“clean” point, elastic, cohesive (such as nanos) on other oleo-ribosan-sensitive materials.

To disinfect hard, non-porous surfaces: Precise surfaces as directed above. Hold container about 6 in. from surface. Spray to thoroughly wet hard, non-porous surfaces. Textured surfaces may require up to 20 minutes. Allow to air-dry. Non-porous surfaces, such as countertops, may be disinfected with a damp cloth. Do not use on absorbent, leather, or porous surfaces. Subsequent use in high-traffic areas may be disinfected at repeat intervals. All surfaces should be thoroughly wet before applying. This product is designed for use on hard, non-porous surfaces. Do not use on uncoated surfaces, water-based substrates, or any other oleo-ribosan-sensitive materials.

To disinfect paper, paper products, or hard porous surfaces: Apply 2 in. from surface. Spray to thoroughly wet hard, non-porous surfaces. Textured surfaces may require up to 20 minutes. Allow to air-dry. Non-porous surfaces, such as countertops, may be disinfected with a damp cloth. Do not use on absorbent or porous surfaces.
