DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label and the product package label before using this product. This Supplemental Label must be in possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product package label for Axiom® DF Herbicide.

AXIOM® DF HERBICIDE USE IN WINTER WHEAT AND FALL SEEDED TRITICALE

Axiom® DF Herbicide may be used to control certain annual grass and broadleaf weeds when applied after the crop has fully germinated to early postemergence in winter wheat. Axiom® DF Herbicide may be applied either alone, in tankmix combination and in a sequential herbicide program with other registered herbicides.

CROP

Plant wheat at a depth of 1 - 2 inches. Axiom® DF Herbicide may be applied after the crop has fully germinated up to a maximum of 2 leaves emerged. Application to the crop between spiking and 2 leaf is preferred in most areas however, in WA, OR, and ID only, as long as the wheat is planted at a depth of 1.5" or deeper, application may be made upon wheat germination or later up until 2 leaves have emerged.

Excessive rainfall after application may cause crop injury to young seedlings.

Variety selection: Commonly grown varieties have shown excellent tolerance to Axiom® DF Herbicide but tolerance of all varieties to Axiom® DF Herbicide is not known and Axiom® DF Herbicide may cause crop injury. You should consult with local Cooperative Extension agent or Bayer CropScience representative for specific regional information. If a variety or hybrid has not been tested (especially newly released varieties), treat only a small area until tolerance is confirmed before treating large acreages.

AXIOM® DF HERBICIDE USE RATES

Axiom® DF Herbicide use rates are based on soil type. Select the appropriate rate from the following table:

<table>
<thead>
<tr>
<th>Soil Texture</th>
<th>Rate (oz of Axiom® DF Herbicide/A)</th>
<th>APPLICATION TIMINGS AND REMARKS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coarse Texture</td>
<td>4 - 6</td>
<td>Apply specified rate for soil type as a uniform broadcast spray using 10 or more gallons of water per acre.</td>
</tr>
<tr>
<td>(Sand, Loamy sand and Sandy loam)</td>
<td></td>
<td>Do not add crop oil concentrates, vegetable oils and/or petroleum oils to the tankmixture as crop injury may occur.</td>
</tr>
<tr>
<td>Medium Texture</td>
<td>6 - 8</td>
<td>Crop Timing: Wheat at spiking – 2 leaf *</td>
</tr>
<tr>
<td>(Loam, Silt loam, Silt, Sandy clay loam and Sandy clay)</td>
<td></td>
<td>Weed Timing: Preemergence up to 1 leaf</td>
</tr>
<tr>
<td>Fine Texture</td>
<td>8 - 10</td>
<td></td>
</tr>
<tr>
<td>(Silty clay loam, Silty clay, Clay loam and Clay)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* In WA, OR, and ID only, as long as the wheat is planted at a depth of 1.5" or deeper, application may be made upon wheat germination or later up until 2 leaves have emerged.
RESTRICTIONS FOR AXIOM USE IN WINTER WHEAT AND FALL SEEDED TRITICALE

- Do not apply Axiom® DF Herbicide by air or through any type of irrigation equipment.
- Do not apply to wheat seeded at a depth of less than 1 inch.
- Do not apply more than 10 ounces of Axiom® DF Herbicide per acre per use season.
- Do not apply in tank mixtures with crop oil concentrates (COC), vegetable and/or petroleum oils as crop injury may result.
- Regardless of the bioassay results, do not plant any crop other than those listed closer than 4 months after an Axiom® DF Herbicide application.
- Do not graze winter wheat within 30 days of Axiom® DF Herbicide application.
