green to blue
removes organic waste and produces sparkling clean swimming pool water
• kills bacteria and controls algae
elimina los desechos orgánicos y hace que el agua de la alberca quede resplandecientemente limpia • mata las bacterias y controla las algas
1 balance 2 sanitize 3 shock 4 prevent algae
ACTIVE INGREDIENT:
CALCIUM HYPOCHLORITE ........................................ 52.9%
ALKALINITY ENHANCERS ........................................ 18.0%
PHOSPHATE ................................................................ 18.0%
TOTAL ................................................................. 99.9%
Minimum Available Chlorine ........................................ 40 ppm
KEEP OUT OF REACH OF CHILDREN
MANTENGASE FUERA DEL ALCANCE DE LOS NIÑOS
DANGER
Consumption or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, especially other water treatment products. Product is exposed to small amount of chlorine and may react violently to produce heat and toxic gases. Do not add to water in the pool. Do not allow this product to enter your pool. Highly Corrosive. Causes skin burns and irreparable eye damage. May be fatal if swallowed. Harmful if absorbed through the skin.
READ ALL PRECAUTIONARY STATEMENTS ON LABEL AND ALL FIRST AID STATEMENTS BEFORE USE.
FIRST AID: IF IN EYES: Hold eye open and rinse slowly under running water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a physician if irritation persists. If on skin: Rinse thoroughly with soap and water. Call a physician. IF SWALLOWED: Call a physician. In case of contact with eyes or skin: Rinse thoroughly with soap and water. Call a physician.
HOTSPOT POOLCare Products to the following water balance:
Acceptable Range for Balance
pH 7.2-7.6
Total Alkalinity 60-120 ppm
Calcium Hardness Above 200 ppm
Available Chlorine 1-4 ppm
Follow label directions for each product and allow each product to dissolve and dissipate before adding additional products to the pool. Use a reliable test kit that measures all these ranges.

HOT Green to Blue Shock System: If you are experiencing a severe algae bloom, which has turned your pool green, the HOT Green to Blue Shock System can turn your pool sparkling blue again. This two-part system kills bacteria and algae that has grown in your pool and then makes it easy to vacate out.

1. Add 1.3 lbs of this product per 5,000 gallons of pool water. If any granules settle to the bottom of the pool, use brush to disperse in helping it to dissolve.
2. Once this product has completely dispersed in the pool water, add 0.65 lbs of HOT Green to Blue II flocculants per 5,000 gallons of pool water through the skimmer.
3. Leave the system circulating for 1 hour then turn off the filter pump and allow to settle overnight.
4. The following day, vacuum the sediment to waste.
5. If the pool has not settled out or is not blue in color, repeat steps 1, 3 and 4. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Harmful if absorbed through the skin. Irritating to respiratory tract, eyes and throat.
• Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles and use rubber gloves when handling this product.
• For additional skin protection, wear long sleeves and long pants.
• Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Open in well ventilated area. Do not breathe dust or fumes.
• Remove and wash contaminated clothing before reusing.
