PROXEL® BC INDUSTRIAL MICROBISTAT

FOR INDUSTRIAL USE ONLY AS A MICROBIOSTAT PRESERVATIVE FOR AQUEOUS FORMULATIONS SUCH AS LATICIES, EMULSION PAINTS AND STAINS, OIL-IN-WATER EMULSIONS, PAINTS, WATER-BASED ADHESIVES, CASEIN/ROsin DISPERSIONS, PESTICIDE FORMULATIONS, AQUEOUS SLURRIES, TITANIUM DIOXIDE SLURRIES, TAPE JOINT COMPOUNDS

ACTIVE INGREDIENTS:
1,2-benzisothiazolin-3-one………………5.0% 5-Chloro-2-methyl-4-isothiazolin-3-one…………0.8% 2-methyl-4-isothiazolin-3-one…………0.3% Inert Ingredients……………………………90.9%
Total……………………………………100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER

SEE FIRST AID & ADDITIONAL PRECAUTIONARY STATEMENTS ON SIDE PANEL

MANUFACTURED FOR:
1200 Bluegrass Lakes Parkway
Alpharetta, GA 30004

Formulated in the UK from components made in China.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, ponds, streams, brooks, ditches, oceans or other waters unless in areas of the United States where the requirements of a National Pollutant Discharge Elimination System permit the discharge. The pesticide has not been evaluated in any other bodies of water prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PROXEL® is a registered trademark of Arch UK Biocides, Ltd.

PRODUCT INFORMATION:

Enzymatic degradation, the extent to which microorganisms can gain access, the species involved, pH, temperature, and length of time for which protection is required. These include the susceptibility of the system to microbiological degradation, the extent to which microorganisms can gain access, the species involved, pH, temperature, and length of time for which protection is required.

PROXEL BC INDUSTRIAL MICROBISTAT do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Protect from frost. If frozen, allow to thaw and stir well before use. In case of a spill, create a dike or trench to contain materials. Absorb spill with inert material (e.g., dry sand, clay, earth or commercial absorbent), the place in a chemical waste container.

PESTICIDE DISPOSAL: The concentration required to give protection depends on several factors. These include the susceptibility of the system to microbiological degradation, the extent to which microorganisms can gain access, the species involved, pH, temperature, and length of time for which protection is required. For protection against bacterial and fungal attack, a concentration in the range of 0.02 – 0.5% Proxel BC Industrial Microbistat (0.25 – 5.0 pounds/1000 pounds) is almost invariably sufficient.
