Always read the label for complete instructions and precautionary statements.
POOL Breeze Pool Care System Power Shock

INSTRUCTIONS FOR USE:

1. In a matter of seconds, turn your pool into a sparkling clean swimming pool. This shock treatment is the ultimate in shock products, providing a major boost in effectiveness. The shock treatment helps to quickly bring the level of free chlorine up to the desired level, ensuring a safe and enjoyable swimming experience.

2. The shock treatment is designed to be used in conjunction with your regular pool maintenance routine. It is recommended to use the shock treatment in the evening or at night to allow the pool to rest overnight.

3. Proper dosing is crucial for effective results. Refer to the product label for recommended dosage rates. Excessive dosing can lead to side effects, such as skin irritation and eye irritation.

4. Before using the shock treatment, ensure that the pool has been properly balanced. Test the pH and total alkalinity levels to ensure they are within the recommended range. If necessary, adjust these levels before applying the shock treatment.

5. After applying the shock treatment, allow a minimum of 24 hours for the pool to stabilize. Test the pool water quality again to ensure that the levels have returned to normal.

6. If the pool water remains cloudy after 24 hours, reapply the shock treatment. Be cautious not to exceed the maximum recommended dosage.

7. Monitor the pool water for any signs of imbalance. If the pH or total alkalinity levels are out of range, corrective adjustments may be necessary using a pool pH reducer or buffer.

8. After applying the shock treatment, avoid swimming for at least 24 hours to allow the chlorine level to stabilize. This is crucial for the proper functioning of the shock treatment.

9. Proper maintenance, including regular shock treatments, is essential for maintaining a safe and healthy swimming pool environment.

10. Store the shock treatment in a cool, dry place, away from direct sunlight. Follow all safety precautions and read the product label before use.

STORAGE & DISPOSAL:

1. Store the shock treatment in a cool, dry place, away from direct sunlight. Follow all safety precautions and read the product label before use.

2. Disposal:
   - Do not pour the shock treatment into the drain or storm drain. Instead, pour the remaining product back into the pool. Contact your local waste management authority for information on proper disposal of the product.
   - Do not mix chemicals with the shock treatment. Store the shock treatment in a separate area from other pool chemicals.
   - Keep the shock treatment out of reach of children and pets.
   - Disposal of the shock treatment is subject to local regulations. Contact your local waste management authority for information on proper disposal.

3. The shock treatment is a powerful product that can cause skin irritation. Keep away from eyes and mouth. Wear protective clothing and gloves when handling the product.

4. In case of contact with the skin or eyes, rinse with plenty of water. If swallowed, call a poison control center or seek medical attention immediately.

5. Keep the shock treatment out of reach of children and pets. Store the shock treatment in a location where it cannot be accessed by unauthorized persons.

6. If you have any questions or concerns about the use of the shock treatment, contact the manufacturer or your local pool professional for assistance.
