All Purpose Algaecide
Alguicida multiusos

FOR CONTROL OF ALGAE AND ALGAE SLIME GROWTH IN SWIMMING POOL
PARA EL CONTROL DEL CRECIMIENTO DE ALGAS Y LIMO DE ALGAS EN PISCINA

ACTIVE INGREDIENTS:
Allyl (50% Cg, 40% Cg, 10% Cg)
dimethyl benzyl ammonium chloride .................. 40.0%
OTHER INGREDIENTS ........................................ 59.9%
TOTAL: .................................................. 100.0%

Product weighs 8 lbs./gallon
Net Contents: 2 Gallons (226 fl. oz.) (7.8 l)
KEEP OUT OF REACH OF CHILDREN
MANTENGASE FUERA DEL ALCANCE DE LOS NIÑOS

DANGER
See side panel for additional Precautionary Statements

FIRST AID
Have the product container or label with you when calling a Poison Control Center or Doctor or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 minutes. Call a Poison Control Center or Doctor for treatment advice.

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present. After first 5 minutes, then continue rinsing eye. Call a Poison Control Center or Doctor for treatment advice.

IF SWALLOWED: Call a Poison Control Center or Doctor immediately for treatment advice. Have person rinse mouth and drink 1-2 glasses of water. Do not induce vomiting unless told to do so by a Poison Control Center or Doctor. Do not give anything by mouth to an unconscious person.

INHALATION: Move person to fresh air. If irritation persists, seek medical advice or an eye doctor. If acid or alkali, then give artificial respiration, preferable mouth-to-mouth, if possible. Call a Poison Control Center or Doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable maximal Sulfate may contraindicate the use of gastric lavage.

FOR CONTROL OF ALGAE AND ALGAE SLIME GROWTH IN SWIMMING POOL

All Purpose Algaecide
FOR CONTROL OF ALGAE AND ALGAE SLIME GROWTH IN SWIMMING POOL

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

INSTRUCTIONS FOR USE WITH HALOGEN BASED POOL SANITIZERS
This product is formulated to complement most swimming pool sanitizers. When using other products as outlined in Directions for Use on those products, always follow Directions for Use of those products. This product is effective against the growth of algae. This product is efficient and non-staining when used as directed. This product will not evaporate and its algae fighting abilities actually increase as pool water temperature increases.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2 - 7.8. Adjust chlorine residual to 1.3 ppm. Add chlorine granules at a rate of 25-50 lbs. per 5,000 gallons of water. Maintain chlorine residual at 1.0 - 3.0 ppm. Maintain藻icide residual at a constant level of 3.0 ppm. Maintain algae control at a constant level of 3.0 ppm. Maintain algae control residual on the water surface. This product is effective in controlling the growths of the following types of algae: Chlorophyceae (green algae), Phaeophyceae (brown algae) and Phaeomycete (red algae). When using other products as outlined in directions for this product, always follow directions on those products.

Add this product directly into pool by pouring around entire outside perimeter of pool. Allow the filter to run for at least 48 hours after adding algicide. During this period, swimming must not be allowed into the pool.

1. DOSAGES: Dosages that are free of algae or contain algae growth. Initial Application: Backwash the filter thoroughly. Vacuum algae debris and thoroughly brush pool. For an initial application, pour directly into pool at a rate of 4 oz. of this product per 50,000 gallons of water (1 oz. per 12,500 gallons). Plans of distribution shall be added by pouring a portion of the specified amount into several areas of the pool until all of the required quantities have been added. Vacuum pool after 24 hours to remove dead algae. If algae is still visible repeat dose as necessary until pool is free of visible algae. Once algae are under control, clean filter and return to normal operation. Maintenance: Four direct into pool at a rate of 4 oz. per 50,000 gallons of water (0.8 ppm) every 7-10 days depending on weather and use factors. After each rain or snowfall, add 0.5 oz. per 50,000 gallons. When using other products as outlined in directions for this product, always follow directions on those products.

2. Safety Interval: Swimmers are allowed to re-enter the pool 15 minutes after application of the product.

3. Ensure that water quality conditions are maintained for the successful use of the product.

TO DETERMINE POOL CAPACITY
For Rectangular Pools: Length times width times average depth (in feet) times 7.5 equals gallons
Round and Oval Pools: Long diameter times short diameter times average depth (in feet) times 5.5 equals gallons

FOR WINTERIZING POOLS BEFORE FREEZING: Not applicable in California. Test the water and adjust to the proper level. After pool is no longer in use, super-chlorinate using a recommended winter shock treatment, according to label directions. Allow pump to circulate for several hours or overnight. Add winterizing algae directly to pool water, walking around the pool, so that it is evenly distributed. Use at the rate of 50 lbs. per 15,000 gallons. Allow to circulate for 24 hours. Clean pool with a fine filter, drain pump and vacuumate as per manufacturer's instructions. Cover with a solid cover if possible. Pools without a solid cover may need a second treatment later in the cold-swimming season.

STORAGE AND DISPOSAL:
Do not contaminate water, food, or feed by storage and disposal.
PESTICIDE STORAGE: Store in original containers and place unlocked storage area. Keep from freezing. Do not contaminate water, food, or feed by storage and disposal.
SPILL OR LEAK PROCEDURES: Small spills may be mopped up or flushed away with water or absorbed on sand, absorbent material, and incinerated. PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash. CONTAINER DISPOSAL: Do not reuse container. Bottle caps, jars, etc. Triple rinse (or equivalent). Then dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Keep Out of Reach of Children. Corrosive. Causes irreversible eye damage and skin burns. Harmful if inhaled. Avoid breathing vapor or spray mist. Harmful if swallowed. Do not enter eyes, on skin or on clothes. Wear protective goggle, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: This product is toxic to fish.

ENVIRONMENTAL HAZARD: This product is toxic to fish.
