Supplemental Label

For use in chickpea (garbanzo bean) and dry field pea

Active Ingredient:
saflufenacil: N’-[2-chloro-4-fluoro-5-[(3-methyl-2,6-dioxo-4-(trifluoromethyl)-3,6-dihydro-1(2H)-pyrimidinyl]benzoyl]-N-isopropyl-N-methylsulfamide ................................................................. 29.74% 
Other Ingredients: .............................................................................................................................................. 70.26% 
Total: ........................................................................................................................................................................ 100.00% 
Contains 2.85 pounds active ingredient saflufenacil per gallon formulated as a water-based suspension concentrate.

EPA Reg. No. 7969-278

Directions For Use

Refer to the Sharpen™ herbicide main label, EPA Reg. No. 7969-278, for complete Directions For Use and all applicable restrictions and precautions. When following the instructions on this supplemental label, the user must have this label and the entire Sharpen container label in possession at the time of pesticide application.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Use Information

Sharpen may be applied preplant surface or preemergence to chickpea or dry field pea for burndown broadleaf weed control prior to crop emergence (refer to Table 1 in the product container label for list of weeds controlled). An adjuvant system (refer to Additives section in the product container label for details) is required for optimum burndown activity.

Before applying Sharpen to chickpea or dry field pea, verify the selectivity of Sharpen on your variety with your seed company (supplier) to help avoid potential injury to sensitive varieties.

Use of Sharpen may result in delayed crop emergence and stunting under certain environmental conditions including cool temperatures, excessive rainfall/irrigation, and/or persistent wet soil conditions occurring after application.

Enhanced Burndown

Apply Sharpen preplant surface or preemergence at 2.0 fl ozs/A for enhanced burndown broadleaf weed control prior to crop emergence. Ensure that the seed row is closed. Soil conditions that cause poor seed furrow closure and coverage may result in delayed crop emergence or stunting. A sequential application of Sharpen may be made with a minimum of 30 days between applications.

Crop-specific Restrictions and Limitations

- DO NOT apply more than a maximum cumulative amount of 4.0 fl ozs/A of Sharpen (0.089 lb ai/A saflufenacil) per cropping season.
- DO NOT apply when chickpeas or dry field peas have reached the cracking stage or after emergence or severe crop injury will occur.
- DO NOT apply Sharpen if cold and/or wet conditions are present or predicted to occur within 1 week of application.
- Plant chickpeas and dry field peas at least 1/2 inch deep to reduce risk of crop injury from Sharpen application.

BASF Corporation
26 Davis Drive, Research Triangle Park, NC 27709
• **DO NOT** apply Sharpen™ herbicide with other products containing Group 14/Group E herbicides (such as sulfentrazone or flumioxazin) as a tank mix partner or sequential application within 30 days of planting because crop injury may result.

• Legume forage may be fed or grazed 65 or more days after application.

• Refer to Table 4 on the product container label for rotational crop intervals.

**Tank Mixtures**

Broad-spectrum burndown control of grasses and/or additional broadleaf weeds will usually require a tank mix with another herbicide. Sharpen may be tank mixed or applied sequentially with one or more of, but not limited to, the following herbicide products:

• Pursuit® herbicide
• glyphosate (e.g. Roundup® herbicide)
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND BASF'S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
