This product contains 5.76 lb. of active ingredient per gallon and weighs 9.6 lb. per gallon.

Active Ingredient:
Polyoxethylene(dimethylliminio)ethylene (dimethyliminio)ethylene dichloride ..........60.0%
Inert Ingredients: ..................................40.0%
Total .............................................100.0%

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL
Keep container closed when not in use. Store in an area inaccessible to children and persons unfamiliar with its use. Leaking or damaged containers must be placed in a plastic bag and discarded in the trash. Mop up spills with clear water. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If not, discard in trash.

WINTERIZING DIRECTIONS
NAVA Algaecide 60 will prevent growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 to 10 fluid ounces of NAVA Algaecide 60 per 10,000 gallons of water. If at the end of swimming season pools have some visible algae growth, add 12 to 17 fluid ounces per 10,000 gallons. It is necessary that a uniform distribution of algaecide throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

NAVA Algaecide 60 is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. NAVA Algaecide 60 can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix NAVA Algaecide 60 with concentrated dry or liquid chlorine products.
