### DIRECTIONS FOR USE

#### FOR SUPERCHLORINATION:

- 2 pounds of dichloro-s-triazinetrione per 10,000 gallons of water (7.5 grams per 1,000 liters) will provide approximately 2 ppm of available chlorine.
- If the pool water has not been restored to its normal clarity, repeat the shock treatment described above.
- Combined chlorine is considered to be the effective form of chlorine, which is free from the color produced by the oxidation of organic materials. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product.

#### SPA AND HOT TUB DISINFECTION:

- START UP:
  - Adjust the pH of the water to the range of 7.2-7.6 and the alkalinity to 5-6 ppm (mg/L), based on suitable test kit readings. For example, the addition of one ounce of sodium dichloro-s-triazinetrione per 1,000 gallons (0.75 grams per 100 liters) of water will increase the available chlorine by 5 ppm (mg/L).

- SHOCK TREATMENT:
  - After each use, the water must be shocked or superchlorinated. Add a sufficient amount of an oxidizing compound to bring the available chlorine back to its original level. It is often necessary to use more than one shock treatment.

#### HOW TO CALCULATE POOL CAPACITY

- **SHAPE OF POOL**
  - Oval With Straight Sides: \( \text{GAL. OF WATER (DIMENSIONS IN FEET)} = \text{Full Width} \times \text{Full Length} \times \text{Average Depth} \times 6.7 \)
  - Circular: \( \text{GAL. OF WATER (DIMENSIONS IN FEET)} = \pi \times \text{Diameter} \times \text{Diameter} \times \text{Average Depth} \times 5.9 \)

#### PRECAUTIONARY STATEMENTS

- **ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.
- **PHYSICAL OR CHEMICAL HAZARDS:** With water only. Use only clean dry utensils. Contamination with moisture, dirt, organic matter or other materials in swimming pool water may cause generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds.

#### STORAGE AND DISPOSAL

- Keep out of reach of children.
- Store in a dry, cool and well-ventilated area. Avoid moisture getting into container.
- Do not reseal container; isolate unsealed container in the open or in a well-ventilated area; flood with large amounts of water; cover with large amount of sand or earth and then spray with a high-pressure water spray; or place in an approved landfill area.

#### KEEP OUT OF REACH OF CHILDREN}

- Probable mucosal damage may contraindicate the use of gastric lavage.
- If absorbed through skin or inhaled, harmful if swallowed. Consult a poison control center or doctor for further treatment advice.

#### DANGER

- Keep off wet floors. In case of spillage, wash with large amounts of water. After each use, keep container closed and out of reach of children and unrelated persons.

#### KEEP OUT OF REACH OF CHILDREN}

- If a child is apprehended by any hazardous substance, consult a doctor immediately and follow his/her instructions.
