SUPPLEMENTAL LABELING
DUPONT™ CORAGEN® INSECT CONTROL
WITH ACTIVE INGREDIENT RYNAXYPYR®
FOR USE ON GRASS (FORAGE, FODDER, HAY), FOLIAGE OF LEGUME VEGETABLES, AND NON-GRASS ANIMAL FEEDS

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION
CORAGEN® is a suspension concentrate that can be applied as a foliar spray to control listed insects. CORAGEN® is mixed with water for application.

RESISTANCE MANAGEMENT
For resistance management, CORAGEN® is a Group 28 Insecticide. Repeated and exclusive use of CORAGEN® (chlorantraniliprole) or other Group 28 insecticide belonging to the anilinic diamide class of chemistry may lead to the buildup of resistant strains of insects in some crops.

Some insects are known to develop resistance to products used repeatedly for control. Because the development of resistance cannot be predicted, this product may be used as part of a resistance management strategy established for the use area. These strategies may include incorporation of cultural and biological control practices, alternation of mode-of-action classes of insecticides on succeeding generations and the most susceptible life stage. Consult your local or state agricultural authorities for details.

Unless directed otherwise in the specific crop/pest sections of this label, the best practices are to follow these instructions to delay the development of insecticide resistance: Avoid using the same mode of action (same insecticide group) on consecutive generations of insect pests. Make no more than 2 applications of DuPont™ CORAGEN® (chlorantraniliprole) or other Group 28 products per generation to the same insect species on a crop. Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide). Make no more than 2 successive applications within a 30 day period to the same insect species on a crop.

The following application to the target pest(s) must be with an effective product with a different mode of action. See Federal Section 3 label accompanying product for full resistance management instructions.

APPLICATION
Apply at the specified rates when insect populations reach locally determined economic thresholds. Consult the cooperative extension service, professional consultants or other qualified authorities to determine appropriate threshold levels for treatment in your area.

Apply follow-up treatments of CORAGEN®, as specified in the tables on page 2 of this label, to keep pest populations within threshold limits. Refer to the Resistance Management section of this label for further guidance on follow-up treatments. See individual crop sections of this label for specific minimum spray intervals.

Use sufficient water to obtain thorough, uniform coverage.

IMPORTANT
Before using CORAGEN®, read and follow all applicable directions; restrictions; and precautions on the EPA-registered label. This bulletin contains new or supplemental instructions for use of these products in combination which does not appear on the package label. Follow the instructions carefully. This labeling must be in the possession of the user at the time of pesticide application. Read the Limitation of Warranty and Liability on the Section 3 Federal product label. before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
