FIBERGLASS BOTTOMKOTE® NT

PRODUCT DESCRIPTION: Fiberglass Bottomkote NT uses a dual resin technology that provides a universal, fast drying antifouling paint that delivers the benefits of both hard and soft antifouling pigments for use on all power and sailboats. The universal formulas of Fiberglass Bottomkote NT has durability of a traditional hard paint but has a slow poling mechanism built-in that continuously smoothes and removes the active surface avoiding the heavy build-up of paint layers much like a polishing paint. The fast dry formula allows the boat to be painted and launched in the same day. Fiberglass Bottomkote NT provides clean, stable colors for effective season-long protection. Fiberglass Bottomkote NT is recommended for use on the underwater areas of fiberglass, wood, and properly primed metal (except aluminum) boat hulls. It can be used in fresh, salt and brackish waters.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

COMPATIBILITY: Fiberglass Bottomkote NT can be applied over most other antifouling paints provided the old coating is lightly sanded, is in sound condition and has been thoroughly sanded with 80 grit wet-or-dry sandpaper. Fiberglass Bottomkote NT can be applied by brush, roller or spray.

Y.O.C.: Less than 465 grams/liter
CLP: 2 parts
THEORETICAL COVERAGE: 400 sq. ft./gallon

THINNER: Interlux Special Thinner 216 or Interlux Brush Ease 433.

CLEAN-UP: Special Thinner 216 or Brush Ease 433.

*NOTE: At temperatures below 50°F (10°C) during the dry time extend the dry times by 12 hours minimum.

PREPARATION

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION:
Remove all traces of old paint and contamination by sanding the entire surface with 80 grit wet-or-dry sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

PREVIOUSLY PAINTED SURFACES - POOR CONDITIONS:
Completely remove all old antifouling paint, using Interlux Interrip 229E for fiberglass, and wood, and by sandblasting or grinding to near white metal for steel. Follow application systems below.

BARE FIBERGLASS:
It is very important that bare fiberglass be properly prepared to prevent delamination of the antifouling paint. Remove mold release wax and surface contamination by using one of the following Interlux products: Fibercoat Surface Prep WM886 or Fiberglass Solvent Wash 202. Follow the product instructions. Fill any surface imperfections with Interlux WaterFiller WM185 following the label instructions. After the surface has been properly cleaned, proceed with one of the applications systems below.

APPLICATION SYSTEMS

BARE FIBERGLASS - NO SAND SYSTEM:
Clean the surface following the preparation procedure above. Apply one coat of Interlux InterPrime® 2200 or Interlux Fibercoat 2200 Primer following the label instructions for applying the primer and varnish coating with antifouling paint. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM:
Clean the surface following the preparation procedure above for bare fiberglass. Sand the entire surface with 80 grit sandpaper until a flat, matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solvent Wash 202. Sand and wipe clean. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - BLISTER PREVENTION SYSTEM:
Apply the InterPrime system for the prevention of blistering. Contact the Interlux Technical Service Department at 1-800-468-7980 or visiting yachtpaint.com for complete instruction on the application of the InterPrime system.

BARE WOOD:
Sand the entire surface with 80 grit sandpaper. Wipe the sanding residue off the surface with Special Thinner 216. Apply the first coat of Fiberglass Bottomkote NT thinned 10% with Special Thinner 216 or Brush Ease 433. Fill seams with Interlux Seam Compound 30 (if necessary). Apply two more coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

UNDERWATER METALS:
Contact the Interlux Technical Service Department at 1-800-468-7980 for full information on how to properly prime underwater metals or steel hulls. More systems and information available on www.yachtpaint.com. DO NOT USE ON ALUMINUM.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Cautious eye irritant. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. While spraying paint or sanding or sandblasting boat surfaces, wear a respirator approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the patient.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:
- Take off exposed clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If in eyes:
- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Other:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate - vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal or entries to enter water. Disposal of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to disposal. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticides wastes are usually hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ½ full with water and recirc. Shake for 10 seconds. Four rinses into application equipment or a mix tank or store rinsates for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL-FREE: CHEMTREC 1-800-424-9300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-634-6943.
