3M 7000 Series Copper Granules

Built-in control of algae to maintain the beauty of roofing shingles

ACTIVE INGREDIENT
Cuprous oxide.......................... 3.28%
OTHER INGREDIENTS ............. 96.72%
Total................................. 100.00%

KEEP OUT OF REACH OF CHILDREN
CAUTION

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal.
  Pesticide Storage:
  Store under ambient conditions.
  Pesticide Disposal:
  Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.
  Pesticide Container Disposal:
  Return empty container for recycling or reuse.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

If granules are to be stored prior to (and during) use, a copy of this label must be made readily accessible to employees when they are in their work area(s).

3M 7000 Series Copper Granules contain copper oxide, an effective algaecide for inhibiting the growth of blue-green algae that can stain roofing shingles. The granules are treated roofing granules 1-2 mm in diameter made from rock coated with copper oxide and sealed in a ceramic shell. The ceramic shell allows a timed release of copper to provide long-lasting algae control that extends the useful life of shingles. The granules are colored to match the roofing shingles.

3M 7000 Series Copper Granules should be mixed with standard roofing granules at the rate of 5-10% by weight and processed normally during manufacture of the shingles.

WARRANTY
3M warrants that the 3M 7000 Series Copper Granules conform to the ingredient statement above.
