**Eraze AG**

This product may only be used inside and within 100 feet of man-made structures and for all burrow baiting

**INTENDED FOR COMMERCIAL USE**

**KILLS RATS, MICE & MEADOW VOLES**

**Active Ingredient:**
- Zinc Phosphide (CAS #1314-84-7) . . . . . . . . . 2%

**Other Ingredients:** . . . . . . . . . . . . . . 98%

**Total**: 100%

**Net Weight:**
- 5 lbs (2.3 kg)

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See back panels for First Aid and additional precautionary statements.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat*
FIRST AID
Have the product container or label with you when calling a poison control center or doctor for treatment advice. You may also contact 1-877-894-3484 for emergency medical treatment information.

If you experience signs and symptoms such as nausea, abdominal pain, tightness in chest, or weakness, see a physician immediately. For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-929-9656.

If Inhaled
• Remove persons from area.
• Exposure is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

If Ingested
• Do not induce vomiting or give anything by mouth to an unconscious person.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor immediately for treatment advice.

TREATMENT FOR PET POISONING

NOT TO PHYSICIAN OR VETERINARIAN
Contains the phosphine-producing active, Zinc Phosphide. Probable mucous membrane damage may contaminate the use of gastric lavage. For animals ingesting bait and show poisoning signs, induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the stomach acidity. The stomach and intestines should be lavaged cautiously, with normal saline, and discontinue circulation temporarily in cases of severe poisoning.

USE RESTRICTIONS:
The World Leader In Rodent Control Technology

CONTAINER HANDLING:
Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved waste disposal facility, or incineration or, if allowed by state and local authorities, by burning. Enclosed, do not mix with other wastes. Call your Local Waste Agency for any questions on proper disposal.

WARNING:
This product contains phosphine gas. Phosphine gas can be harmful or deadly if it is allowed to escape into the environment by inappropriate handling or use. Always read and follow the directions for use and precautions in this label. Exposure to phosphine can cause death. If you inhale phosphine gas, seek medical attention immediately.

PHYSICAL-CHEMICAL HAZARDS

See side panels for First Aid and additional precautionary statements.

ENVIRONMENTAL HAZARDS

See side panels for First Aid and additional precautionary statements.

KEEP OUT OF REACH OF CHILDREN

CAUTION

This product is extremely toxic to birds, fish and other wildlife. Dogs, cats and other animals may be poisoned if they eat scrap material that has eaten this bait. Do not contaminate water while disposing of equipment wash water or rinse.

STORAGE AND DISPOSAL

Do not use with or store near any oxidizing agents.

DO NOT USE IN RESIDENTIAL AREAS.

DISCLAIMER:
The extent permitted by applicable law, the seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. The extent permitted by applicable law, the buyer assumes all risks of use and handling of this material when such use and handling is contrary to label instructions.

APPLICATION DIRECTIONS:

SELECTION OF TREATMENT AREAS:
After removing as many sources of food and water as possible, determine dry, acid-free areas where rats, mice or meadow voles will most likely find and consume the bait. Generally these areas are along walls, by gravelled porches, in or around basements, in corners and concealed places, between floors and walls, or in locations where signs of rats, mice, or meadow voles have been observed.

APPLICATION DIRECTIONS FOR RATS:
Apply 1 to 2 teaspoons of bait per location. For outdoor use, place bait in active rat burrows or tapen-resistant bait stations. Maintain an uninterrupted supply of fresh bait until all signs of feeding on bait have stopped. Do not treat the same area less than 30 days later. Circulate and dispose of all dead animals.

APPLICATION DIRECTIONS FOR MICE AND MEADOW VOLES:
Apply 1 to 5 teaspoons of bait per placement in intervals of 1 to 2 days. For outdoor use, place bait in tapen-resistant bait stations. Maintain an uninterrupted supply of fresh bait until all signs of feeding on bait have stopped. Do not treat the same area less than 30 days later. Circulate and dispose of all dead animals.

FOLLOW-UP:
Wearing waterproof gloves, collect and dispose of dead, exposed animals. Dispose of leftover bait in accordance with disposal instructions. Use detergent and hot water to wash equipment used for application into burns. Do not use upon mixing, holding or transferring food or feed. To discourage reinfection, limit sources of rodent food, water, and harborage as much as possible.

PRECAUTIONARY STATEMENTS

Harmful if swallowed or inhaled, causes moderate eye irritation, avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and do not contaminate water, food, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

DO NOT USE WITH OR STORE NEAR ANY OXIDIZING AGENTS.

EXPIRED PRODUCT:
This product may be applied to active rodent burrows to control rats within or beyond 100 feet of buildings and man-made structures, provided that infestations of these rodents have been confirmed. Bait must be placed to less than 6 inches into active rat burrows. Do not broadcast bait. Because rat infestations may occur in areas farther than 100 feet from buildings and man-made structures when the rodents have ample supplies of food and cover, efforts should be made to remove food, trash, garbage, clutter and debris.

DO NOT PLACE BAIT NEAR OR INVENTION DRASTIC OPENINGS. Do not contaminate water, food, foodstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

DO NOT USE WITH OR STORE NEAR ANY OXIDIZING AGENTS.

APPLICATION DIRECTIONS:
The World Leader In Rodent Control Technology

USER SAFETY REQUIREMENTS

Regularly check baits for signs of rats, mice or meadow voles. Reinfestation, limit sources of rodent food, water, and harborage as much as possible.

PRECAUTIONARY STATEMENTS

Hazardous to humans and domestic animals. Harmful if swallowed or inhaled, causes moderate eye irritation, avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and do not contaminate water, food, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
