PRECAUTIONARY STATEMENTS AND FIRST AID.

See back panel for additional information.

DANGER: CORROSIVE. THROUGH SKIN. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles, face shield, or safety glasses, protective clothing and rubber gloves when handling or using the toilet. Remove contaminated clothing and wash before reuse. STRONG OXIDIZING AGENT. generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion. ENVIRONMENTAL HAZARDS:

For Swimming Pool Disinfectant:

For Start Up of newly filled pools:

If the pool has been restored to its normal clarity, repeat the shock treatment described above.

DIRECTIONS FOR USE

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH of the water to the range of 7.2-7.6 using suitable products and a reliable test kit. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product. Preventative algae treatment be added on a weekly basis.

Reentry:

For Superchlorination:

ing water to raise the available chlorine level to 5-6 ppm (mg/L), based on test kit readings. If the combined chlorine level is above 0.5 ppm (mg/L). Combined chlorine is the difference between total and free chlorine, as determined by the use of a test kit. Add a sufficient amount of an appropriate shock product directly to the surface of circulating water to raise the available chlorine level to 5-6 ppm (mg/L) and the total chlorine level to 3-4 ppm (mg/L). Rinse treatment is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

EMERGENCY HANDLING:

If exposed skin or clothing is burned, wash with large amounts of water. After each use, keep container tightly closed. Oxidizing material. Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

THROUGH SKIN. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes,
on skin or on clothing. Wear goggles, face shield, or safety glasses, protective clothing and rubber gloves when handling
this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

FOR START UP OF NEWLY FILLED POOLS:

Adjust the alkalinity of the water to a minimum of 125 ppm (mg/L), based on the test kit reading. To initially achieve 1-3
chlorine residual, add the following:

• 1-5 lbs. of Dichlor to raise the available chlorine level to 2 ppm (mg/L), based on test kit readings. If the chlorinated water
level is at 2 ppm (mg/L) and the available chlorine level is above 2 ppm (mg/L), then shock treatment is not needed.

IF SWALLOWED:

YOU MAY ALSO CONTACT 1-800-420-9236 FOR EMERGENCY MEDICAL TREATMENT INFORMATION.

CAUSES IRREVERSIBLE EYE DAMAGE AND SKIN BURNS MAY BE FATAL IF INHALED OR ABSORBED

In case of contamination or decomposition do not reseal container. If possible, isolate container

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or

Rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact
your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the

CONTAINER HANDLING:

Due to unacceptable health, safety and disposal issues, do not save and use reconditioned containers. Reconditioned
