PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING
Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be harmful if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sandblasting boat surfaces, wear a mask or a respirator jointly approved by the Mining Enforcement and Safety Administration and the National Institute of Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID
IF SWALLOWED:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.
IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.
OTHER: Have the product container or label with you when calling a poison control center or doctor or going for treatment.
NOTE TO PHYSICIAN: Contains petroleum distillate – vomiting may cause aspiration pneumonitis.

ENVIRONMENTAL HAZARDS:
This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL:
Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixtures or rinsates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or resell this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour mixture into application equipment or a mix tank or store rinseate for other use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

DISCLAIMER: The performance of any marine paint or coating depends on many factors outside the control of International Paint LLC including surface preparation, proper application, and environmental conditions. Therefore, International Paint LLC cannot guarantee the product's suitability for your particular purpose or application, implied warranties of fitness for a particular purpose and of merchantability are excluded. International Paint LLC shall not, under any circumstances, be liable for incidental or consequential damages. By purchase or use of this product, buyer agrees that the sole and exclusive remedy, if any, is limited to the refund of the purchase price or replacement of the product at the option of International Paint LLC.

International and Interspeed are trade marks of the AkzoNobel Group of Companies.

Product Identity
Interspeed® 6400NA
Controlled Depletion Polymer Antifouling
Color
Black
Sales Reference
BQA679/5GL
Net Contents
5 U.S. Gallons (18.93 Liters)
MSDS Reference Revision
BQA679 A0
Batch

FOR COMMERCIAL USE ONLY

Active Ingredient:
CUPROUS OXIDE 37.20%
Inert Ingredients:
Copper as Metallic 32.90%
Contains petroleum distillates.

KEEP OUT OF REACH OF CHILDREN
WARNING
See side panel for additional Precautionary Statements

EPA Reg. No.: 2693-132
EPA Est. No.: 2603-TX-1
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: An economical anti-scaling designed to offer fouling protection against algae, barnacles and other marine fouling for extended periods of time. For use in fresh, salt and brackish waters. Low 30C. This product is for freshwater use and professional application only. Not for sale to the general public.

PRODUCT INFORMATION

Finish/Sheen: Semi-Gloss (ASTM D 523)
Coverage: One gallon
Volume Solids: 60% ± 2% (ASTM D 2507)
Mix Ratio: One part
Flash Point: 79°F (26°C) (Solvent-free) (ASTM D 2272)
Film Thickness: 4.6 mils (102 microns) dry sponged equivalent to 6.3 mils (17 microns) wet, 6.1-8.5 mils (152-216 microns) dry, practical range equivalent to 6.7-8.3 mils (170-211 microns) wet.
Theoretical Coverage: 240 sq. ft. (61.1 sq. m) per gallon

All above information subject to change.

APPLICATION DETAILS

Method: Airless spray, brush or roller.
Thinner: Not recommended, if necessary use 613000, see thinning section.
Cleaner: CT 3000

NEW CONSTRUCTION: Depend on local procedures, consult International.

UNPAINTED SURFACES: Prepare surface and apply recommended primer. Apply one or more coats of this product as specified. (Contact the relevant primer data sheet for surface preparation and recoating information.)

MAINTENANCE: Use controlled high pressure fresh water washing (3000 psi, 211 kg/cm2, @ 300 psi) to clean entire area, and remove any scale layer at the surface of the coating anti-scaling system. Repair corroded areas with the recommended anti-corrosive primer and apply the product within the overcoating interval specified for the primer (consult relevant primer data sheets). Apply the specified number of coats of this product.

WATER: This material is a one component coating, always mix thoroughly with a power mixer before application.

APPLIQUES: Use airbrush/roller or spray. Application by other methods, brush or roller, may require more than one coat and is suggested for small areas or small area coating. Apply 6-7 mils (152-216 microns) wet which will yield 4.6 mils (102 microns) dry film thickness. Consult the following equipment recommendations or contact suppliers equal.

EQUIPMENT:

Brush: Use appropriate size China bristle brush.
Roller: Use All Purpose Roller Cover with 65" x 65" (165 x 165 cm) Atlas smooth to medium, Premium roller cover to remove loose debris prior to use.
Airbrush: Minimum 28:1 ratio pump, 250-260 psi (1730-1760 kPa) at 6-7 in. (15.2-17.8 cm) pressure, 0.006-0.008 in. (0.152-0.203 mm) at high pressure moisture free; 60 mesh tip filter.

THINNERS: Do not thin beyond the label's instructions. Solvent is supplied at extra viscosity and normally does not need thinning, if thinning is necessary, thin up to a maximum of 4% (v:v) per gallon (1.7 L) with International CT 3000 Thinner. WASHING & CLEAN UP: Clean all equipment immediately after use with International G9909 Thinner. Spray equipment using high pressure air with solvent (not included) before rinsing with water. It is good practice to periodically flush out spray equipment during the course of the working day. Frequency will depend upon factors such as ambient temperature, temperature and adjusted time including washdowns. Storage/transport conditions.

WELDING: In the event welding of flame cutting is performed on metal coated with this product, do so in accordance with instruction in AWS/D1.1-81 "Safety in Welding and Cutting".

REGULATORY DATA

V.O.C.: 2 lb/gal (65.8 g/l) as supplied. ( EPA METHOD 9) SYSTEMS AND COMPARABILITY: International should be consulted for detailed application advice, specific recommendations and as to the suitability of specific products on individual vessels.

UNPACKING: Store in good weather when air and surface temperatures are above 30°F (-3°C). Surface temperature must be at least 50°F (10°C) above dew point. For optimum application properties, bring material to 72°F-79°F (22°C-26°C) temperature range prior to mixing and application (concrete surfaces deemed acceptable) also to be maintained in protected storage above 40°F (4°C) - 90°F (32°C).

包装箱中的湿气和温度超过这些条件可能会影响材料的性能。推荐测湿器检测材料的储存温度为0°-40°(4°C-5°C)。

PACKAGING BOXES:

These boxes may be stored under certain conditions. Contact your local International Representative for advice.

To maximize performance, a minimum of two full coats of the recommended dry film thickness should be applied.

Technical and application data herein is for the purpose of establishing a general guideline of the coating and proper coating application techniques. Test performance results were obtained in a controlled laboratory environment (and external exposure) and may not claim that the method published test results, or any other tests, accurately represent results actually found in all field environments. As application, environmental, and design factors can vary significantly, due care should be exercised in the selection, verification of performance, and use of the coating.

SURFACE PREPARATION: Paint only clean, dry surfaces. Remove all grease, oil, scale, corrosion and other dermal foreign matter by "salvage cleaning" (SPC-96).
