DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product uses Micron technology to provide excellent long-lasting antifouling protection against all types of fouling. These products are designed to be applied to hulls of all types at a rate equivalent to 12 oz of antifouling paint per square foot. In addition, this technology allows for the boat to be hauled out and relaunched the following summer without restripping. This product is blue in color. It will provide excellent antifouling protection against all types of algae, weeds, barnacles, and other shell fouling. This product can be used below the waterline in fresh or salt water on fiberglass, wood and properly primed metal boat hull and parts. Do not use on aluminum.

COMPATIBILITY: This product can be applied over most antifouling paints as long as the old coating is thoroughly removed. In some cases, it has been found that some antifouling paints will not need to be removed or overcoated with Interlux. Before applying, make sure the hull is thoroughly cleaned and all old coatings are removed. Thinner: Not necessary. Do not exceed 5% by volume. Thinner: Brush Thinner - Ethylene Glycol. Spray Thinners: Special Thinner 216

THEORETICAL COVERAGE: 45 gal. per gallon, based on 2.27 m of water film thickness. DRY TIMES: Touch - 12 hours minimum

APPLICATION TEMPERATURES: 70°F (21°C) or higher. If the hull is cooler, wait until the temperatures rise to 70°F (21°C) or higher.

APPLICATION SYSTEMS

GENERAL APPLICATION PROCEDURES: Shake or mix well prior to use. Apply at least 2 coats (3 coats on bare wood) of this product by brush or spray resistant 3/8" nap roller. Do not apply thin coats. Keep in mind that the label of the paint is directly related to the amount of paint applied. If application brush pulls or roller drags, use Interlux Brush Thinner - Ethylene Glycol to improve handling. Certain areas of hull experience faster growing than other areas. These areas include the waterline, the leading edge of the bow and rudder, and the bow. Do not apply additional coats of paint to be applied to insure that this product does not wear away before the other areas of the bottom.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface with 80-grit wet or dry sandpaper. Surface clean with Interlux Special Thinner 216. Apply at least 2 coats of this product, allowing proper dry times. PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux Interester® 290E for fiberglass, and wood by sandblasting the steel surfaces to a new white metal. Proceed with application of the bare wood as described above.

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to completely remove the mold release wax in order to prevent contamination of the antifouling paint. Begin by scraping the surface thoroughly with a stiff brush using Interlux All-Purpose Boat Soap to remove loose dirt and contamination. Rinse with fresh water to remove the soap residue and allow to dry. Remove mold release with one of the following Interlux Fiberglass Surface Prep or Interlux Fiberglass Solvent Wash, following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water beeps up or separates, clean again. When the water sheets off, all contamination has been removed. After the surface has been properly cleaned, proceed with one of the application systems below.

BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Apply one coat of Interlux Interester® 290E or Interlux No Sand Primer YPA-200, following the label instructions for applying the primer, and overcoating with antifouling paint. Apply two coats of this product, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure described above. Apply any surface imperfections using Waterbase Epoxy Filler, sand and wipe clean. Sand the entire surface with 80-grit sandpaper until a flat, matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solvent Wash 202E. Apply at least 2 coats of this product, allowing for the appropriate dry times.

BARE WOOD: Sand entire surface thoroughly with 80-grit production sandpaper; wipe surface clean with Interlux Brush Thinner - Ethylene Glycol. Repair imperfections with Waterbase Epoxy Filler; sand and wipe clean. Apply first coat of this product reduced with Interlux Brush Thinner - Ethylene Glycol (15% maximum). Fill seams with Interlux Seam Compound 30 between first and second coats of this product. UNDERWATER METALS: Contact the Interlux Technical Service Department at 1-800-468-7689 for full details on how to properly prime underwater metal. Do not use on aluminum.

NOTE: This product may change color at the waterline.

Color difference may occur between actual paint and color chart on front of can.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING

Causes eye irritation, Harmful if absorbed through skin, Avoid contact with eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sand blasting boat surfaces, wear a mask or respirator approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID
If swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes
- Call a poison control center or doctor for treatment advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

OTHER: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

ENVIROMENTAL HAZARDS
This material is toxic to fish. Do not apply to water by cleaning of equipment or disposal of waste. Do not allow chips and dust generated during paint removal to enter soil, water, storm drains or sewers. Do not discharge effluent containing this product into lakes, streams, ponds, reservoirs, oceans or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For disposal, contact your local Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD
Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL
Do not store in water, food or feed contact areas. Ventilate with storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are a hazardous waste. Improper disposal of excess pesticide, spray mixtures or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to labeled instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative nearest your local EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows:

Dump out remaining contents into application equipment or, if equipment is to be saved, dispose of contents. Do not use equipment for any other purpose than application of this product. Do not pour into any drain. Do not dispose of in soil or on land.

For CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: Citemix 1-800-468-7689 (GAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POLLUTION CONTROL CENTER OR CALL 1-800-566-0651.
