MAYOSPERSE 7700-15

ACTIVE INGREDIENT:
Poly (oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylene dichloride) 15.0%
INERT INGREDIENTS: 85.0%
TOTAL: 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION:

FIRST AID

If in Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses. If present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

If on Skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

If Swallowed:
- Call poison control center or doctor immediately for further treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

IN CASE OF EMERGENCY ENDANGERING LIFE OR PROPERTY, CALL: 800-424-9300

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if Swallowed, absorbed through the skin, or inhaled. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating, drinking, and chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds or estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

Manufactured by:
Compass Chemical International, LLC
5544 Oakdale Road
Smyrna, GA 30082
404-696-6711
EPA Establishment No. 008576-GA-001

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE: Do not stack more than four (4) drums high. Leaking or damaged drums should be placed in over-pack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill. Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose in a sanitary landfill, incineration, or, if allowed, by state and local authorities. Burning. If burned, stay out of smoke.

SWMING POOLS, HEATED SWIMMING POOLS, EXTERIOR WHIRLPOOLS, AND HOT BATHS
For maximum effectiveness of Mayosphere 7700 in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using Mayosphere 7700. For pools having just visible algae growth, add an initial dose of 44-68 fluid ounces of Mayosphere 7700 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshy cleaned and filled pool, add initially 24-44 fluid ounces of Mayosphere 7700 per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 8-16 fluid ounces of Mayosphere 7700 per 10,000 gallons of water must be made every 5-7 days after the initial treatment.

Uniform distribution of Mayosphere 7700 throughout the water in the pool is necessary for maximum effectiveness. Mayosphere 7700 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Mayosphere 7700 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Mayosphere 7700 with concentrated dry or liquid chlorine products.

DECORATIVE FOUNTAINS
Mayosphere 7700 is used to control the growth of algae in decorative fountains. Systems containing heavy growths of algae must be manually cleaned prior to treatment. Fountains with just visible algae growth require an initial dose of 4-8 fluid ounces of Mayosphere 7700 per 1000 gallons of water in the system. To treat a freshly cleaned and filled fountain, add 2-6 fluid ounces of Mayosphere 7700 per 1000 gallons of water. Maintenance dosages of 0.8-2.0 fluid ounces of Mayosphere 7700 per 1000 gallons of water must be added every 5-7 days as needed. Additions of Mayosphere 7700 should be made at a point to ensure uniform distribution throughout the system. Mayosphere 7700 may be used in fountains treated with chlorine chemicals, but do not mix Mayosphere 7700 with concentrated dry or liquid chlorine products.

PAPER MANUFACTURE
Mayosphere 7700 will retard microbial growth that causes degradation of cooked starch used in paper manufacture. Mayosphere 7700 is added at a rate of 100-1500 ppm based on the total weight of the starch and water. The treatment rate necessary to retard spoilage of the starch will vary with the extent of contamination of the make-up water and the length of storage.

NOTE: Do not use in paper and paperboard that will contact food.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Mayosphere 7700 is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot baths, and decorative fountains. It is used to control algae, bacteria, and fungi in recirculating commercial and industrial cooling water towers.

RECYCLING COOLING WATER TOWERS
Prior to using Mayosphere 7700 in recirculating cooling water towers, systems shall be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 3.5-8.8 fluid ounces of Mayosphere 7700 per 1000 gallons of water to provide 6-20 ppm Mayosphere 7700, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.8-8.8 fluid ounces of Mayosphere 7700 per 1000 gallons of water (2-20 ppm) every 2-5 days or as needed. The frequency of addition depends upon the relative amount of bleed-off and the severity of the microbiological problem. Slug additions shall be made in the cooling water tower sump.
