ANTIFOULING

Pacifica Plus

KEEP OUT OF REACH OF CHILDREN

DANGER
See Side Panel for Additional Precautionary Statement

NET CONTENTS:
ONE GALLON (3.785 LITERS)

YBB260 BLUE

ACTIVE INGREDIENTS:
1 H-PYRROLE-3-CARBONITRILE, 4-BROMO-2-(CHLOROPHENYL)-5-(TRIFLUOROMETHYL) ZINC 2-PYRIDINETHIOLE 1-OXIDE* 3.90% 4.12%

INERT INGREDIENTS 95.88% 155.00%

CONTAINS PETROLEUM DISTILLATES. *ZINC PYRITHIONE

EPA EST NO.: 2693-NJ-1
EPA REG NO.: 2693-220
PACIFICA PLUS

PRODUCT DESCRIPTION: Pacifica Plus is a developed for use on aluminum or alloyed vessels but can be used on fiberglass, wood and tile surfaces. Pacifica Plus is a non-ionic surfactant which has been designed to be used on the waterline of boats and vessels to help prevent algae growth and reduce the build-up of marine growth. This product can be used on both inboard and outboard vessels. It is also effective in preventing the growth of marine life on the hulls of ships and boats.

GENERAL APPLICATION PROCEDURE:

For applications to residential/commercial areas:
Do not apply by air. Spay. Do not apply more than one coat of Pacifica Plus to the hull of the vessel within 24 hours.

MINIMUM DRY AND LAUNCHING TIMES: Minimum drying time before use is 2 hours. Before launching, wait for at least 6 hours after the last application. Additional time may be required for dry conditions.

PREPARATION:

BARE ALUMINUM - On small craft where sandblasting is not practical, i.e. aluminum platforms on car class boats, use bare hulls, etc. Use bare hulls to Special Thinner 216 to remove oil and grease. (In most cases, use a high polish finish with medium grit sandpaper to reduce the surface roughness. Saturate the surface with Special Thinner 216. Apply until the surface is thoroughly saturated. Allow to dry for at least 24 hours. Apply the recommended amount of exterior paint.)

ALUMINUM - PREVIOUSLY PAINTED WITH A BRUSHING PAINT. Remove any surface contaminations, such as dried-on wax, etc. Use bare hulls to Special Thinner 216 to remove any surface contaminations. Allow the surface to dry for at least 24 hours. Apply the recommended amount of exterior paint.

PREVENTING SURFACES:

In Cold Condition: Rinse with fresh water and allow to dry. Accord with 80-grit sandpaper. Remove any surface contaminations by using a 150-grit sandpaper. Apply Special Thinner 216 to the hull area. Apply the recommended amount of exterior paint and cure for 24 hours. (Preparation all surfaces is covered on the appropriate paint manufacturer's guide.)

BARE FIBERGLASS - NO SAND PAPER. Clean immediate surface thoroughly with Fiberglass Solvent 202. Change the water throughout the cleaning process. Buff the surface dry with a clean, dry cloth. The surface must be free of any surface contaminations. Apply the recommended amount of exterior paint and allow to dry. (Preparation all surfaces is covered on the appropriate paint manufacturer's guide.)

PREVENTING SURFACES:

In Cold Condition: Rinse with fresh water and allow to dry. Accord with 80-grit sandpaper. Remove any surface contaminations by using a 150-grit sandpaper. Apply Special Thinner 216 to the hull area. Apply the recommended amount of exterior paint and cure for 24 hours. (Preparation all surfaces is covered on the appropriate paint manufacturer's guide.)

CONTAINER DISPOSAL: The product is flammable. Dispose of the product according to the local regulations. (Preparation all surfaces is covered on the appropriate paint manufacturer's guide.)

Precautionary Statements
Hazards to Humans and Domestic Animals
Keep Out of Reach of Children

Danger. Corrosive to the eyes. Causes skin burns. May be fatal if inhaled. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear a face shield. Avoid breathing vapor, mist, dust, or fumes from cleaning solutions. While spray-painting or sanding hull surface, use a supplied - air or powered air-purifying respirator (PAPR) approved by MSHA for use with paints and coatings.

Use of a Tyvek hooded coverall or an equivalent, overalls beneath the Tyvek hooded coveralls, impervious gloves, and impervious footwear that protects the lower legs. Remove contaminated clothing and discard after each use, do not reuse. Wash thoroughly with soap and water after handling and before smoking.

First Aid:

If In Eyes:

Hold open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing.

Call a Poison Control Center or doctor for treatment advice.

If Swallowed:

Immediately call a poison control center or doctor.

Do not induce vomiting unless told to do so by a poison control center or doctor.

Do not give any liquid to the person.

Do not give anything by mouth to an unconscious person.

If ON Skin or Clothing:

Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes.

Call a poison control center or doctor for treatment advice.

If INHALED:

Move the person to fresh air.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth resuscitation. Do not give anything by mouth unless told to do so by a poison control center or doctor.

If contacted with water or by water, do not discharge effluent into the water treatment system, do not discharge effluent into the environment.

Other: Have the product container or label with you when calling a poison control center or doctor or for treatment.

NOTICE: All personnel must wash thoroughly with soap and water after handling and before smoking.
