Supplemental Label

For tank mixes with adjuvants or other products on leafy vegetables (except Brassica vegetables)

This supplemental label expires on December 31, 2012.

Active Ingredient:
pyraclostrobin (carbamic acid, [2-[[1-(4-chlorophenyl)-1H-pyrazol-3-yl]oxy)methyl]phenyl)methoxy-, methyl ester) .......................................................... 20.0%
Other Ingredients: ................................................................................................. 80.0%
Total: .................................................................................................................... 100.0%

EPA Reg. No. 7969-187

Directions For Use
Refer to the Cabrio main label, EPA Reg. No. 7969-187, for complete Directions For Use and all applicable restrictions and precautions. User must have the full Cabrio container label and this supplemental label for the intended use in possession at the time of pesticide application.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Crop-specific Requirements

Tank Mix Restrictions
The crop restrictions on this supplemental label regarding tank mixes and/or adjuvant combinations on leafy vegetables (except Brassica vegetables), including spinach, supersede those on the Cabrio container label.

Spinach (all varieties)
Cabrio has been reported to injure spinach under certain conditions. DO NOT apply Cabrio to spinach as a tank mix with any other pesticide products, adjuvants, additives, nutrients or anything other than water.

Leafy Vegetables (except Brassica vegetables and except spinach)
It is impossible for BASF to test all varieties of leafy vegetables (except Brassica vegetables) for sensitivity to Cabrio under all environments and all potential product mixture combinations. Local conditions can also influence crop tolerance and may not match those under which BASF has conducted testing. Proceed with caution with regard to Cabrio use, particularly in tank mixes and/or adjuvant combinations on leafy vegetables (except Brassica vegetables and except spinach). To reduce the risk of leafy vegetable (except Brassica vegetables) injury, BASF recommends testing Cabrio or Cabrio tank mixtures on a small portion of the crop before broadscale use.

To the extent consistent with applicable law, the user assumes all risks associated with adding products to the Cabrio spray solution. Refer also to the Conditions of Sale and Warranty section of this label.

No aerial application in New York State except as permitted under FIFRA Section 24(c), Special Local Need Registration.

Application Instructions
Refer to Table 2, Cabrio® EG fungicide Crop-specific Requirements in the Cabrio container label for applying Cabrio according to rate and timing instructions.
