do not try to remove clothing that is stuck to the skin.

• Do not rub or scratch the affected area.

• Do not contaminate water sources with contaminated clothing.

• Store in a cool, dry place.

• Store in a place inaccessible to children.

• Keep and wash PPE separately from other laundry.

• Non-AGRICULTURAL USE REQUIREMENTS

• Use of rates below the minimum labeled rate will lessen the effectiveness of this product.

• In order to assure maximum crop tolerance and disease control, follow directions on this label and all the precautions and limitations of the package label.

GENERAL PRECAUTIONS AND RESTRICTIONS

Use of this product on turf is restricted to golf courses and other similar areas.

For golf courses only, do not apply to fairway or greens less than 1 inch in height where foliage is water present.

Do not apply this product where the treated area is traced toward aquatic areas.

APPLICATION INFORMATION

Applies product through static mixer vessels and spray towers through and through coverage generally provides the best disease control. Do not make applications where conditions favor leafy or stem spray application. Avoid spraying when windy, high temperatures, dry, humid weather.

SPRAY MIXING AND COMPATIBILITY

In general, when applying water-soluble products, PPE recommended to protect the handler with water-soluble products to protect 8/10/12 8:48 AM  Page 2
ENGINEERING CONTROLS
Causes moderate eye irritation. Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.
Mixers, loaders, applicators and other handlers must wear:
Long-sleeved shirt and long pants,
In addition, mixers and loaders must wear a chemical-resistant apron. See engineering controls for additional requirements.

For high-pressure hand wand and backpack sprayer application, mixers, loaders and applicators must wear:
Chemical-resistant gloves,

Users should:
• Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
• Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency

Note to Physician:
If ingested, induce emesis or lavage stomach. Treat symptomatically.

PRECAUTIONARY STATEMENTS
FIRST AID

In case of contact, wash immediately with soap and water for at least 15 minutes. For eyes, flush with large amounts of water for at least 15 minutes. DO NOT TRY TO PUNCTURE EYES WITH A NEEDLE OR PEN OR INSERT ANYTHING INTO EYES.

Inhalation of vapors is not significant if in closed or well-ventilated areas. If it has occurred, leave the area and get fresh air. If not relieved, get medical aid immediately. DO NOT GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.

For high-pressure hand wand and backpack sprayer application, mixers, loaders and applicators must wear:
Chemical-resistant gloves,

ON-SITE STORAGE

SANITATION

Do not apply this product to any plant species or other places directly in contact with water. Do not apply to growing marketable crops, forests, nurseries or greenhouses.

**APPLICATION DIRECTIONS**

*Not registered for use in California to control this disease.

Do not exceed the maximum labeled rate for any single treatment.

INTERFERENCE

Do not mix with or use with any other tank mixture. Do not allow any tank mixture container to be mixed or used in the same area treated with Interface these products. Do not exceed the labeled rate or quantities for any of these products.

**ADDITIONAL DISEASE CONTROL**

If not formulated as an adjuvant, Interface can be mixed with other commonly used fungicides such as Propiconazole, Decis® and Transition®. Such mixtures may provide improved efficacy of the tank mixture over the individual components.

**TURF APPLICATION DIRECTIONS**

Begin applications when conditions favor disease development or when the disease first appears unless otherwise noted.

INTERFACE™ FUNGICIDE

A Fungicide for the enhancement of greener and more dense turfgrass and for the protection against winter stress and for the prevention and control of certain diseases of turfgrass

ACTIVE INGREDIENT:
Iprodione: 3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide) .................................. 23.10%*
Trifloxystrobin (CAS No. 141517-21-7)........................................ 1.44%*
OTHER INGREDIENTS: ........................................................ 75.46%
Total...................................................................................... 100.00%
*Equivalent to 2.14 pounds Iprodione and 0.13 pounds Trifloxystrobin per gallon.

EPA Reg. No. 432-1505

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE
Store in a cool, dry place.

PESTICIDE DISPOSAL
Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency or Hazardous Waste representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL
Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then puncture and dispose of in a sanitary landfill or by other procedures approved by State and local authorities.

GROUP 2 11 FUNGICIDE

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Causes moderate eye irritation. Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

INTERFACE can contaminate surface water through ground spray applications. Under some conditions, it may also have a high potential for runoff into surface water after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlaying tile drainage systems that drain to surface water.

Ground Water Advisory:
Several trifloxystrobin degraders have properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground water contamination.

KEEP OUT OF REACH OF CHILDREN
CAUTION
For MEDICAL and TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE Information Call 1-800-331-2867

FIRST AID

IF IN EYES:
- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency for additional information call toll free 1-800-334-7577.
