Spartan® Hard Surface Disinfecting Wipes Fresh Scent is formulated to disinfect hard, non-porous, inanimate environmental surfaces such as metal surfaces, stainless steel surfaces, plastic surfaces, and bathrooms.

This product is intended for use in hospitals and healthcare settings, schools, athletic facilities, transportation terminals, grocery stores, shopping centers, daycare centers, institutional likeness and/or bathrooms, restaurant facilities, and veterinary clinics.

This product will clean and disinfect hard, non-porous, surfaces of: hospital beds, grocery cart handles, computers, countertops, desks, doorknobs, handrails, keyboards, railings, tables, telephones, bathroom basins, kitchen faucets, and gym equipment.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with this labeling.

This product is not to be used as a terminal sterilant/disinfector or on any surface or instrument that it is introduced directly into the human body, either into or on the skin, into the mucous membranes or other areas of the body, or on any contact with the bloodstream or normally sterile areas of the body.

CLEANING: Use one wipe to completely remove all loose dirt and dirt from surfaces to be treated.

DISINFECTING: To disinfect, nonporous surfaces, thoroughly wet the surface to be treated. Thoroughly wet the treated surface to remain visibly wet for 5 minutes. For heavily soiled surfaces, clean before disinfecting. Let air dry after disinfection.

This product is an effective disinfectant against: Staphylococcus aureus, Bacillus atrophaeus, Shigella dysenteriae, Staphylococcus epidermis, Pseudomonas aeruginosa, Enterococcus faecium, Staphylococcus aureus, Klebsiella pneumoniae, Pseudomonas aeruginosa, Enterococcus faecium and E. coli. For heavily soiled surfaces, clean excess dirt first.

Spartan® Hard Surface Disinfectant Wipes Fresh Scent is formulated to disinfect hard, non-porous surfaces against Influenza A 2/Japan, Herpes Simplex Virus 1, Human Immunodeficiency Virus Type 1 and Type 2, Norovirus, Rotavirus, Staphylococcus aureus, Klebsiella pneumoniae, and Listeria monocytogenes.

This product is not to be used as a terminal sterilant/disinfector or on any surface or instrument that it is introduced directly into the human body, either into or on the skin, into the mucous membranes or other areas of the body, or on any contact with the bloodstream or normally sterile areas of the body.

CONTACT TIME: Allow surface to remain visibly wet for 5 minutes.

KILLS HIV-1 ON PRE-CLEANED ENVIROMENTAL SURFACES:Objects previously soiled with BLOOD or BODY FLUIDS in patient care settings or other settings in which an expected build-up of soiling of non-porous surfaces/objects includes biological fluids or tissues, it is necessary for the antiseptic to kill or inhibit the biological fluids or tissues to be fully effective.

FRAGMENTS: For surfaces to be cleaned, use a non-sentinel wipe to clean and discard the surface.

FOR SURFACES TO BE DISINFECTED: Use one wipe to disinfect metal surfaces, plastic surfaces, and non-porous, inanimate environmental surfaces such as metal surfaces, stainless steel surfaces, plastic surfaces, and bathrooms.

This product is intended for use in hospitals and healthcare settings, schools, athletic facilities, transportation terminals, grocery stores, shopping centers, daycare centers, institutional likeness and/or bathrooms, restaurant facilities, and veterinary clinics.
