spots when infestations are heavy and/or when roaches are living primarily in walls voids or most roach infestations, apply 10 to 20 spots per 100 square feet. Use the higher number of bait may also be applied in tamper-resistant bait stations. Apply about 1 gram (3/8” size Roaches: Apply bait in small spots about ¼” (pea-sized) in diameter (about 0.5g). For spots) in each station. Place 1-3 stations per 100 square feet in out of the way places where roaches may hide.

appliances such as stoves, sinks, dishwashers, refrigerators, ice machines and walk-in coolers, of food prep surfaces. Do not apply bait in areas where there is a risk of electrical shock.

tubs, toilets, drain openings, hollow table legs, areas where pipes come through walls, cracks not apply bait to areas that are washed down frequently, such as in cracks around the edges of furniture and fixtures and under or behind appliances. If bait contacts exposed surfaces, remove bait and wash exposed surfaces. Do not contaminate food or feed. Do not apply bait to areas that are washed down frequently, such as in cracks around the edges of food prep surfaces. Do not apply bait in areas where there is a risk of electrical shock. Do not apply bait on hot surfaces or other areas where the temperature may exceed 130°F at the bait could melt and drip.

Roaches: Apply bait in small spots about ¼” (pea-sized) in diameter about 0.5g. For most roach infestations, apply 10 to 20 spots per 100 square feet. Use the higher number of spots when infestations are heavy and/or when roaches are living primarily in walls voids or other inaccessible areas. Smaller more frequent spots are better than occasional large spots. Bait may also be applied in tamper-resistant bait stations. Apply about 1 gram (3/8” size spots) in each station. Place 1-3 stations per 100 square feet in out of the way places where roaches may hide.

Look for areas where roaches may hide or enter buildings. Some of these areas include areas where baseboards are placed away from walls, cracks in and around equipment and appliances such as stoves, sinks, dishwashers, refrigerators and wall ice-cream machines and wall microwave ovens, dashers, drain openings, hollow table legs, areas where pipes come through walls, cracks between different construction elements, around electrical boxes, cracks around hinges, where cabinets meet walls and cracks leading into wood, ceiling or floor voids. For particular attention to cracks which lead into void areas, even small ones. Inspect bait every 2-4 weeks and supply when bait is almost entirely consumed.

Kills Roaches • Kills Silverfish • Kills Common Ants and Results will be best if spilled food and other debris are cleaned up before applying bait. Apply bait in small spots about ¼” (pea-sized) in diameter about 0.5g. For most roach infestations, apply 10 to 20 spots per 100 square feet. Use the higher number of spots when infestations are heavy and/or when roaches are living primarily in walls voids or other inaccessible areas. Smaller more frequent spots are better than occasional large spots. Bait may also be applied in tamper-resistant bait stations. Inspect bait every 2-4 weeks and supply when bait is almost entirely consumed.
