Pyriproxyfen ..................................................0.46 %
Other Ingredients ..............................................90.44 %
Total .............................................................100.00 %

Net Contents: 4 Tubes
 each 0.014 fl oz (0.4 mL)

RESTRICTIONS:
• Use only on dogs 7 weeks and older. Do not apply to puppies or dogs weighing less than 3 lbs.
• Do not apply more than one (1) tube per treatment.
• Do not have contact or allow children to have contact with treated area until completely dry.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and warm water after handling.

HAZARDS TO DOMESTIC ANIMALS
For external use only. Do not use on puppies under 7 weeks of age or weighing less than 3 lbs. As with any product, consult your veterinarian before using this product on debilitated, aged, pregnant or nursing dogs. Individual sensitivities, while rare, may occur after using ANY pesticide product for dogs. If signs persist, or become more severe, consult a veterinarian immediately. If your dog is on medication, consult your veterinarian before using this or any other product.

DO NOT USE ON CATS
Keep cats away from treated dogs for 24 hours. If applied to a cat or ingested by a cat, contact your veterinarian.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for Precautionary Statements. For Directions for Use, Storage and Disposal, and First Aid see package insert inside.

Lot No:

Once-A-Month Topical Treatment for Fleas and Lice
For Use Only on Dogs and Puppies 7 Weeks and Older and Weighing 3–10 lbs.

READ THE ENTIRE LABEL BEFORE EACH USE
For the Prevention and Treatment of Flea and Lice Infestations on Dogs
• Kills all flea life stages
• Prevents fleas on treated dogs from infesting your home
• Kills fleas within 12 hours of application
• Treats, prevents and controls lice infestations

Side Effects
Monitor your dog after application. Side effects, although very rare, may include signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects (such as lethargy) occur, consult your veterinarian or call 1-800-422-9874.

Monitor your dog after application. Side effects, although very rare, may include signs of skin irritation such as redness, scratching, or other side effects. Immediate treatment of contact dermatitis can cause ocular irritation, including tearing, redness, or lacrimation, and local signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects occur, consult your veterinarian or call 1-800-422-9874.

DO NOT USE ON CATS
Keep cats away from treated dogs for 24 hours. If applied to a cat or ingested by a cat, contact your veterinarian.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for Precautionary Statements. For Directions for Use, Storage and Disposal, and First Aid see package insert inside.
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

HOW TO OPEN
1. Be sure tube is at bottom of pouch.
2. Using scissors, cut the pouch across the top and remove tube.

HOW TO APPLY
1. Remove one applicator tube from the package. See "HOW TO OPEN" section.
2. Hold applicator tube in an upright position facing away from you and your pet’s face and eyes. Pull cap off tube.
3. Turn the cap around and place other end of cap back on tube.
4. Twist cap to break seal, then remove cap from tube.
5. The dog should be standing for easy application. Part the hair on the dog’s back, between the shoulder blades, until the skin is visible. Place the tip of the tube on the skin and squeeze the tube to expel the entire contents directly on the skin. Do not get this product in your dog’s eyes or allow your dog to ingest this product. Do not allow the product to run off.
6. Discard empty tube as described in the Storage and Disposal section.
7. Under normal conditions the product is effective for a month. However, in case of severe flea infestation, retreatment may be necessary earlier than four weeks. Do not retreat more often than once every seven (7) days. After flea control is attained, return to a monthly retreatment schedule.

PRODUCT INFORMATION

The successive feeding activity of fleas on dogs frequently elicits a hypersensitivity skin disorder known as flea allergy dermatitis (FAD) or flea bite hypersensitivity. Treatment of dogs with Advantage II Small Dog rapidly kills fleas within 12 hours which may reduce the incidence of this condition.

Advantage II Small Dog kills existing fleas on dogs within 12 hours. Reinfesting fleas are killed within 2 hours with protection against further flea infestation lasting for four (4) weeks. Pre-existing pupae in the environment may continue to emerge for six (6) weeks or longer depending upon the climatic conditions.

Fleas, flea eggs, and flea larvae in the dog’s environment are killed following contact with an Advantage II Small Dog treated dog. Advantage II Small Dog provides multi-stage flea control effectively breaking all flea life-cycle stages for quick and lasting control of flea populations.

Advantage II Small Dog kills adult fleas quickly, within 12 hours, inhibits the development of immature flea life stages and prevents them from reaching the biting adult stage.

Advantage II Small Dog kills chewing lice that infest dogs and puppies, and prevents further infestations.

Advantage II Small Dog is waterproof and remains effective following a shampoo treatment, swimming or after exposure to rain or sunlight.

Monthly treatments are required for optimal control and prevention of fleas.
