This Product May Only be Used Inside and Within 100 Feet of Man-made Structures and For All Burrow Baiting

KILLS RATS, MICE & MEADOW VOLES*

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01%
OTHER INGREDIENTS:† 99.99%
TOTAL 100.00%
†Contains Denatonium Benzoate

For Use In and Around Agricultural Buildings and Homes
Kills Anticoagulant Resistant Norway Rats, Roof Rats & House Mice
Norway Rats, Roof Rats & House Mice Cease Feeding After Consuming a Toxic Dose

KEEP OUT OF REACH OF CHILDREN

CAUTION
See back panels for First Aid and additional precautionary statements.

EPA REG. NO. 12455-96-3240 EPA EST. NO. 12455-WI-1

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
FIRST AID

IF ON SKIN:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning

Wash with plenty of soap and water.

TREATMENT FOR PET POISONING:

NOTE TO PHYSICIAN OR VETERINARIAN:

Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning

IF SWALLOWED:

Have person sip a glass of water if able to swallow.

KEEP OUT OF REACH OF CHILDREN CAUTION

See side panels for First Aid and additional precautionary statements.

DIRECTIONS FOR USE

FARM & HOME

KILLS RATS, MICE & MEADOW VOLEs*

Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01%

TOTAL: 100.0%

†Contains Denatonium Benzoate

STORAGE AND DISPOSAL

Do not contaminate water, food or feeding storage or disposal.

PESTICIDE STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep container closed and away from other chemicals.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable containers. Do not reuse or refill this container. Offer for recycling, if available.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Net Weight: 5 lbs (2.2kg)

MADE IN USA

DIRECTIONS FOR USE (Continued from other panel)

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS:

Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Rate: Apply 1 to 6 ounces of bait per placement (usually at intervals of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

For treating burrows, use a long-handled scoop to place 1 to 4 ounces of bait deep into each active burrow entrance. Close burrows with soil 3 to 7 days after bait placement. Retreatment burrow entrances that are reopened by rats. If the area where treated burrows are located is accessible to children and nontarget animals, check burrow every morning and evening to make sure that this has not been pushed out of burrow. Remove and properly dispose of any bait that has become accessible to children or nontarget animals.

Mouse and Meadow Voles*: Apply 1 to 6 ounces of bait per placement. Space placements at intervals of 8 to 12 feet in infested areas. Larger placements, up to 2 ounces, may be used at points of extremely high mouse and meadow vole activity.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less than stereotaxic bait than with anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Using water-tight gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To discourage nontarget, wild sources of rodent food, water and harborage as much as possible. If rodent feeding does occur, repeat treatment. Where a continuous source of habitat is present, establish permeant bait stations and replenish them as needed.

PRECAUTIONARY STATEMENTS:

Hazard to Nuisance and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing.

All handlers (including applicators) must wear long-sleeve shirt, long pants, shoes plus socks, and gloves. Any person who retrieves successes or unused bait following application of this product must wear water-tight gloves.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If it is no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using any other hand to mouth activities.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to nmnammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Pesticide also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinse water.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polyvesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
