**Directions for Use**

**FIPROGUARD®**

**FREQUENCY OF APPLICATION:**

Use this product monthly for complete control of flea, tick and chewing lice infestations. Studies show that SENTRY FIPROGUARD MAX for dogs is effective against adult fleas, brown dog ticks, American dog ticks, lone star ticks, and deer ticks for up to 30 days.

Prevents and controls reinfestation of listed pests for 30 days.

Kills newly emerged adult fleas before they lay eggs.

Kills brown dog ticks, American dog ticks, lone star ticks, and deer ticks for up to 30 days.

Remains effective, even after bathing, water immersion, or exposure to sunlight.

For external use on dogs only. Individual sensitivities, while rare, may occur after using any pesticide product on dogs. Certain medications can interact with pesticides. Do not treat your dog with more than one topical flea and tick control product at a time. Do not treat with more than 20% of the label weight in 24 hours. Always follow the instruction of your veterinarian when using different medications on your pet.

**How to apply**

- Invert tube over dog and use open end to part dog's hair. Squeeze tube firmly to apply all of the solution to the dog's skin, as directed below. Do not apply more often than once every 30 days.

**How to open**

- Remove product tubes from the package. Separate one tube from the others. Hold the tube with notched end pointing up and away from the face and body. Use scissors to cut off the narrow end at the notches along the line.

**DATE:**

- First Application
- Second Application
- Third Application

**Additional Notes:**

- Do not remove tube from the pack until ready to use.
- Store in a cool (below 77°F/25°C) dry place inaccessible to children and pets. Do not refrigerate. Protect from direct sunlight.
- If empty: Recycling if available. Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
