Super Shock 'N Swim treatment. Pool should not be entered until the chlorine residual is 1 to 4 ppm.

- Prevent pool problems. Re-entry into treated pools is prohibited above levels of 4 ppm.
- Unpleasant odors and eye irritation. Do not re-enter pool until the free available chlorine is 1–4 ppm.
- pH adjustment to 7.2–7.4 with HTH pH Plus.
- Hardness above 200 ppm • Available chlorine 1–4 ppm.
- Acceptable range for balance: pH 7.2–7.6 • Total Alkalinity 60–120 ppm • Calcium hardness above 200 ppm.

Adjust and maintain pH to 7.2–7.4 with HTH pH Plus. Remove granules from skimmer baskets before adding additional products to the pool.

- Add the recommended dosage of this product while dispersing before adding additional products to the pool.
- Use a HTH test kit that is compatible with pool water, follow our 4 step pool care program:
  1. Do not reseal container.
  2. Do not mix this product with a small amount of water. Only add directly to the pool water.
  3. Flood with large amounts of water until the material is dissolved.
  4. Add algaecide as directed.

- This is a highly effective, multi-purpose chlorinator.
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- It is a violation of Federal law to use this product in a floater or feeder that has been used with other water treatment products.
- Add only into water.
- Use this product in a floater or feeder that has been used with other water treatment products. Use only in pools with a skimmer and skimmer baskets.
- This product is designed to be used in conjunction with other HTH balancer and algaecide products to maintain crystal clear water.
- For best product performance, swimmer comfort and long-lasting cleaning of equipment.
- FOR DISPOSAL OF A CONTAMINATED SPILL, contaminate clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice.
- Keep out of reach of children. Do not swallow. Do not induce vomiting unless told to do so by a poison control center or doctor.

- Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.
- Do not mix this product with a small amount of water. Only add directly to pool water. It can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add product during evening hours while the filter pump is running. When adding this product, make sure that the material is drawn into the system at the same rate.

- NOTE TO PHYSICIAN: IF INHALED:
  - Get person into fresh air.
  - Call a Poison Control Center or doctor for treatment advice.

- ON SKIN OR CLOTHING:
  - Hold eye open and rinse slowly and gently with water for 15 minutes.
  - Remove contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice.

- Read all precautionary statements on label and all first aid statements on back panel.

- Why you should use this product:

WHY YOU SHOULD USE THIS PRODUCT:

For best results, follow our 6-step pool care program.

1. Test and Balance.
   - Use a HTH test kit to check levels.
   - Use HTH balancer products to adjust levels as needed.

2. Sanitize.
   - Include HTH 3-in-1 Chlorinating Skimmer Tablets.

3. Flood with large amounts of water until the material is dissolved.

4. Add algaecide as directed.

5. Step 1: Treat and Balance.
   - Use a HTH test kit to check levels.
   - Use HTH balancer products to adjust levels as needed.

   - Include HTH 3-in-1 Chlorinating Skimmer Tablets.

7. Step 3: Flood with large amounts of water until the material is dissolved.

8. Step 4: Add algaecide as directed.

For best product performance, swimmer comfort and long-lasting cleaning of equipment.

WATER BALANCE:

1. pH: 7.2–7.4
2. Total Alkalinity: 60–120 ppm
3. Calcium hardness: above 200 ppm
4. Available chlorine: 1–4 ppm

This product does not contain formaldehyde. It is not an algicide and does not contain any biocides or sanitizers.

Other ingrediants: 48% buffered for pH control.

HTH balancer and algaecide product needs will vary, depending on pool conditions.

For best results, follow our 6-step pool care program.
ALGAE CONTROL:

åCHLORINE RESIDUAL is 1–4 ppm. Shock treat your pool when opening, then weekly to help prevent pool problems. Additional shock treatments may be necessary.

Follow label directions. Add 1 lb. (16 oz.) of this product per 12,000 gallons of water weekly to help prevent pool problems. Additional shock treatments may be necessary.

Follow "POOL SHOCK TREATMENT" directions. Allow 30 minutes. Repeat dosage, as needed, until chlorine residual is 1 to 4 ppm.

Follow label directions for each product and allow each product to dissolve and skimmer, making sure that the material is drawn into the system at the same rate.

Method for dosing directly into pool:

Use entire contents when opened.

Step 1:

Step 2:

Step 3:

It is a violation of Federal law to use this product in a product container or label with you when calling a poison control center or doctor, as it can increase fire intensity.

Keep away from heat and from flame and burning material (like a magnifying glass, stove, or matches).

Keep all foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases. Do not allow product to contact any foreign matter, including other water treatment products.

• Do not mix this product with a small amount of water. Only place this product directly in the skimmer. • Do not allow to become wet or damp before use. • Do not mix this product with a small amount of water. Only place this product directly in the skimmer. • Do not allow to become wet or damp before use.

Harmful if swallowed or absorbed through skin.

Harmful if absorbed through the skin. Irritating to nose and throat.

• Keep away from heat and from flame and burning material (like a magnifying glass, stove, or matches).

• Keep all foreign matter, including other water treatment products.

• Contains skin softener.

Strong oxidizing agent. This product can increase fire intensity.

PHYSICAL AND CHEMICAL HAZARDS: DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add with large amounts of water until the material is dissolved. Dispose of container and any residue in an approved landfill area.

DANGER

• Keep out of reach of children

• Keep away from heat and from flame and burning material (like a magnifying glass, stove, or matches)

• Do not allow product to contact any foreign matter, including other water treatment products.

MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS

KEEP OUT OF REACH OF CHILDREN

FIRST AID: IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

NOTE TO PHYSICIAN:

If swallowed, do not induce vomiting. Give 2–4 glasses of water for drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARD:

Strong oxidizing agent. This product can increase fire intensity.

Do not pre-mix with large amounts of water until the material is dissolved. Dispose of container and any residue in an approved landfill area.

Strong oxidizing agent. This product can increase fire intensity.

Do not pre-mix with large amounts of water until the material is dissolved. Dispose of container and any residue in an approved landfill area.

DO NOT contain skin softener

• Contains skin softener

Strong oxidizing agent. This product can increase fire intensity.

For best results, follow our 6-step pool care program:

• 1 – Test and Balance
• 2 – HTH® Test Strips to check shock
• 3 – HTH® pool Care Products to adjust levels as needed

• 4 – Add HTH® pool Shock Tablets
• 5 – HTH® Super Shock® Tablets

• 6 – Prevent algae

*Other HTH® products are not included in this kit. • HTH® balance and algae control products needed are not included in your pool kit. • HTH® balance and algae control products needed are not included in your pool kit.
pool start up and maintenance kit

For best results, follow our 6-step pool care program:

1. Test and Balance
   • Verify pH and total alkalinity levels as needed.
   • Use HTH Test Kit to check levels.

2. Sanitize
   • Includes HTH 3-in-1 Chlorinating Tablets.

3. Shock
   • Shock at least once a week.
   • Includes HTH Super Shock ‘N Swim.

4. Prevent Algae
   • Check pH and total alkalinity levels as needed.

5. Maintain
   • Use HTH Test Kit to check chlorine levels.
   • Use HTH Sanitizer to maintain levels.

6. Keep Pool Clean
   • Use HTH Skimmer Basket to catch debris.

**WHY YOU SHOULD USE THIS PRODUCT:**

It is a violation of Federal law to use this product in a manner inconsistent with its directions on this package.

**ENVIRONMENTAL HAZARD:**

Strong oxidizing agent. This product can increase fire intensity.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER. Corrosive. Causes irreversible eye damage and skin burns.

Probable mucosal damage may contraindicate the use of gastric lavage. Have the doctor. Do not give anything by mouth to an unconscious person.

IF INHALED:

• Remove exposed person to fresh air.

IF SWALLOWED:

• Do not induce vomiting unless told to do so by a poison control center or doctor for treatment advice.

IF SKIN OR EYES CONTACT:

• Wash with copious amounts of water before treatment or call a poison control center or doctor for treatment advice.

**ECOLOGICAL INFORMATION:**

This pesticide is toxic to fish and aquatic life.

**EMERGENCY HANDLING:**

1. Call a poison control center or doctor for treatment advice.

2. Remove any contaminated clothing before reuse.

3. Wash all exposed skin with soap and water.

4. Do not allow this product to contact any foreign matter, including soil.

**FIRST AID:**

1. IF IN EYES:
   • Rinse well with water for at least 15 minutes.

2. IF SKIN CONTACT:
   • Wash skin with soap and water before treatment or call a poison control center or doctor for treatment advice.

3. IF INHALED:
   • Remove exposed person to fresh air.

4. IF SWALLOWED:
   • Do not induce vomiting unless told to do so by a poison control center or doctor for treatment advice.

**HOW TO USE:**

Do not allow this product to contact other water treatment products, to cause fire, explosion, and the release of toxic gases.

- Store in a cool, dry, wellventilated area away from heat or open flame.
- Keep all foreign matter, including other water treatment products, to cause fire, explosion, and the release of toxic gases.
- Do not apply within 100 feet of a stream, lake, or pond.
- Do not apply this product in or near a drainage ditch or irrigation canal unless directed by a licensed applicator.
- Do not contaminate water, food, or feed by storage or disposal.
- If working in the area:
  - Cover open wounds and susceptible body areas.
  - Wash hands before eating, drinking, or smoking.
  - After handling this product:
    - Wash hands with soap and water before eating, drinking, or smoking.

**POTENTIAL HAZARDS:**

- Do not apply this product in or near a drainage ditch or irrigation canal unless directed by a licensed applicator.
- Do not contaminate water, food, or feed by storage or disposal.
- If working in the area:
  - Cover open wounds and susceptible body areas.
  - Wash hands before eating, drinking, or smoking.

**CONTAMINATION OR IMPROPER USE MAY CAUSE INTENSE FIRE, EXPLOSION, OR THE RELEASE OF TOXIC GASES.**

- Do not allow product to contact any foreign matter, including soil.
- Do not mix this product with a small amount of water. Only add directly to pool.
