FINALE® Herbicide
EPA Reg. No. 432-1229
SLN No. OR-110006

FIFRA 24(c) Special Local Need

FOR DISTRIBUTION AND USE ONLY IN MALHEUR AND JEFFERSON COUNTIES
IN THE STATE OF OREGON

Glyphosate-Tolerant Creeping Bentgrass in dry irrigation canals and drainage ditches.

Glyphosate-Tolerant Creeping Bentgrass is an APHIS-USDA regulated article.

THIS LABEL IS VALID UNTIL December 31, 2023, OR UNTIL OTHERWISE AMENDED, WITHDRAWN, CANCELED, OR SUSPENDED.

ACTIVE INGREDIENT:
Glufosinate-ammonium* .................................................................................................................. 11.33%**
OTHER INGREDIENTS: .................................................................................................................. 88.67%

*CAS Number 77182-82-2
**Equivalent to 1.00 pound of active ingredient per U.S. gallon.

TOTAL 100.00%

WARNING

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Read the label affixed to the container for FINALE® Herbicide, EPA Reg. No. 432-1229, and this Section 24(c) label before applying. DO NOT use in a manner inconsistent with the application directions, restrictions, and precautions provided on the label affixed to the container for FINALE® Herbicide and this Section 24(c) label. Use of FINALE® Herbicide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for FINALE® Herbicide.

Restrictions and Limitations

• DO NOT spray across canals or ditches. Treat the banks of the canal above the normal waterline; this will reduce the potential of herbicide reaching the lower interior of the canal. To prevent injury or illegal pesticide residue levels in irrigated crops, it is important to prevent herbicide-treated soil/plants from being in contact with water used to irrigate crops.

• Although this product is not a Restricted Use Product, all applications under this Section 24(c) registration must be conducted by a licensed pesticide applicator.

• DO NOT apply to any other site, pest (Glyphosate-tolerant creeping bentgrass is the pest), or by any other method of application not stated on this label.

• Apply when irrigation canals are dry, drained, and not in use. Water may pool in localized areas of drained canals during the winter time, or other periods of non-use; the banks of these canals can be treated if the standing water is not used for irrigation purposes and/or water will not be introduced into the canal for at least 14 days after application.

• Apply when drainage ditches are dry. Water may pool in localized areas of ditches during winter time; the banks of these ditches can be treated if water is not being used for other purposes. If irrigation canals contain water for irrigation, DO NOT use the water for irrigation for at least 14 days after application.

• DO NOT apply FINALE Herbicide to irrigation canals/ditches unless a 14-day withholding period can be observed. The withholding period is the...
period of time before water can be introduced into an irrigation canal/ditch.

- **DO NOT** apply by aircraft.
- **DO NOT** spray during windy conditions.
- **DO NOT** apply to water.
- **DO NOT** allow herbicide to run off-site.
- **Chemigation. DO NOT** apply this product through any type of irrigation system.

- **FINALE Herbicide** is a foliar-active material with little or no perceptive soil-residual activity. Best results are obtained when application are made to actively growing weeds. **FINALE Herbicide** is rainfast for most weeds within 4 hours after application. Rainfall within 4 hours may necessitate retreatment.

**Spot Spray or Directed Applications**

Spot spray or directed applications of **FINALE Herbicide** may be used to control creeping bentgrass in dry irrigation canals and dry drainage ditches according to the directions in the table below. For best results, apply as a spray-to-wet basis. Make direct applications of spray mixture specifically at Glyphosate-tolerant creeping bentgrass. Ensure uniform and complete coverage. Backpack, pump-up, and hydraulic sprayers may be used. Use a coarse spray. Thoroughly clean the sprayer following use. Regrowth may occur due to growth stage of the weed or environmental conditions. For well established creeping bentgrass, repeat applications will likely be necessary. Treated plants should be monitored for regrowth.
