PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed or absorbed through the skin. Harmful if inhaled. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Do not get in eyes, on skin, or on clothing. Do not breathe vapor. Wear goggles or face shield, protective clothing or rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, smoking tobacco, or using the toilet. Remove and wash contaminated clothing.
PERSONAL PROTECTIVE EQUIPMENT (PPE): Mixers, loaders, and others exposed to this product must wear long-sleeve shirt and long pants or coveralls over long-sleeved shirt and long pants, socks and chemical resistant footwear, goggles or face shield, chemical resistant gloves such as butyl rubber, a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides, and a chemical resistant apron. Follow manufacturer’s instructions for cleaning/maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.
USER SAFETY REQUIREMENTS:
Users must wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate.

FIRST AID:
If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.
If in Eyes: Hold eye(s) open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for treatment advice.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth if possible. Call a Poison Control Center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. In case of emergency call: 1-800-654-6911. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic plants, fish and aquatic invertebrates. Do not apply directly to water or wetlands. Do not contaminate water when disposing of equipment washwaters or rinseate. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Observe the most restrictive of the labeling limitations and precautions of all products used in mixtures.

PHYSICAL AND CHEMICAL HAZARDS:
This product is corrosive to mild steel.

For questions or concerns about this product please call: 1-800-654-6911.

PROXEL® CMC PRESERVATIVE

Active Ingredients:
5-Chloro-2-methyl-4-isothiazolin-3-one 1.11%
2-methyl-4-isothiazolin-3-one 0.39%
Other ingredients 98.5%
Total 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER
(SEE SIDE PANELS FOR ADDITIONAL PRECAUTIONARY STATEMENTS)

MANUFACTURED FOR:

Arch Chemicals, Inc.
5660 New Northside Drive, Suite 1100
Atlanta, GA 30328
Made in USA

Proxel® is a registered trademark of Arch UK Biocides Ltd.

EPA Reg. No. 1258-1339
EPA Est. No. 1258-CHN-001

Net Wt. 25 lbs.
STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not store or transport in unlined metal containers. Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container. Do not apply this product in a way that will contact workers or other persons.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL / HANDLING: Nonrefillable container. Do not refill or reuse container. Triple rinse as follows: Fill container 1/4 full with water. Tip container on its side and roll it back and forth, ensuring at least one complete revolution for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Follow Pesticide Disposal instructions for rinsate disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Industrial Use Only for protection of paint films, coatings, adhesives, dispersed pigments, sealants, mastics, caulks, applied film/wet state of adhesives, tackifiers, paints, coatings and other building materials, metalworking fluids, metal cleaning fluids, hydraulic fluids, oil field injection waters, paper slime control, recirculating water cooling towers, air washer systems, recirculating closed loop water cooling systems, brewery pasteurizer and can warmer systems, fuel preservative, printing fluids, chemicals used in Textile Production, Liquid Soaps, Cleaners, Detergents, Carpet Shampoos for Industrial and Household Uses and in Polishes and Waxes, Wet Wipes and Pre-moistened Mops and Sponges.

Preservative for Paints and Coatings: This product is an in-container preservative for the control of bacteria and fungi in water based coatings such as paper and wood coatings and paints used for architectural product finishes and special purpose coatings. Add 0.43 to 1.65 lb. of this product (6.5 to 25 ppm active ingredient) to each 1000 lb. of preserved product.

Preservation of Polymer Latexes: This product is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including acrylic, styrene/butadiene, carboxylated styrene/butadiene, ethylene/vinyl acetate, and biopolymers intended for industrial use, such as a xanthum gum, gum Arabic, guar gum, protein-derived starches, and casein derived polymers. Add 0.43 to 3.3 lb. of this product (6.5 to 50 ppm active ingredient) to each 1000 lb. of preserved product.

Preservative for Adhesives and Tackifiers: This product is an in-container preservative for the control of bacteria and fungi in water soluble and water-dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene butadiene and acrylic latices. This product is a preservative for tackifiers derived from resin and hydrocarbon resins. Add 0.43 to 1.65 lb. of this product (8.5 to 25 ppm active ingredient) to each 1000 lb. of preserved product.

Preservative for Building Materials: This product is an in-container preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, spackling, glazing compounds, wood fillers, and grouting. Add 0.43 to 1.65 lb. of this product (6.5 to 25 ppm active ingredient) to each 1000 lb. of preserved product.

Preservative for Dispersed Pigments: To control bacteria and fungi in the manufacture and storage of dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate and kieselguhr used in paint and paper production. Add 0.43 to 1.65 lb. of this product (6.5 to 25 ppm active ingredient) to each 1000 lb. of preserved product.

Photoplate processing, Fountain Solutions, and Ink/Ink Components: This product is for the control of bacteria, fungi, and microbial biofilms in photoplate processing chemicals, fountain solutions, and printing inks and ink components. Add this product to achieve 0.1% to 0.3% (15 to 45 ppm active ingredient). Add this product to fountain solution concentrates at a level to ensure that the final use-dilution of the product will contain 0.1 - 0.3% of this product (15 - 45 ppm active ingredient). To insure uniform mixing, add this product to latex or solution slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.

Papermills: For the control of microbial biofilms, bacteria, algae and fungi, add this product to the Beater, Hydropulpier, or Fan or Broke Storage Pumps or some other point in the system to ensure uniform mixing. Apply 0.44 to 1.5 lb (7 - 23 fluid ounce) of this product per ton (dry basis) of pulp or paper produced as a slug dose for the control of bacterial and fungal slime in the production of paper. If needed, repeat daily. Clean with badly fouled systems before initial treatment.
STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Do not store or transport in unlined metal containers. Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container. Do not apply the product in a way that will contact workers or other persons. PESTICIDE DISPOSAL: Pesticide wastes are hazardous. Improper disposal of excess pesticide, spray mixture, or insecticide is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL / HANDLING: Nonrefillable container. Do not refill or reseal container. Triple rinse as follows: Fill container 1/4 full with water. Tip container on its side and roll it back and forth, ensuring that liquid completely drains into the sprayer for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its side and tip it back and forth several times. Follow Pesticide Disposal Instructions for insecticide disposal. Repeat the procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For industrial Use Only for protection of pre-tint films, coatings, adhesives, dispersed pigments, sealants, mastics, cauls, applied (in air) state of adhesives, taffizers, paints, coatings and other building materials, metalworking fluids, metal cleaning fluids, hydraulic fluids, oil field injection waters, paper allow control, recirculating water cooling towers, air washer systems, recirculating closed loop water cooling systems, brewery patternizer and can washer systems, fuel preservative, painting fluids, chemicals used in Textile Production, Liquid Soaps, Cleaners, Detergents, Shampoo, Industrial and Household Uses and in Polishes and Waxes, Wet Wipes and Pre-Moistened Wipes and Sponges. Preservation for Paints and Coatings: This product is an in-container preservative for the control of bacteria and fungi in water-based coatings such as: paper and wood coatings and paints used for architectural coating finishes and special purpose coatings. Add 0.45 to 1.65 lb. of this product (5 to 25 ppm active ingredient) to each 1000 lb. of preserved product. Preservation of Polymer Latexes: This product is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer emulsion, including acrylic, styrene-butadiene, carboxylated styrene butadiene, ethylene-vinyl acetate, and homo polymers intended for industrial use, such as a xanthan gum, gum Arabic, guar gum, protein-derived, starches, and casein derived polymers. Add 0.45 to 3.3 lb. of this product (5 to 50 ppm active ingredient) to each 1000 lb. of preserved product. Preservation for Adhesive and Tackifiers: This product is an in-container preservative for the control of bacteria and fungi in water soluble and water-dispersed adhesives such as animal glues, vegetable glues, natural rubber latex, polyvinyl chloride, styrene-butadiene and acrylic lacquers. This product works as a preservative for the bacteria derived from resin and hydrocarbon resins. Add 0.45 to 1.65 lb. of this product (5 to 25 ppm active ingredient) to each 1000 lb. of preserved product. Preservation for Building Materials: This product is an in-container preservative for the control of bacteria and fungi in building materials such as mastics, cauls, joint cements, sealing, gasket compounds, wood fillers, and grouting. Add 0.45 to 1.65 lb. of this product (5 to 25 ppm active ingredient) to each 1000 lb. of preserved product. Preservation for Dispersed Pigments: To control bacteria and fungi in the manufacture and storage of dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, magnesium silicate and kaolin clay used in paint and paper production. Add 0.43 to 1.65 lb. of this product (5 to 25 ppm active ingredient) to each 1000 lb. of preserved product. Photolysis processing, Fountain Solutions, and offset Components: This product is for the control of bacteria, fungi, and microbial biofilms in photolysis processing chemicals, fountain solutions, and printing inks and ink components. This product is active over 0.1% to 0.3% (15 to 45 ppm active ingredient). Add 0.43 to 1.65 lb. of this product (5 to 25 ppm active ingredient) to each 1000 lb. of preserved product. To insure uniform mixing, add this product to latex or solution slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.

Papernite: For the control of microbial biofilms, bacteria, algae and fungi, add this product to the Beaver, Hydromatic, or Far or Breake Storage Pumps or some other pump in the system to ensure uniform mixing. Apply 0.44 to 1.5 lb. of this product per ton (dry basis) of pulp or paper produced as a slug dose for the control of bacterial and fungal slime in the production of paper. If needed, repeat daily. Clean with heavily soaped systems before initial treatment.
