PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing vapor or mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are barrier laminate and viton. If you want more options, follow the instructions for categories A or B on an EPA chemical-resistant category selection chart.

All mixers, loaders, applicators, and other handlers must wear Long-sleeve shirt and pants, overshoe coveralls, and gloves. Chemical-resistant gloves for all handlers except for applicators using motorized ground equipment.

Chemical-resistant apron for mixers/loaders, persons cleaning equipment, and person exposed to the concentrate and for handlers handling animal dip applications.

USER SAFETY REQUIREMENTS

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep wash and PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter to or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

Applying equipment over the water should not be used until wind or rainfall are negligible. Do not contaminate ground or surface water by washing equipment or37II Insecticide Concentrate must be diluted. To prepare the spray, dilute P-37II Insecticide Concentrate as shown in the following spray dilution chart:

** Contains petroleum distillates.
* cis/trans ratio: Max. 42% (±) cis and min. 58% (±) trans
Total 100%

DESTRUCTION OF EXCESS MATERIALS

Dispose of excess material per label instructions or at a local landfill or recycling center.

P-37II INSECTICIDE CONCENTRATE

For use as an insecticide for the treatment of preconstruction lumber and logs, and for use on building structures.

Active Ingredient

Permethrin* 36.8%
Other Ingredients** 33.2%
Total 100%

Preparation

* cis/trans ratio: Max. 42% (±) cis and min. 58% (±) trans
** Contains petroleum distillates.

Contains 3.2 pounds permethrin per gallon as an emulsifiable concentrate.

KEEP OUT OF REACH OF CHILDREN

CAUTION

1. For dip treatments, totally submerge the wood in the solution until thoroughly wet and then allow to dry in a suitable location. Agitate dipping solutions to which P-37II Insecticide Concentrate has been added before use if left unused for long periods of time. Periodically check for an accumulation of dirt and other debris from the tank, and for sedimentation, and debris or other deposits from the tank.

2. Do not mix P-37II Insecticide Concentrate with any other products or Insect Growth Regulators (IGRs). Do not tank mix with dichlorvos (DDVP) or other fumigant products.

3. Frequent monitoring of dip and pressure systems is necessary to insure that the desired level of P-37II Insecticide Concentrate is maintained. Wood can be handled after treatment when dry.

4. For dip treatments, totally submerge the wood in the solution until thoroughly wet and then allow to dry in a suitable location. Agitate dipping solutions to which P-37II Insecticide Concentrate has been added before use if left unused for long periods of time. Periodically check for an accumulation of dirt and other debris from the tank, and for sedimentation, and debris or other deposits from the tank.

5. Do not use or store near heat or open flame.
