STERILECLEAN
SODIUM HYPOCHLORITE-12.5

ACTIVE INGREDIENT: SODIUM HYPOCHLORITE
OTHER INGREDIENTS: WATER

Keep Out of Reach of Children

DANGER
See Precautionary Statements

FIRST AID

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if available.

If Swallowed: Call a poison control center or doctor immediately for treatment advice.

If Skin or Clothing: Take off contaminated clothing and rinse skin with water.

If Inhaled: Move victim to fresh air.

Note: Goggles or face shield, long-sleeved shirt and long pants, waterproof gloves, and shoes plus apron or coveralls must be worn.

Physical or Chemical Hazards: Strong oxidizing agent.

Precautionary Statements

Hazards to Humans and Domestic Animals: Danger.

Causes immediate or irreversible eye damage. Serious eye irritation.

Keep out of the reach of children.

Inhalation Hazards: No significant hazards expected at normal use levels.

Environmental Hazards: This product contains chlorine gas which is an irritating and toxic gas and causes respiratory irritation.

Storage and Disposal: Store in a cool, dry area away from direct sunlight and heat sources. In case of spill, avoid contact with skin, eyes, and clothing.

Sanitation of Non-Porous Food Contact Surfaces

Rinse method: Lightly wet area with water and then apply the Sterileclean solution. Let sit for 2 minutes. Do not rinse. For food contact surfaces: After using the Sterileclean solution, wash and rinse thoroughly with clean water. Maintain contact with the sanitizer for at least 2 minutes. Do not rinse equipment with water after treatment. For non-food contact surfaces: Perform a sanitizing process if effluent contains less than 50 ppm Available Chlorine. Do not rinse equipment with water after treatment. Clean equipment in the normal manner. Prior to use, rewash equipment with soap and rinse thoroughly with clean water.

Sanitation of Non-Porous Non-Food Contact Surfaces

Rinse method: Clean and dry the area. Apply the Sterileclean solution to the area and allow to sit for 2 minutes. Do not rinse. Contact the backwash and drain valve and test with a chlorine test kit, either discard the solution or add sufficient product to re-establish a 200 ppm available chlorine solution to control bacteria, mold or fungi. Perform a sanitizing process if effluent contains less than 50 ppm Available Chlorine. Do not rinse equipment with water after treatment.

Sterileclean is toxic to fish and aquatic organisms. Do not discharge effluent containing Sterileclean into lakes, ponds, streams, estuaries, or other water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit. Sterileclean must be treated with an anti-oxidant to prevent browning. Sterileclean degrades with age. Use a chlorine test kit and increase dosage, as necessary, to maintain the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and number of swimmers. Every 7 days, or as necessary, prepare a sanitizing solution by thoroughly mixing 2 oz. of Sterileclean with 10 gallons of water to provide approximately 250 ppm available chlorine. An alternative solution is a 100 ppm available chlorine solution using the product in a ratio of 1 oz. to 100 gallons of water. Pump solution through the system until full boxes are delivered at all treatment stations. The system is completely filled with the sanitizing solution and can be removed from the system. Clean clean areas and check for spills and contact with all internal surfaces. Remove some cleaning solution from drain valves and use as a chlorine test. Rinse equipment surface to drain valve in 5-15 seconds.

Not only is Sterileclean highly effective against bacteria, mold, and fungi, it is also an ideal solution for sanitizing non-porous surfaces. Its unique formula ensures a clean and safe environment, making it an excellent choice for a variety of applications. Whether you need to sanitize a kitchen counter, a bathroom sink, or a piece of furniture, Sterileclean provides the power to get the job done right. Providing a powerful disinfecting effect, Sterileclean leaves surfaces sparkling clean and safe to touch. With its easy-to-use application and quick-drying formula, Sterileclean is the perfect solution for ensuring a sanitary and hygienic environment. Whether you’re looking to sanitize surfaces, sanitize food preparation areas, or simply add an extra layer of protection to your home or workplace, Sterileclean is the ideal choice. Its powerful formula and precise application make it easy to use and ideal for both residential and commercial applications. Sterileclean is a trusted choice for businesses and individuals alike, providing a safe and effective solution for all your sanitizing needs.
