PRECAUTIONARY STATEMENTS
Hazardous to Humans and Domestic Animals

ENVIRONMENTAL HAZARDS
This product is not to be used near aquatic organisms. The product will damage or kill aquatic organisms. May be harmful if not treated. Avoid breeding during or after application. Treat breeding fish with a product that has a less harmful effect and do not return to the same water body for at least 7 days. Avoid application during or after heavy rainfall or during or after temperatures above 90°F. Do not apply to ponds or streams.

PHYSICAL OR CHEMICAL HAZARDS

STORAGE AND HANDLING:
Store in cool, dry, well-ventilated area away from flames or heat. Do not use or store near food or food containers. Do not use or store near fishing or swimming areas. Do not store with incompatible materials. Keep out of reach of children.

Agricultural Uses:
Flo-Klor® Sanitizer is a liquid formulation designed for use on vegetables, fruits, produce, and all food contact surfaces. Before and after applying this product to crops, it is highly recommended to wash the produce thoroughly. Flo-Klor® Sanitizer is not recommended for use on foods intended for immediate consumption. Use only as directed. Do not use on edible parts of produce. Use this product only in accordance with all local, state and federal regulations. Follow precautions and use instructions on the label. Do not apply more than 16 oz. of this product per 100 gallons of water for Sanitizing Non-Porous Food Contact Surfaces. Do not apply more than 4 oz. of this product per 100 gallons of water for Sanitizing Porous Food Contact Surfaces. For other uses, refer to the manufacturer’s instructions on the label.

Sanitization of Non-Porous Food Contact Surfaces:
Flo-Klor® Sanitizer is effective against a broad spectrum of viruses, on non-porous surfaces. It is recommended to use a 2% solution of Flo-Klor® Sanitizer. For use on non-porous food contact surfaces, mix 2 oz. of Flo-Klor® Sanitizer with 100 gallons of water. It is recommended to apply the product at a 1 to 10 dilution. This solution is effective for up to 24 hours, and is safe for use around food and food service areas. Apply by spraying, wiping or mopping. It is recommended to use a disinfecting agent that has a residual effect to prevent recontamination. After use, wash and dry all surfaces.

Sanitization of Porous Food Contact Surfaces:
Flo-Klor® Sanitizer is effective against a broad spectrum of viruses, on porous surfaces. It is recommended to use a 2% solution of Flo-Klor® Sanitizer. For use on porous food contact surfaces, mix 2 oz. of Flo-Klor® Sanitizer with 100 gallons of water. It is recommended to apply the product at a 1 to 10 dilution. This solution is effective for up to 24 hours, and is safe for use around food and food service areas. Apply by spraying, wiping or mopping. It is recommended to use a disinfecting agent that has a residual effect to prevent recontamination. After use, wash and dry all surfaces.

Cooling Towers and Evaporative Condenser Water:
Flo-Klor® Sanitizer is effective against a broad spectrum of viruses, in cooling tower and evaporative condenser water. It is recommended to use a 2% solution of Flo-Klor® Sanitizer. For use in cooling tower and evaporative condenser water, mix 2 oz. of Flo-Klor® Sanitizer with 100 gallons of water. It is recommended to apply the product at a 1 to 10 dilution. This solution is effective for up to 24 hours, and is safe for use in cooling tower and evaporative condenser water. Apply by spraying, wiping or mopping. It is recommended to use a disinfecting agent that has a residual effect to prevent recontamination. After use, wash and dry all surfaces.

Commercial Laundry Sanitizers:
Flo-Klor® Sanitizer is effective against a broad spectrum of viruses, in commercial laundry sanitizers. It is recommended to use a 2% solution of Flo-Klor® Sanitizer. For use in commercial laundry sanitizers, mix 2 oz. of Flo-Klor® Sanitizer with 100 gallons of water. It is recommended to apply the product at a 1 to 10 dilution. This solution is effective for up to 24 hours, and is safe for use in commercial laundry sanitizers. Apply by spraying, wiping or mopping. It is recommended to use a disinfecting agent that has a residual effect to prevent recontamination. After use, wash and dry all surfaces.
