HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING! May be fatal if swallowed or inhaled. Do not breathe dust or vapor. Wear a mask or respirator jointly approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Wash thoroughly with soap and warm water after handling and before eating, drinking or using tobacco products. Remove contaminated clothing and wash before reuse.

ENVIROMENTAL HAZARDS
Pesticide wastes are acutely toxic. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of reach of children, preferably in a locked storage area.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA Regional office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or offer for reconditioning if appropriate. Do not use container in connection with food, feed, or drinking water. Completely empty container into the processing equipment. Then dispose of empty container in a sanitary landfill, by incineration or, if allowed by State and Local authorities, by burning. If burned, stay out of smoke. Handle and open container in a manner as to prevent spillage. If the container is leaking or material is spilled for any reason or cause, carefully sweep the material into a pile and dispose of as directed for pesticides as above. Refer to Precautionary Statements on label for hazards associated with the handling of this material. In spill or leak incidents, keep unauthorized people away.

First Aid
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF IN SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: No specific antidote is available. Treat the patient symptomatically.

Clearwood AT Insecticide
FOR CONTROL OF CERTAIN INSECTS INFECTING WOOD AND WOOD COMPOSITES
ACTIVE INGREDIENT:
Imidacloprid: 1[(6-Chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimine 99.80%
INERT INGREDIENTS: 0.20%
TOTAL: 100.0%

WARNING!
KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Wood and Wood-based Composite Products
Application Instructions: Clearwood AT Insecticide can be used for the preservation of wood and wood based composite products such as lumber, timber landscaping ties, fence posts, building and utility poles, piles, decking, wood shingles, waferboard, fiberboard, particleboard, plywood, and oriented-strand board when it is important to prevent the attack of insects, including termites, on the product. Composites are used in the following applications: National, including door and window frames, exterior siding, construction lumber, and exterior wood. Composite wood treated with Clearwood AT Insecticide does not change in appearance and may be painted when dry. Wood and wood composites treated with Clearwood AT Insecticide must be manufactured indoors through a number of methods including (a): Blending Clearwood AT Insecticide with an appropriate solvent, water repellent and injecting the solution into the wood through vacuum pressure in a closed vacuum chamber. (b): Metering Clearwood AT Insecticide onto the dried wood flakes, fibers, etc immediately before the blinder. The Clearwood AT Insecticide is then mixed with the flakes in the blinder. (c) Mixing Clearwood AT Insecticide with the adhesive or wax, which is subsequently applied to the flakes in the blinder. The method of incorporation of Clearwood AT Insecticide will depend on the specific manufacturing process and wood species. The suggested use level is 0.0003 to 0.005 lbs. Clearwood AT Insecticide per cubic foot of wood.

Manufactured for:
Viance, LLC.
Suite 350
200 East Woodlawn Road
