PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING
Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be harmful if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint on sanding or sandblasting boat surfaces, wear a mask or a respirator jointly approved by the Mining Enforcement and Safety Administration and the National Institute of Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID
IF SWALLOWED:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
IF INHALED:
• More person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.
IF IN EYES:
• Hold open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.
OTHER:
• Have the product container or label with you when calling a poison control center or doctor or going for treatment.

NOTE TO PHYSICIAN: Contains petroleum distillate — vomiting may cause aspiration pneumonia.

ENVIROMENTAL HAZARDS:
This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL:
Do not contaminate water, food or feed by storage or disposal. Do not store near excessive heat. Disposal is prohibited. Pesticide disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recirc. Shake for 10 seconds. Pour residues into application equipment or a mix tank or store residues for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

DISCLAIMER: The performance of any marine paint or coating depends on many factors outside the control of International Paint LLC including surface preparation, proper application, and environmental conditions. Therefore, International Paint LLC cannot guarantee the product's suitability for your particular purpose or application. Implied warranties of fitness for a particular purpose and of merchantability are excluded. International Paint LLC shall not, under any circumstances, be liable for incidental or consequential damages. By purchase or use of this product, buyer agrees that the sole and exclusive remedy, if any, is limited to the refund of the purchase price or replacement of the product at the option of International Paint LLC.

International and Interspeed are trade marks of the AkzoNobel Group of Companies.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: An economical anti-galvanizing designed to offer failures protection against corrosion, blanching, and other marine coating for extended periods of time. For use in fresh, salt and brackish water. Low VOC. This product is for industrial use and professional application only. Not for sale to the general public.

PRODUCT INFORMATION

Pack/Item: Semi-Gloss (ASTM D-522)

Volume: 5% in 2% (ASTM D-287)

Mix Ratio: 1:1

Flash Point: 78°F (26°C) (Flash 30 (ASTM D-287))

Film Thickness: 4.0 ml (102 minutes) dry coated equivalent to 6.7 ml (170 minutes) wet.

4.0-5.0 ml (102-127 microns) dry practical range equivalent to 6.7-8.0 ml (170-211 minutes) wet.

Theoretical Coverage: 240 sq. ft./gall. (4.0 ml/0.22 lb).

Allow appropriate base factors.

APPLICATION DETAILS:

Method: Airless spray, brush or roller.

Thinner: Not recommended, if necessary use GT-2707, see thinning section.

Cleaner: GT-1175

NEW CONSTRUCTION: Depends on said procedures, consult International.

UNFINISHED SURFACES: Prepare surface and apply recommended primer. Apply one or more coats of this product as specified. Consult the relevant primer data sheet for surface preparation and recoating information.

MAINTENANCE: Use controlled and high pressure fresh water washing (2000 psi, 210 deg. F.) to clean the entire area, and remove any loose flakes from the surface of the existing anti-fouling system. Repaired areas in this recommended material are recoated with this product within the recoating interval specified for the primer (consult relevant primer data sheet). Apply the specified number of full coats of this product.

MIXING: This material is a two component coating. Always mix thoroughly with a power agitator before application.

APPLICATION: Apply by airless spray with Application by other methods, such as brush, may require more than one coat and is suggested for small areas of marine usage coating. Apply 4.0-5.0 ml (102-127 microns) wet which will yield 4.0 ml (100 minutes) dry film thickness. Consult the following equipment recommendations for checking paint thickness.

EQUIPMENT:

8-kw portable site power source

Rigging Use all Purposes Primer Cover with 3/8" 1.934" 1/2" sheet metal smooth to rough. Through center cover to remove loose paint prior to use.

Airless Sprayer: Minimum 30 psi (217 kPa), 0.2 GPM (0.955 lpm), maximum 30 psi (217 kPa), 0.5 GPM (2.3 lpm) to provide material flow.

SPECIALTIES: Use in normal weather conditions. Use in normal conditions only. Use in normal conditions. Use in normal conditions only. Use in normal conditions only. Use in normal conditions. Use in normal conditions. Use in normal conditions. Use in normal conditions.

THINNING: do not exceed your material's compatibility. Material is supplied at spray viscosity and viscosity does not need thinning. If thinning is necessary, thin up to a maximum of 4 ounces (118 ml) per gallon (3.7 l) with International GT-1175 Thinner.

WASTE DISPOSAL & CLEAN UP: Clean all equipment immediately after use with International GT-2707 Thinner. Spontaneous reaction with water during the course of the drying will noticeably reduce the viscosity well depending on factors such as amount sprayed, temperature and moisture conditions including wind, humidity, ventilation, and sunlight conditions.

RECOMMENDATIONS: In the event wrinkling or flame Tester is performed on metal coated with this product, do so in accordance with instructions in the MSDS and The Safety of Coating.
