ENVIRONMENTAL HAZARDS
This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.
If material is spilled: Contain and sweep up material of spill for disposal or use per label instructions. Wash cleanup equipment to prevent contamination elsewhere. Excess quantities above normal application rates could result in damage to plants subject to spill. Water in remainder, discard, under layer of soil, or leave exposed to sunlight, as deemed appropriate to the situation.
STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag application equipment by shaking and tapping sides and bottom to loosen clinging particles. Offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration. Do not burn, unless allowed by state and local ordinances.
DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in:
- established turf grasses (excluding golf course putting greens) and lawns
- landscape ornamentals (including established perennial wildflower plantings)
- covers up to 16,390 square feet
KEEP OUT OF REACH OF CHILDREN
CAUTION
See the following section, Precautionary Statements, Hazards To Humans and Domestic Animals, for additional information.
EPA Reg. No. 34704-776
EPA EST. NO. 82757
EPA EST. NO. 8565.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Causes moderate eye irritation (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

FIRST AID
If in eyes:
- Hold eye open and rinse slowly and gently with water for 15–20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on skin or clothing:
- Wash off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:
- More to frequent breathing if you are breathing Zak 911.
- Call a poison control center or doctor for further treatment advice.

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-866-944-8565. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Environmental application rates could result in damage to plants subject to spill. Water in remainder, discard, under layer of soil, or leave exposed to sunlight, as deemed appropriate to the situation.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.
Pesticide DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag application equipment by shaking and tapping sides and bottom to loosen clinging particles. Offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration. Do not burn, unless allowed by state and local ordinances.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in:
- established turf grasses (excluding golf course putting greens) and lawns
- landscape ornamentals
- established perennial wildflower plantings

This product controls susceptible weeds by inhibiting weed seeds germination and root development. Most effective weed control will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation, or with shallow (1 to 2 inches) incorporation, prior to weed seed germination and within 14 days following application. Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climate modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds. Do not graze or feed livestock forage cut from areas treated with this product.
Do not apply this product through any type of irrigation system.
Do not apply aerially.
Do not apply to golf course putting greens.

APPLICATION DIRECTIONS
Apply uniformly with suitable, calibrated application equipment.

ESTABLISHED TURF
This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation prior to weed seed germination and within 14 days following application.

For Selective Preemergence Control of grass and broadleaf weeds in:
- Established turf grasses (excluding golf course putting greens) and lawns
- Landscape ornamentals (including established perennial wildflower plantings)
- Covers up to 16,390 square feet

KEEP OUT OF REACH OF CHILDREN
CAUTION
See the following section, Precautionary Statements, Hazards To Humans and Domestic Animals, for additional information.
EPA Reg. No. 34704-776
EPA EST. NO. 82757
EPA EST. NO. 8565.

ESTABLISHED TURF
This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation prior to weed seed germination and within 14 days following application.

For Selective Preemergence Control of grass and broadleaf weeds in:
- Established turf grasses (excluding golf course putting greens) and lawns
- Landscape ornamentals (including established perennial wildflower plantings)
- Covers up to 16,390 square feet
By this product is related to the rate applied. Maximum use rate selection should be based on turf species. The length of time of residual weed control provided varies with the weed species controlled and weed control established weeds.

Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. Do not apply more than 400 lbs of this product per calendar year.

Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf type. All applications must be made prior to germination of the weed seeds.

Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf type. All applications must be made prior to germination of the weed seeds.

Maximum Annual Rates

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following table:

<table>
<thead>
<tr>
<th>Product</th>
<th>Maximum Rate (lbs/A)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Crabgrass Preventer with EVADE .375% Plus Rate (lb/A)</td>
<td>Months Before Overseeding</td>
</tr>

<td>0.50</td>
</tr>
</tbody>
</table>

In many areas a single application of 175 to 400 lbs of this product will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control may be achieved by making an initial application of 175 to 267 lbs after 60 to 90 days by a second application at doses that would not exceed those given in the Maximum Annual Rate Table. Do not exceed the maximum rate for turf grass species listed in the Maximum Annual Rate Table above.

Applications for this weed should be made in late summer, fall or winter prior to germination. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf type. All applications must be made prior to germination of the weed seeds.

When to apply after overseeding turf

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

When to Overseed After Application

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding results.
