KEEP OUT OF REACH OF CHILDREN

DANGER

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and smoke. Do not add water to this product. Add only into water. Do not mix this product with any substances. Highly Corrosive. Causes skin burns and irreversible eye damage. May be fatal if swallowed. Harmful if absorbed through skin.

Read all precautionary statements on label and all first aid statements before use.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF INHALED: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if person is able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF SKIN OR CLOTHING is contaminated, remove clothing immediately and wash with plenty of soap and water. If not able to wash clothing, change clothing immediately. Do not wash or clean affected clothing until product is removed. Do not store clothing inside the package. Remove affected clothing immediately. Do not reuse clothing until product is removed.

NOTE TO PHYSICIAN: Probable mucosal damage may contaminate the use of garlic sauce.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IN CASE OF EMERGENCY CALL: 1-800-654-6611

DIRECTIONS FOR USE: In a bucket or flat-topped container with its lid, READ ALL PRECAUTIONARY STATEMENTS BEFORE USE. This product is a concentrated, catalyzing agent. It is a dry, fine-flowing form, it kills bacteria, e.coli algae and destroys organic contaminants in pools.

1. DO NOT mix this product with any water.
2. Filter pond water for 24 hours before the filter pump is turned off.
3. After the pump has run for 24 hours, the pond will be ready to use. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Use a water test kit that measures all these ranges.

Ultilma® Swamp to Swim Shock System: If you are experiencing a severe alga bloom, which has saturated your pond, Ultilma Swamp to Swim can be used to burn off the algae. This two-part system adds bacteria and algae that has invaded your pond and then makes it easy to vacate out of the pond.

At the start of the season, or if a severe alga bloom occurs during the season, the pond can be treated and returned to its natural appearance within 24 hours by using Ultilma Swamp to Swim I and II.

1. Add 2.6 lbs of Ultilma Swamp to Swim I per 10,000 gallons of pond water. If your pond is not to be drained, add 2.6 lbs of Ultilma Swamp to Swim I per 10,000 gallons of pond water.
2. Oxygenate the pond water with aeration. Add 1.3 lbs Ultilma Swamp to Swim II per 10,000 gallons of pond water to the filter or aeration system.
3. Use the system circulating for 1 hour to allow the filter to circulate the pond water evenly.
4. After the filter has been running long enough to distribute the pond water evenly, add 1.3 lbs of Ultilma Swamp to Swim II per 10,000 gallons of pond water through the aeration system.
5. The following day, vacuum the sediment to waste.

Ultilma® Swamp to Swim® II

KEEP OUT OF REACH OF CHILDREN

WARNING

READ ALL PRECAUTIONARY STATEMENTS ON LABEL AND ALL FIRST AID STATEMENTS BEFORE USE.

At the start of the season, or if a severe alga bloom occurs during the season, the pond can be treated and returned to its natural appearance within 24 hours by using the Ultilma Swamp to Swim System. Ultilma Swamp to Swim II is a fluorescent that will help kill your pond by depleting the bottom of your pond where they can easily be vacuumed away.

HOW TO USE: Do not mix this product directly to your pool skimmer. Use entire contents of pouch when system.

DIRECTIONS FOR USE: As part of the Ultilma Swamp to Swim System, use Ultilma Swamp to Swim I first and follow all directions.

1. Make sure the pond is circulating. Once Ultilma Swamp to Swim I has completely been dispersed in the pond water, add 10.6 oz per 5,000 gallons of Ultilma Swamp to Swim II through the skimmer.
2. Leave the system circulating for 1 hour time before the filter pump and allow any particles or debris to settle.
3. The following day, vacuum the sediment to waste.
4. If the pond has not settled out or if not in color, repeat Ultilma Swamp to Swim I treatment. Repeat Steps 2 and 3.

Check the chlorine level and adjust as necessary. Do not enter the pond until the chlorine level is between 1-4 ppm. Balance the water chemistry following the recommended values in the table under "MINIMUM SOLUTIONS" located on the box or the Ultilma Swamp to Swim I label.

STORAGE AND DISPOSAL: Keep this product in its original, tightly closed container until use in a pond. Do not mix directly with any other chemicals, including those normally used in the pool. Use entire contents, then dispose of empty container. Offer for recycling, or dispose of in accordance with state and local regulations. Do not rinse empty container.

PRECAUTIONARY STATEMENTS:

HARMED PERSONS AND DOMESTIC ANIMALS: Dosage: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Harmful absorbed through the skin, starting to head and mouth. Do not eat or drink anything by mouth to an unconscious person.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF INHALED: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if person is able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

FIRST AID:

IF INHALED: Remove individual from exposure. Seek medical attention if breathing becomes difficult or if respiratory irritation develops.

IF IN DROPS: Flush eye with water for 15 minutes. Take off all contaminated clothing. Seek medical attention if irritation persists.

IF IN EYES: Flush eye with plenty of water for at least 15 minutes. Seek medical attention if irritation develops.

IF SWALLOWED: Call a doctor immediately. DO NOT induce vomiting unless directed to do so by a physician.

Never give anything by mouth to an unconscious person.
