ALGAECURE™ Algaecide for Ponds and Fountains - Stops Algae Growth

DIRECTIONS: It is a violation of federal law to use this product in a manner inconsistent with its labeling. For use in self-contained ornamental ponds and fountains without any overflow. For small ponds with heavy algae growth, clean the algae off the sides and ornaments before adding Becket® Water Garden System Algaecure™ Algaecide for Fountains. This will reduce the amount of decaying organic matter. Fountains, Small Ponds with goldfish and koi - Treat only those fountains and ponds which will have no overflow after treatment. High water temperatures cause more rapid natural decay of dead algae which can cause fish distress. If animals are present clean out excess algae as tolerated above or use before temperature exceeds 70°F (21°C).

CAUTION: In ponds insure that water is well aerated via waterfall, fountain or other method to prevent fish loss. Herons must be continued. Caution: Not safe for use with snails, clams, mussels and other crustaceans, or mussels. Repeat dosage once per week for maintenance. To figure capacity of fountain or pond: Length x Width x Depth = cubic ft. x 7.5 = gallons.

Use to treat existing algae growth:

Volume of water to treat: Unit of Measure
10 gallons / 37.85 liters 6 drops
50 gallons / 189.4 liters 60 drops
120 gallons / 454.2 liters 1 cap
240 gallons / 908.5 liters 2 caps
