Storage and disposal

Do not contaminate waste with food or feed of animals.

STORAGE

Place in the original package and keep in a cool, dry place. Securely store in a house or barn. Keep away from food and drink.

DIRECTIONS FOR USE

RESTRICTED USE PESTICIDE

This product is for use by certified applicators only. The complete label or applicator’s manual is required to be available in each application unit at all times. This product is classified as a Restricted Use Pesticide. To the extent consistent with applicable law, in no case shall the Manufacturer or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product.

TO THE END USER: THE COMPLETE LABEL FOR THIS PRODUCT CONSISTS OF THE CONTAINER LABEL AND THE APPLICATOR’S MANUAL WHICH MUST ACCOMPANY THE PRODUCT. THEREFORE EVERY USE OF THIS PRODUCT MUST BE MADE IN ACCORDANCE WITH THE DIRECTIONS SET FORTH ON THIS CONTAINER LABEL AND APPLICATOR’S MANUAL.

To the extent consistent with applicable law, in no case shall the Manufacturer or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product.

FOR BURROWING RODENT APPLICATIONS: THE USE OF THIS PRODUCT IS STRICTLY PROHIBITED WITHIN 100 FEET OF ANY BUILDING WHERE HUMANS AND/OR DOMESTIC ANIMALS DO OR MAY ENTER.

Other Inactive Ingredients

OTHER INGREDIENTS:

OTHER INGREDIENTS:

Aluminum Phosphide Fumigant Pellets

A fumigant for use against insects, birds, Stink, cockroaches, and Centipedes, by Fumigating With Aluminum Phosphide, the complete label, or Applicator’s Manual, must accompany the product. Therefore, every use of this product must be in accordance with the directions set forth on this container label and Applicator’s Manual.

First Aid

Symptoms of exposure to this product are headache, diziness, nausea, difficult breathing, vomiting, and diarrhea. If you experience any of these symptoms, seek immediate medical attention.

Physicians

If ingestion occurs, call a poison control center or doctor immediately for treatment advice. If nausea occurs, vomiting may result. If vomiting occurs, do not induce vomiting. If any amount of this product is swallowed, do not induce vomiting. Call a poison control center or doctor immediately for treatment advice. The use of an emetic is not recommended.

Storage

This product is very highly toxic to wildlife. Non-target organisms exposed to phosphine gas will be killed. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate surface waters with this material.

Drinking Water

The garlic odor is due to a contaminant. Since the odor of phosphine may not be detected under some circumstances, the absence of a garlic odor does not mean that dangerous levels of phosphine gas are present. Protective equipment is still required when handling aluminum phosphide due to the extremely acute inhalation toxicity of phosphine gas. Always use respiratory protection approved for use against phosphine gas.

PHYSICAL AND CHEMICAL HAZARDS

The liquid is toxic to humans and animals. The inhalation of phosphine gas can cause death in humans and animals. The liquid is toxic to wildlife.

Environmental Hazards

This product enters the environment at low levels. Non-target organisms exposed to phosphine gas may be killed. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate surface waters with this material.
