**GERMICIDAL DISPOSABLE WIPE**

Bactericidal, Fungicidal, Tuberculocidal, and Virucidal** in 4 minutes

**SANI-CLOTH® BLEACH**

Reorder No. P54072

Kills pathogenic organisms including

- C. difficile Spores
- Clostridium difficile spores
- Multi-Drug Resistant Bacteria
  - Acinetobacter baumannii Multi-Drug Resistant
  - Enterobacter cloacae-NDM-1 positive
  - ESBL Resistant Escherichia coli
  - ESBL Resistant Klebsiella pneumoniae
  - ESBL Resistant Klebsiella pneumoniae - NDM-1 positive
  - Carbapenem Resistant
  - Klebsiella pneumoniae -NDM-1 positive [CDC 1000527]
  - Community Acquired Methicillin Resistant Staphylococcus aureus (CA-MRSA) NARSA NRS384
  - Genotype USA 300
  - Community Acquired Methicillin Resistant Staphylococcus aureus (CA-MRSA) NARSA NRS123
  - Genotype USA 400
  - Staphylococcus aureus Methicillin Resistant (MRSA)
  - Streptococcus pneumoniae – Penicillin Resistant
  - Vancomycin Intermediate Staphylococcus aureus (VISA)
  - Vancomycin Resistant Staphylococcus aureus (VRSA) NARSA VRS1
  - Vancomycin Resistant Enterococcus faecalis (VRE)
- Bacteria
  - Bordetella pertussis
  - Burkholderia cepacia
  - Campylobacter jejuni
  - Escherichia coli O157:H7
  - Escherichia coli
  - Klebsiella pneumoniae
  - Legionella pneumophila
  - Listeria monocytogenes
  - Pseudomonas aeruginosa
  - Salmonella enterica
  - Serratia marcescens
  - Staphylococcus aureus
  - Streptococcus pyogenes
- Viruses**
  - **Avian Influenza A H5N1 virus Strain VNH5N1-PR8/CDC-RG CDC #2006719965
  - *Cytomegalovirus (CMV)
  - **Herpes simplex virus type 2, Strain G
  - **Human Coronavirus, Strain 229E
  - **Influenza A virus /Hong Kong Strain
  - **Influenza B virus/Strain B/Hong Kong/5/72
  - **Influenza B virus/Strain B/Hong Kong/5/72
  - **Respiratory syncytial virus (RSV), Strain Long
  - **Adenovirus type 2, Adenoid 6 Strain
  - **Canine Parvovirus, Cornell Strain
  - **Hepatitis A virus (Human) (HAV) Strain HM-175
  - **Norovirus (Feline Calicivirus)
  - **Poliovirus type 1, Chat Strain
  - **Rhinovirus type 37, Strain 151-1
  - **Rotavirus Strain WA
  - **Salmonellae enterica
  - **Streptococcus pyogenes
  - **Streptococcus pneumoniae
  - **Hepatitis B virus (HBV) – Duck HBV† Strain 7/31/07
  - **Hepatitis C virus (Human) (HCV) - Bovine Diarrhea Virus† Strain Oregon C24-v-genotype 1
  - **HIV-1 (AIDS virus)† Strain HTLV-IIIB
- Pathogenic Fungi
  - Aspergillus brasiliensis
  - Candida albicans
  - Trichophyton mentagrophytes
- TB
  - Mycobacterium bovis - BCG (TB)

**ACTIVE INGREDIENT**

Sodium Hypochlorite ..................................................................................................................................... 0.63%

**OTHER INGREDIENTS** ................................................................................................................................... 99.37%

**TOTAL** ............................................................................................................................................................. 100.00%

Does not include the weight of the wipe

Approximately 6300 ppm available Sodium hypochlorite

Approximately 6000 ppm available chlorine

Premoistened wipe with a stabilized bleach solution (equivalent to a 1:10 dilution)

---

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION** 75 See back panel for additional precautionary statements

Net Contents 75 Extra Large Wipes 7.5 x 15.0 in (19.0 x 38.1 cm) Net Wt. 1.0 lb. 15.1 oz (883 g)
Areas of Use: Hospital and Healthcare Settings: Ambulances, Ambulatory Surgical Centers (ASC), Clinics, Dental Offices, Dialysis Clinics, Home Health Care, Hospitals, Laboratory, Long Term Care Centers, Nursing homes, Physical therapy, Physician’s offices, Radiology, and Transport vehicles. Hospital, Healthcare, and Critical Care Use Sites: May be used on hard non-porous surfaces of: blood glucose meters; blood pressure monitors; cabinets; carts; chairs; counters; dental chairs; exam tables; gurneys; isollettes; IV poles; laboratory equipment and surfaces; operating room tables and lights; physical therapy (PT) equipment surfaces; tables; and hard non-porous outside surfaces of: anesthesia machines and respiratory therapy equipment; apheresis machines, diagnostic equipment, dialysis machines; patient monitoring equipment, patient support and delivery equipment. Ultrasound transducers and probes. **This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body; or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.**

To Dispense Wipes: Remove lid and discard inner seal from container. Find center of wipe roll, remove first wipe for use, twist corner of wipe out at an angle. When not in use keep center cap of lid closed to prevent moisture loss.

**DIRECTIONS FOR USE** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

TO CLEAN, DISINFECT AND DEODORIZ: Use a wipe to remove heavy soil. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for a full four (4) minutes. Use additional wipe(s) if needed to assure continuous 4 minute wet contact time. For food contact surfaces, rinse with potable water before use. These directions also apply to Mycobacterium bovis BCG (Tuberculosis) at 68°F (20°C). Ultrasound transducers and probes: For use on external surfaces of ultrasound transducers and probes only. To disinfect: Pre-clean gel from external surface of ultrasound transducer or probe to be disinfected by using a clean washcloth. Then thoroughly wet the probe with a wipe. Treated surface must remain visibly wet for a full four (4) minutes. Use additional wipe(s) if needed to assure continuous four (4) minute wet contact time. Let air dry.

**Special Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores.** Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks and eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with Safri Cloth Bleach Germicidal Disposable Wipe. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths. **Infectious Materials Disposal:** Materials used in the cleaning process that may contain feces/waste are to be disposed of immediately in accordance to local regulations for infectious materials disposal. **Kills Clostridium difficile spores:** Disinfect as directed on this label.

**KILLS HIV-1 (AIDS VIRUS), HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS AND PRE-CLEANED EXTERNAL SURFACES OF ULTRASOUND TRANSDUCERS AND PROBES PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in one (1) minute at room temperature (68°-77°F) or (20°-25°C) in healthcare or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled will be in contact with water. This time is not sufficient for all organisms listed on this label. Therefore a four (4) minute wet contact time must be used for TB and pathogenic fungi.

**Special Instructions for Cleaning and Decontamination against HIV-1, Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV) of Surfaces/Objects Soiled with Blood/Body Fluids.** Personal protection: When using this product, wear disposable protective gloves, protective gowns, face masks, and eye coverings as appropriate when handling HIV-1 (AIDS Virus), HBV or HCV infected blood or body fluids. **Cleaning Procedure:** All blood and other body fluids must be thoroughly cleaned from surfaces/objects before disinfection by the germicidal wipe. Open, unfold and use first germicidal wipe to remove heavy soil. Use second germicidal wipe to thoroughly wet surface. Allow to remain wet one (1) minute, let air dry. Although efficacy at a one (1) minute contact time has been shown to be adequate against HIV-1/HBV/HCV, this time is not sufficient for all organisms listed on this label. Therefore a four (4) minute wet contact time must be used for TB and pathogenic fungi.

**Disposal of Infectious Materials:** Dispose of used wipe in accordance with local regulations for infectious waste disposal. Contact time: Use second germicidal wipe to thoroughly wet surface. Allow to remain wet one (1) minute, let air dry. Although efficacy at a one (1) minute contact time has been shown to be adequate against HIV-1/HBV/HCV, this time is not sufficient for all organisms listed on this label. Therefore a four (4) minute wet contact time must be used for TB and pathogenic fungi.

Precautionary Statements Hazards to Humans and Domestic Animals CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. **First Aid** Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.

**Physical or chemical hazard** This product contains bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases.

**STORAGE AND DISPOSAL** Do not contaminate water, food, or feed by storage and disposal. **Storage:** Do not store near heat or open flame. When not in use keep center cap of lid closed to prevent moisture loss. **Towelette Disposal:** Do not reuse towelette. Dispose of used towelette in trash. Do not flush in toilet. **Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Triple rinse and offer for recycling. If recycling is not available, put in trash collection.

EPA Reg. No.: 9480-8, EPA Est. No. A=9480-NY-1, B=72956-WI-1, C=8251-WI-4, D=8251-WI-5, E=8251-OH-1, F=72956-AR-1 Alpha character will precede batch code on product

Manufactured by: Professional Disposables International, Inc.
Two Nice-Pak Park, Orangeburg, NY 10962-1376 1-800-999-6423 • Made in USA
Kills pathogenic organisms including:

- **C. difficile Spores**
  - *Clostridium difficile* spores

Areas of Use: Hospital and Healthcare Settings: Ambulances, Ambulatory Surgical Centers (ASC), Clinics, Dental Offices, Dialysis Clinics, Home Health Care, Hospitals, Laboratory, Long Term Care Centers, Nursing homes, Physical therapy, Physician’s offices, Radiology, and Transport vehicles. Hospital, Healthcare, and Critical Care Use Sites: May be used on hard non-porous surfaces of: blood glucose meters; blood pressure monitors; cabinets; carts; chairs; counters; dental chairs; exam tables; gurneys; isolettes; IV poles; laboratory equipment and surfaces; operating room tables and lights; physical therapy (PT) equipment surfaces; tables; and hard non-porous outside surfaces of: anesthesia machines and respiratory therapy equipment; aphaeresis machines, diagnostic equipment, dialysis machines; patient monitoring equipment; patient support and delivery equipment. Ultrasound transducers and probes.†††This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

To CLEAN, DISINFECT AND DEODORIZE

To CLEAN: Use a wipe to remove heavy soil. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for a full four (4) minutes. Use additional wipe(s) if needed to assure continuous four (4) minute wet contact time. Let air dry.

To DISINFECT: For use on hard non-porous surfaces of: blood glucose meters; blood pressure monitors; cabinets; carts; chairs; counters; dental chairs; exam tables; gurneys; isollettes; IV poles; laboratory equipment and surfaces; operating room tables and lights; physical therapy (PT) equipment surfaces; tables; and hard non-porous outside surfaces of: anesthesia machines and respiratory therapy equipment; aphaeresis machines, diagnostic equipment, dialysis machines; patient monitoring equipment; patient support and delivery equipment. Ultrasound transducers and probes. For use on external surfaces of ultrasound transducers and probes only. To disinfect: Pre-clean gel from external surface of ultrasound transducer or probe to be disinfected by using a clean washcloth. Then thoroughly wet the probe with a wipe. Treated surface must remain visibly wet for a full four (4) minutes. Use additional wipe(s) if needed to assure continuous four (4) minute wet contact time. Let air dry.

Special Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores. Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks and eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with Sani Cloth Bleach Germicidal Disposable Wipe. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/waste are to be disposed of immediately in accordance to local regulations for infectious materials disposal. Killing Clostridium difficile spores: Disinfect as directed on this label ‘KILLS HIV-1 (AIDS VIRUS), HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS AND PRE-CLEANED EXTERNAL SURFACES OF ULTRASOUND TRANSDUCERS AND PROBES PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in one (1) minute at room temperature (68°F - 77°F) or (20°-25°C) in healthcare or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluid can be associated with the potential for transmission of Human Immunodeficiency Virus type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV). SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS. Personal protection: When using this product, wear disposable protective gloves, protective gowns, face masks, and eye coverings as appropriate when handling HIV-1 (AIDS Virus), HBV or HCV infected blood or body fluids. Cleaning procedure: All blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection by the germicidal wipe. Open, unfold and use first germicidal wipe to remove heavy soil.

Disposal of infectious materials: Dispose of used wipe in accordance with local regulations for infectious waste disposal. Contact time: Use second germicidal wipe to thoroughly wet surface. Allow to remain wet one (1) minute, let air dry. Although efficacy at a one (1) minute contact time has been shown to be adequate against HIV-1/HBV/HCV, this time is not sufficient for all organisms listed on this label. Therefore a four (4) minute wet contact time must be used for TB and pathogenic fungi.

Precautionary Statements Hazards to Humans and Domestic Animals CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. First Aid Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Physical or chemical hazard This product contains bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases. STORAGE AND DISPOSAL Do not contaminate water, food, or feed by storage and disposal. Storage: Do not store near heat or open flame. When not in use keep center cap of lid closed to prevent moisture loss. Towelette Disposal: Do not reuse towelette. Dispose of used towelette in trash. Do not flush in toilet. Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse and offer for recycling. If recycling is not available, put in trash collection. EPA Reg. Special Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores. Personal Protection: Wear appropriate barrier protection including gloves, gowns, masks and eye protection.

Cleaning Procedure: All objects and surfaces must be thoroughly cleaned from surfaces/offices that are contaminated by patient contact using hospital-grade disinfectant and a wiping or scrubbing motion. The wipe should remain wet for at least 4 minutes. A final wipe may be performed if needed to assure continuous 4 minute contact time. Let air dry.

Areas of Use: Hospital and Healthcare Settings: Ambulances, Ambulatory Surgical Centers (ASC), Clinics, Dental Offices, Dialysis Clinics, Home Health Care, Hospitals, Laboratory, Long Term Care Centers, Nursing homes, Physical therapy, Physician’s offices, Radiology, and Transport vehicles.

Hospital, Healthcare, and Critical Care Use Sites: Areas of Use: Hospital and Healthcare Settings: Ambulances, Ambulatory Surgical Centers (ASC), Clinics, Dental Offices, Dialysis Clinics, Home Health Care, Hospitals, Laboratory, Long Term Care Centers, Nursing homes, Physical therapy, Physician’s offices, Radiology, and Transport vehicles.

SCIENTIFIC EVALUATION:

The SANI-CLOTH BLEACH germicidal disposable wipe is a bleach-based, alcohol-free, disposable wipe with a stabilized bleach solution. The SANI-CLOTH BLEACH germicidal disposable wipe is used for the rapid inactivation of selected microorganisms on hard surfaces and objects in hospital and healthcare settings. It is not intended for use on skin.

The SANI-CLOTH BLEACH germicidal disposable wipe contains 40% (4000 ppm) available chlorine. It is a bleach-based product that contains a stabilized bleach solution. The SANI-CLOTH BLEACH germicidal disposable wipe is efficacious against the following microorganisms:

- **Bacteria**
  - Staphylococcus aureus
  - Staphylococcus epidermidis
  - Clostridium difficile
  - Bacillus cereus
  - Bacillus anthracis
  - Mycobacterium tuberculosis
  - Legionella pneumophila
  - Pseudomonas aeruginosa
  - Enterococcus faecalis
  - Enterococcus faecium
  - Enterobacter cloacae
  - Klebsiella pneumoniae
  - Enterobacter spp.
  - Citrobacter freundii
  - Serratia marcescens
  - Acinetobacter baumannii
  - Carbapenemase-producing Acinetobacter species
  - Morganella morganii
  - Proteus mirabilis
  - Salmonella spp.
  - Shigella spp.
  - Pseudomonas aeruginosa
  - Serratia marcescens
  - Escherichia coli
  - Shigella spp.
  - Enterobacter spp.
  - Klebsiella pneumoniae
  - Citrobacter freundii
  - Proteus mirabilis
  - Enterobacter spp.
  - Acinetobacter baumannii
  - Serratia marcescens
  - Escherichia coli
  - Pseudomonas aeruginosa
  - Serratia marcescens
  - Staphylococcus aureus
  - Staphylococcus epidermidis
  - Clostridium difficile
  - Bacillus cereus
  - Bacillus anthracis
  - Mycobacterium tuberculosis
  - Legionella pneumophila
  - Pseudomonas aeruginosa

PRODUCT INFORMATION

SAFE HANDLING INSTRUCTIONS

CAUTION: See back panel for additional precautionary statements

KILLS HIV-1 (AIDS VIRUS), HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS AND PRE-CLEANED EXTERNAL SURFACES OF ULTRASOUND TRANSDUCERS AND PROBES PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in one (1) minute at room temperature (68°-77°F) or (20°-25°C) in healthcare or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluid can be associated with the potential for transmission of Human Immunodeficiency Virus type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).

Areas of Use: Hospital and Healthcare Settings: Ambulances, Emergency Rooms, Operating Rooms, Operating Rooms, Hospital, Medical, and Critical Care Use Sites. May be used on hard non-porous surfaces of: blood glucose meters; blood pressure monitors; cabinets; carts; chairs; counters; dental chairs; exam tables; gurneys; infant warmers; isolators; IV poles; laboratory equipment and surfaces; operating room tables and lights; physical therapy (PT) equipment, surfaces, tables; and hard non-porous outside of surfaces of: anesthesia machines; abdominal scanning equipment; diagnostic equipment; dialysis machines; patient monitoring equipment, patient support and delivery equipment, and ultrasound transducer and probes. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Personal protection: Wear appropriate barrier protection such as gloves, gowns, masks and eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with Sani-Cloth Bleach Germicidal Disposable Wipe. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces in patient rooms to be cleaned in an appropriate manner, such as from right to left or right to left on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the soils. Restrooms are to be cleaned last. Do not reuse soaked cloths. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/waste are to be disposed of immediately in accordance to local regulations for infectious materials disposal.

Disinfect as directed on this label.

Special instructions for Cleaning and Decontamination Against HIV-1, Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV) of Surfaces/Objectsof Blood/Body Fluids Soiled with Feces/Waste.

SANI-CLOTH® BLEACH
GERMICIDAL DISPOSABLE WIPE / TOALLITA GERMICIDA DESECHABLE

Bactericidal, Fungicidal, Tuberculocidal, and Virucidal** in 4 minutes / Bactericida, Fungicida, Tuberculocida y Antivírico** en 4 minutos

**Hepatitis C virus (Human) (HCV) - Bovine Diarrhea Virus† Strain Oregon C24v-genotype 1
**Hepatitis B virus (HBV) - Duck HBV† Strain 7/31/07
**Avian Influenza A H5N1 virus Strain VNH5N1-PR8/CDC-RG CDC #2006719965
**Influenza B virus /Strain B/Hong Kong/5/72
**Rhinovirus type 37, Strain 151-1
**Rotavirus Strain WA
**Rhinovirus type 31, Strain 151-1
**Hepatitis A virus (Human) (HAV) Strain HM-175
**Influenza A virus /Hong Kong Strain
**Vaccinia virus
**Feline Calicivirus
**Cytomegalovirus (CMV)
**HIV-1 (AIDS virus)† Strain HTLV-IIIB

Kills pathogenic organisms including / Elimina los organismos patogénicos incluyendo
- C. difficile Spores / Esporas de Clostridium difficile
- Multi-Drug Resistant Bacteria / Bacteria Resistente a Drogas Múltiples
- Bloodborne Pathogens / Patógenos de Transmisión Sanguínea
- Pathogenic Fungi / Hongos Patogénicos
- TB / TB

ACTIVE INGREDIENT / INGREDIENTE ACTIVO:
Sodium Hypochlorite.............................................................0.63%
OTHER INGREDIENTS /OTROS INGREDIENTES:..............99.37%
TOTAL / TOTAL .................................................................100.00%

Does not include the weight of the wipe
Approximately 6300 ppm available Sodium hypochlorite
Approximately 6000 ppm available chlorine
Premoistened wipe with a stabilized bleach solution
(equiv alent to a 1:10 dilution)

KEEP OUT OF REACH OF CHILDREN
MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS

Net Contents / Contenido Neto
130 Extra Large Wipes / Toallillas Extra Grandes
7.5 x 15.0 in (19.0 x 38.1 cm) / 7.5 x 15.0 cm (19.0 x 38.1 cm)
Net WL 4.0 lb 2.0 oz (1.9 kg) / Peso Neto 4.0 lb 2.0 oz (1.9 kg)

Precaución: No incluye el peso de la toallita
Aproximadamente 6300 ppm de hipoclorito de sodio disponible
Aproximadamente 6000 ppm de cloro disponible
Toallita previamente humedecida con una solución de cloro

Desinfecta en Disinfects in
Four Minutes Cuatro Minutos
May contain feces/waste are to be disposed of immediately in accordance to local regulations for infectious materials disposal.

Infectious Materials Disposal:
Materials used in the cleaning process that may contain Clostridium difficile spores. Personal Protection:
Cleaning Procedure:

First Aid:
Do not contaminate water, food, or feed by
Procedures:

Clean wipe with a wipe. Treated surface must remain visibly wet for a full four (4) minutes. For food contact surfaces, rinse with potable water before use. These directions also apply to

Precautionary Statements

Storage:
The product contains bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases. 

Leaves a trail of white residue. Use water to remove residue. 

Significant Product Information

Dispose of used wipe in accordance with local regulations for infectious waste disposal.
