Bottom seal is at 1/4" and 1/8" ink is Step 2 Weed Control Plus Lawn Fertilizer.
Now it's Easy for You to Have a Better Lawn

Start anytime
You can begin the Annual Program anytime of the year, just check the months and select the appropriate STEP product listed.

Simple and easy
No more spraying. Just apply the right product—once a STEP—at a time.

Guaranteed results
Each STEP product is designed to give specific results to help you create a greener lawn.

Florida Annual Fertilizer Applications
On St. Augustine Lawns do not exceed rates of 2 lbs of Nitrogen per 1,000 sq. ft. in the west and 3 lbs of Nitrogen per 1,000 sq. ft. in the central and eastern Lawns. In Bahia Lawns, do not exceed rate of 4 lbs of Nitrogen per 1,000 sq. ft. in the west, north Florida is north of Ocala. Central Florida is defined as south of Ocala to a line extending from Vero Beach to Tampa. South Florida includes the remaining southern portions of the state.

SPREADER SETTINGS
Spreading Tips: Apply header strips. Then apply product in longest direction of lawn. For best results, use a Scotts® spreader. Covers 5,000 sq. ft. This package applies 2.93 lbs of product per 1,000 sq. ft. Begin with Spreader Settings Directions.

For additional spreader settings, please call 1-800-543-TURF (8873)

Kills most common lawn weeds
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

On product apply 1.5 pounds of 2,4-D per acre per application.

APPLICATION
Apply on a calm day. Make sure that the grass is wet from rain or sprinkling before applying. This helps provide where to and when to produce best results. For sprayer, use the settings indicated by the chart above before applying.

WHAT TO AVOID
• Do not allow product to contact people or pets directly or through drifts. Keep people and pets out of lawn during application. Do not allow people or pets to enter treated area until winds have died.
• Do not apply more than twice a year. A minimum of 20 days between applications is required.
• Do not re-enter or allow pets be on treated area for at least 12 hours after application. (Grass must remain unwatered for 24 hours to be effective.)
• Do not apply if it is exceeding 90°F or above 60°F.
• Do not apply to grass.
• Do not allow granules to drift onto flowers, shrubs, fruit or vegetables.

ENVIRONMENTAL HAZARDS
• Do not apply to St. Augustine Lawns during the months of October, November, December, January, or February.
• Do not apply to any other turfgrass species during the months of April, May, or June.
• Do not apply to any other turfgrass species during the months of August, September, or October.
• Do not apply to any other turfgrass species during the months of July, June, or May.
• Do not apply to any other turfgrass species during the months of May, June, or July.
• Do not apply to any other turfgrass species during the months of April, May, or June.

STORAGE AND DISPOSAL
Store this product in a cool, dry, well-ventilated area away from food and feed. Use noxious materials in this way, and use with care.

For additional spreader settings, please call 1-800-543-TURF (8873)

Kills most common lawn weeds*

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application.

APPLICATION
Apply on a calm day. Make sure that the grass is wet from rain or sprinkling before applying. (This helps particles adhere to seed leaves to produce best results.) Set spreader to the setting indicated by the chart above before applying.

WHAT TO AVOID
- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. Do not allow people or pets to enter treated areas until dusts have settled.
- Do not apply more than twice per year. A minimum of 90 days between applications is required.
- Do not water or mow lawn for at least 24 hours after application. (Grass must remain on weed leaves for 24 hours to be effective.)
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60°F or above 90°F.
- Apply only to grass.
- Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.

For best performance:
- Grass should not touch the bottom of a drop spreader. Tall grass should be moved a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been grown four times.
- Do not seed, sod or plant grass under until at least one month after using this product.
- Do not apply on St. Augustinegrass, Fescue, kentucky bluegrass, Bahia grass, or centipede grass.

In full, DO NOT treat centipede grass after Oct. 1, nor bahiagrass after Nov. 1.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays and seacoasts. Do not apply when windy. Apply this product directly to your lawn or garden, and keep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.

Weed-fed lawns are more efficient at using available water.

Feeding with Scotts helps build a thick lawn with more roots to better absorb water and nutrients than an active lawn. This helps protect your lawn against heat, drought, and other stresses.
