Laundry Disinfectant

FIRST AID

In case of contact:

If in eyes:

Rinse eyes immediately with running water. If irritation persists, consult a physician.

If on skin or clothing:

Take off contaminated clothing. Rinse skin with plenty of water. If prolonged or repeated exposure occurs consult a physician.

If inhaled:

Call a poison control center or doctor for treatment advice. If irritation persists consult a physician.

If swallowed:

If swallowed, do not induce vomiting unless instructed to do so by medical personnel. Call a poison control center or doctor immediately for information on the proper treatment. A physician should be consulted if symptoms persist or are severe.

Storage and Disposal

STORAGE:

Store in a well ventilated area away from heat, sparks, and open flames. Keep out of reach of children.

DISPOSAL:

Likely to be hazardous to the environment. Do not incinerate. Do not pour into sewers or waterways. Treat as a hazardous waste with appropriate treatment, storage and disposal.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS. CORROSIVE. Do not give anything by mouth to an unconscious person. If swallowed, do not induce vomiting unless instructed to do so by medical personnel. Call a poison control center or doctor immediately for information on the proper treatment. A physician should be consulted if symptoms persist or are severe.

DIRECTIONS FOR USE

FOR USE IN LAUNDRY DISINFECTING, BLEACHING, AND SANITIZING

To Disinfect and Bleach:

Dissolve the required amount of Advacare® Disinfectant in warm water, treating the maximum load of dry laundry. Use level, time and temperature of wash will vary depending on strain of microbe, load size, fabric type and temperature. If a temperature of 90°F to 160°F (32°C to 71°C) is used, Advacare® Disinfectant will provide a disinfecting action in addition to its bleaching action.

To Sanitize and Bleach:

Dissolve the required amount of Advacare® Disinfectant in warm water, treating the maximum load of dry laundry. Use level, time and temperature in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and permitting authority. The product should be kept cool and in a strong oxidizing agent. Do not store near food, tobacco or other materials that may be exploded hazard.

PESTICIDE STORAGE:

Corrosive. Do not store near food, tobacco or other materials that may be exploded hazard. Do not store near any oxidizing agent.

PESTICIDE DISPOSAL:

Toxic residues are accumulated. Improper disposal of excess pesticide, spray equipment, or containers is a violation of Federal Law. If these pesticide residues are dumped into sewers, surface waters or landfills, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Disposal Officer at the nearest EPA Regional Office for assistance.

DISPOSAL:

Do not reuse or refill this container. Store in a cool, dry place. Do not dispose of in the usual household waste. Do not incinerate. Do not pour into sewers or waterways. Treat as a hazardous waste with appropriate treatment, storage and disposal.
