An effective sanitizer for use on food contact surfaces

**FIRST AID**

If in eyes, rinse open and eyes closed gently with water for 15 – 20 minutes. Remove contact lenses, if present for 5 minutes, then continue rinsing.

**IF ON CLOTHING**

Take off contaminated clothing. Wash the clothing immediately with soap and water in an impervious container.

**IF EXHALED**

If the room is heavily laden with sanitizing solution, open windows and doors. If eyes become irritated, rinse with running water for at least 15 – 20 minutes. If irritation continues, seek professional medical advice.

**IF INHALED**

Call a Poison Control Center or doctor immediately for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING**

Water for 15–20 minutes. Do not remove clothing if it is on fire or if the person in fire can safely do so.

**IF IN EYES**

Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present for 5 minutes, then continue rinsing.

**IF INHALED**

Call a Poison Control Center or doctor immediately for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor for treatment advice.

**IF EXHALED**

If the room is heavily laden with sanitizing solution, open windows and doors. If eyes become irritated, rinse with running water for at least 15 – 20 minutes. If irritation continues, seek professional medical advice.

**OTHER INGREDIENTS:**

Campylobacter jejuni Listeria monocytogenes

didecyl dimethyl ammonium bicarbonate.....................................................7.5%

**ACTIVE INGREDIENTS:**

**PACKAGING SUBSTRATE (LABEL TYPE)**

BLACK

**NET CONTENTS:**

55 U.S. gal/208.2 L

**DIRECTIONS FOR USE**

**SANITIZE NON-POROUS GLOVED HANDS:**

To sanitize non-porous gloved hands, apply 1 oz. per 2 ½ – 4 gallons of water (150-240 ppm active quat) to conveyors with suitable feeding equipment. Follow the foaming machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SHOE FOAM SANITIZER DIRECTIONS:** (Use not approved in the State of California): To sanitize shoes, apply 1 oz. per gallon of water (200 ppm) for 60 seconds. Drain thoroughly before reuse. Do not rinse. Allow foam to remain for at least 60 seconds. Do not wipe off. Rinse and dry.

**SANITIZE EGG SHELLS INTENDED FOR FOOD:**

Spray with a use-solution of 1 oz. of Questar Quat per 2 ½ – 4 gallons of water (150-240 ppm active quat). If necessary, pre-soak to allow the quaternary solutions to permeate the shell surface and allow the solution to wet the shell. Do not spray eggs into animal areas and the packaging and storage areas of food plants, shoe baths or storage areas of animal areas. To prevent the spreading of pathogens, place infected birds in a sanitary isolation area. Eggs must be reasonably dry before casing or breaking. The solution must be reapplied to all sanitized surfaces at least daily or more often if the solution appears visibly diluted or soiled.

**SANITIZE CONTAINER AND PACKAGING SURFACES:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the container and packaging surfaces for at least 60 seconds. Drain thoroughly before reuse. Do not rinse.

**SANITIZE FOOD CONVEYORS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the conveyor and other hard nonporous surfaces. Surfaces must remain wet for at least 60 seconds followed by adequate rinsing.

**SANITIZE OTHER SURFACES:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the toilet. Harmful if absorbed through skin. Wear protective eyewear (goggles or face shield), protective clothing and protective (rubber or chemical resistant) gloves. Remove and wash the toilet.

**SANITIZE FOOD PROCESSING EQUIPMENT:**

Immerse pre-cleaned glassware, dishes, silverware, cooking utensils and other similar size food processing equipment in a solution of 1 oz. of Questar Quat per 2 ½ – 4 gallons of water (150-240 ppm activequat) for 15 – 20 minutes. Do not rinse. Drain thoroughly before reuse. Do not rinse.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.

**SANITIZE HATCHERY, HATCHERY AND PACKAGING ROOMS:**

Apply 1 oz. of Questar Quat per gallon of water (200 ppm) for 60 seconds. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrape and, when necessary, pre-soak. Then thoroughly wash or flush the hatchery, entrances to buildings, hatcheries, production and packaging rooms by using a foam generating machine or aerator to apply the foam layer. Follow the foaming directions as specified by the manufacturer of the foamer/and or aerator.
