ENVIRONMENTAL HAZARDS
This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL AND USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil or water is coveralls, chemical-resistant gloves, such as barrier laminate, nitrile rubber, neoprene rubber or viton, shoes plus socks.

FOR USE ON EASTER LILY BULBS

Chemical removal of flower buds in field grown Easter Lilies: For best results, apply when Easter Lily buds are 1/8 to 1/2 inches long. Use full cone flood jet nozzles (TG-5 or similar) placed one per plant row (2 per row on double row planted lilies). Direct the spray into the lilies bud “cup” area. Use 20-30 p.s.i. nozzle pressure. Higher pressure may result in reduction of control. Nozzle height should be 10” to 14” above the plant tops. Mechanical agitation should be provided. There is no benefit in spraying foliage.

One application of 2/3rds gallon (85 ounces) in a spray volume of 300 gallons of water per acre may be made.

Use Precautions:
Some yellowing may occur and stem elongation may be retarded.

Use Restrictions:
Do not apply this product through any type of irrigation system.
Do not apply more than 2/3rds gallon (85 ounces) of SHIELD EMULSIFIABLE CONCENTRATE (2.0 lb. Chlorpropham) per year.
Do not make more than one application of SHIELD EMULSIFIABLE CONCENTRATE per year.
