This product contains 2.29 lbs. of active ingredient per gallon. This concentrate has been formulated from food grade ingredients.

KEEP OUT OF REACH OF CHILDREN

WARNING AVISO

(Si no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle)

(If you do not understand the label, find someone to explain it to you in detail).

ENVIRONMENTAL HAZARDS

Do not apply directly to fish-bearing bodies of water, to areas where surface water may contaminate streams or lakes or to intertidal areas below the mean high water mark. Do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

Bird Shield Repellent Corporation
DIRECTIONS FOR USE

This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on this supplemental label and the main EPA-registered label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

APPLICATION INSTRUCTIONS

Crops: Grass grown for seed and clover (including clover grown for seed)

Application Rate: 1 to 4 gal/acre.(2.29 to 9.16 lbs ai/ac)

Application Timing and Efficacy: Reapply at 7 to 14 day intervals to maintain repellency. This product is more effective when applied in cool temperatures during early morning or late afternoon hours. Do not apply this product to wet surfaces.

Dilution Rate:
Ground Application It is suggested to use 20 –80 gallons water per acre
Aerial Application It is suggested to use 5 -15 gallons of water per acre.
