STORAGE AND DISPOSAL:
Store this product in a cool, dry area, away from direct sunlight and heat.

Refillable container. Refill empty Clorox Healthcare® Bleach Germicidal Cleaner spray container only from Clorox Healthcare® Bleach Germicidal Cleaner refill bottle. Cleaning before refilling is the responsibility of the refiller. Take care to update expiration date on refillable bottle and replace bottle if it becomes warm or damaged. Do not reuse this container for any other purpose. Rinse container with water prior to disposal. Cleaning the container before final disposal is the responsibility of the person disposing of the container. When discarding container, place in trash collection or take to recycling center. Do not contaminate water, food or feed by storage and disposal.

Spray 6”–8” from surface until surface is completely wet. Let stand for 5 minutes. Wipe with a clean, damp cloth or paper towel and allow to air dry. Change solution for each use.

Disposal of Infectious Materials:

Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with mucous membranes, or (2) is capable of transmitting airborne microorganisms, including but not limited to: Mycobacterium tuberculosis, hepatitis B (HBV), and hepatitis C (HCV); human immunodeficiency virus type 1 (HIV-1) (associated with AIDS), Clostridium difficile, Staphylococcus aureus, Pseudomonas aeruginosa, Escherichia coli, Enterococcus, multi-drug resistant Staphylococcus aureus (MRSA), methicillin-resistant Staphylococcus aureus (MRSA), vancomycin-resistant Enterococci (VRE), Methicillin-resistant Staphylococcus aureus (VRSA), Methicillin-resistant Enterococci (VRE); and New Delhi Metallo-Beta Lactamase-1 (NDM-1), ESBL (Extended Spectrum Beta Lactamase) producing bacteria, and Carbapenem resistant Pseudomonas aeruginosa.

Cleaning before refilling is the responsibility of the refiller. Take care to update expiration date on refillable bottle and replace bottle if it becomes damaged or exposed to temperature extremes.

When handling items soiled with blood or body fluids, use disposable gloves, gowns, masks, and eye coverings.

Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious waste disposal.

Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with a clean cloth, mop, and/or sponge followed by a damp cloth or paper towel or allow to air dry. In cases where the surface/area is not accessible to cleaning or is contaminated with non-hazardous blood and other body fluids, use of a disinfectant for non-porous surfaces is recommended. Non-porous surfaces:

- stainless steel, glazed ceramic tile, hard plastics, non-porous vinyl, laminated plastic countertops, fiberglass (sealed) surfaces, glazed porcelain, and glass.
- dental clinics, labs.
- exam rooms, hospitals, intensive care units, nurses’ stations, patient rooms, physician offices, and surgery rooms.
- where cleaning and proper disinfection are not possible.

Aerosolized chemicals can be used to disinfect hard, non-porous surfaces.

Disinfection Procedure:

Spray 6”–8” from surface until surface is completely wet. To disinfect, let stand for one minute. Wipe with a clean, damp cloth or paper towel or allow to air dry. For food contact surfaces, rinse with potable water. For all other surfaces no rinsing is required.

†

For all other organisms, see directions for contact times.

The product is effective against the following organisms:

- Bacteria: 1 minute contact time
- Fungi: 1 minute contact time
- Viruses: 1 minute contact time

For all organisms, disinfection should be performed for one minute on hard, non-porous surfaces. For food contact surfaces, rinse with potable water.

FIRST AID: If in Eyes:

Hold eye open and rinse slowly and gently with water for 15–20 minutes. If present, remove contact lenses after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor.

STORAGE AND DISPOSAL:

Keep out of reach of children. Store in a cool, dry area. Do not freeze. Do not contaminate water, food, or feed by storage and disposal. This product is not intended for use on fabrics after application. Take care to maintain the product container. Store bottle in its original carton to protect from light exposure.
**DIRECTIONS FOR USE:**  This is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Always refer to manufacturer’s care instructions before using an equipment or device.

To Clean, Disinfect, and Sterilize in One Step: Spray 6”–8” from surface until surface is completely wet. Let stand for one minute. Wipe with a clean, damp cloth or paper towel or allow to air dry. For high touch surfaces, rinse with potable water. For all other surfaces no rinsing is required. Surfaces must be removed prior to disinfecting. To Clean: Follow directions above or apply with a clean cloth, mop, or sponge saturated with Clorox Healthcare® Bleach Germicidal Cleaner. After applying with a saturated cloth or sponge, gloves should be worn. No standing time is required. If streaking is observed, wipe with a clean, damp cloth or paper towel. Special Instructions for Cleaning Prior to Disinfection according to Clotroidian dilution area.

**Personal Protection:** Wear appropriate barrier protection such as goggles, gloves, masks, and eye covering. **Cleaning Procedure:** When handling soiled with blood/body fluids, use disposable gloves, gowns, masks, and eye covering. **Cleaning Procedure:** To prepare for use, fill an appropriate size container with a sufficient amount of Clorox Healthcare® Bleach Germicidal Cleaner into instruments to thoroughly wet all surfaces. Let stand for up to 10 minutes. Rinse all instruments in a separate solution, when applicable. Follow an appropriate disinfection protocol. Cleaning of critical and semi-critical devices must be followed by an appropriate terminal sterilization/level disinfection process.

**Disinfect Non-Critical, Non-Instrumented Items:** Instruments must be thoroughly pre-doused to prevent excess of organic debris, rinse, and thoroughly dried. Clean and rinse lumen of hollow instruments before filling with Clorox Healthcare® Bleach Germicidal Cleaner. Contact Time: As required by local regulations for infectious materials disposal. Disinfection Procedure: Spray 6”–8” from surface until surface is completely wet. Let stand for 5 minutes with a clean, damp cloth or paper towel or allow to air dry. To Prevent Instruments Prior to Terminal Sterilization/High Level Disinfection: As a pre-cleaning spray – Place instruments into a saturated container. Spray Clorox Healthcare® Bleach Germicidal Cleaner until surface is completely wet. Let stand for up to 10 minutes. Remove and rinse, and allow to dry. Change solution daily. Follow an appropriate disinfection protocol. Cleaning of critical and semi-critical devices must be followed by an appropriate terminal sterilization processes. 

**STORAGE AND DISPOSAL:** Store this product in a cool, dry area, away from direct sunlight and heat. Refillable container. Before disposal, repackage the product for use on other surfaces.

**QUESTIONS OR COMMENTS?** Call 1-800-243-0000.

**CAUTION:** Contains chlorine. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. **PRECAUTIONARY STATEMENTS:** HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. **FIRST AID:** In Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. If present, remove contact lenses. If contact persists for more than the first 5 minutes, then continue rinsing eye. Call a poison control center for further treatment advice. Have the product container or label with you when calling a poison control center or doctor. For emergency treatment advice. PHYSICAL OR CHEMICAL HAZARDS: Do not use this product with lye or acids such as vinegar, rust removers, or toilet bowl cleaners. The product not intended for use on static mixers. **STORAGE AND DISPOSAL:** Store this product in a cool, dry area, away from direct sunlight and heat. Refillable container. Before disposal, repackage the product for use on other surfaces.

**MULTI-DRUG RESISTANT (MRSA)**

*For any use site that includes electronic refer to manufacturers’ instructions before use.

**EFFICACY TESTS have demonstrated that this product is an effective biocidal, virucidal, fungicidal in the presence of organic soil (5% blood serum).**
Artwork shown at approximately 110%. PDF prints at approximately 100% from acrobat reader or when "Fit to printable area" settings are selected.
To Clean, Disinfect, and Destroys Germs in One Step: Spray 6'-8' from surface until surface is completely wet. To disinfect, let stand for one minute. Wipe with a clean, damp cloth or paper towel or allow to air dry. For hard contact surfaces, rinse with portable water. For all other surfaces no rinsing is required. Grass soil must be removed prior to disinfecting. To Clean: Follow directions above or apply with a clean cloth, mop, or sponge saturated with Clorox Healthcare® Bleach Germicidal Cleaner until surface is completely wet. (When applying with a saturated cloth or sponge, gloves should be worn.) No standing time is required. If streaking is observed, wipe with a clean, damp cloth or paper towel.

Disinfecting Procedure: Spray 6'-8' from surface until surface is completely wet. Let stand for 5 minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry.

To Pre-clean Instruments Prior to Terminal Sterilization/High Level Disinfection: As a pre-cleaning spray. Place instruments into a suitable container. Spray Clorox Healthcare® Bleach Germicidal Cleaner onto instruments to thoroughly wet all surfaces. Let stand for one minute. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

To Disinfect Non-Critical, Pre-Cleaned Instruments: Make in the cleaning process that may contain fecal matter are to be disposed of immediately in accordance with local regulations for infectious material disposal. Disinfection Procedure: Spray 6'-8' from surface until surface is completely wet. Let stand for five minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry. To Pre-clean Instruments Prior to Terminal Sterilization/High Level Disinfection: As a pre-cleaning spray. Place instruments into a suitable container. Spray Clorox Healthcare® Bleach Germicidal Cleaner onto instruments to thoroughly wet all surfaces. Let stand for up to 15 minutes. Rinse instruments.

Cleaning Procedure: Place instruments in container of Clorox Healthcare® Bleach Germicidal Cleaner. Place instruments into the container of Clorox Healthcare® Bleach Germicidal Cleaner, cover, and allow to soak for up to 15 minutes. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

Disinfection Procedure: Spray 6'-8' from surface until surface is completely wet. Let stand for five minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry.

To Disinfect Non-Critical, Pre-Cleaned Instruments: Place instruments into a suitable container. Spray Clorox Healthcare® Bleach Germicidal Cleaner onto instruments to thoroughly wet all surfaces. Let stand for one minute. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

Cleaning Procedure: Place instruments in container of Clorox Healthcare® Bleach Germicidal Cleaner. Place instruments into the container of Clorox Healthcare® Bleach Germicidal Cleaner, cover, and allow to soak for up to 15 minutes. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

Disinfection Procedure: Spray 6'-8' from surface until surface is completely wet. Let stand for five minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry.

To Disinfect Non-Critical, Pre-Cleaned Instruments: Place instruments into a suitable container. Spray Clorox Healthcare® Bleach Germicidal Cleaner onto instruments to thoroughly wet all surfaces. Let stand for one minute. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

Cleaning Procedure: Place instruments in container of Clorox Healthcare® Bleach Germicidal Cleaner. Place instruments into the container of Clorox Healthcare® Bleach Germicidal Cleaner, cover, and allow to soak for up to 15 minutes. Remove and rinse, and follow with an appropriate cleaning and disinfecting process.

Disinfection Procedure: Spray 6'-8' from surface until surface is completely wet. Let stand for five minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry.
Rinse instruments. Spray 6”–8” from surface until surface is completely wet. Let stand for 1 minute. For all other organisms, see directions for contact times.

Special Instructions for Cleaning Prior to Disinfection against visible, gross debris. Immerse pre-rinsed instruments into an appropriate size container filled with Clorox Healthcare® Bleach Germicidal Cleaner. Scrub instruments using a stiff bristle brush until visibly clean. Submerge instruments while scrubbing. Rinse instruments thoroughly. Change solution daily. Follow with an appropriate disinfection process.

To Preclean Instruments Prior to Terminal Sterilization/High Level Disinfection: As a pre-cleaning method:

- Thoroughly pre-rinse dirty instruments under running water to remove soiled debris.
- Submerge instruments. Place instruments into the container of Clorox Healthcare® Bleach Germicidal Cleaner, cover, and allow to soak for up to 10 minutes. Remove and rinse, and follow with an appropriate disinfection process.

To Clean:

- For non-critical instruments.
- For non-critical instruments.
- For non-critical instruments.

**ORGANISMS**

**Bacteria**: 1 minute contact time
- Acinetobacter baumannii
- Bordetella pertussis
- Campylobacter jejuni
- Carbapenem resistant Klebsiella pneumoniae (CRKP)
- Enterobacter aerogenes
- Enterobacter cloacae – New Delhi Metallo-Beta Lactamase-1 (NDM-1)
- Klebsiella pneumoniae
- Klebsiella pneumoniae – New Delhi Metallo-Beta Lactamase-1 (NDM-1)
- Enterococci
- Methicillin resistant Staphylococcus aureus (MRSA)
- Multi-drug resistant Enterococcus faecium
- Proteus mirabilis
- Pseudomonas aeruginosa
- Salmonella enterica
- Serratia marcescens
- Staphylococcus aureus
- Vancomycin resistant Staphylococcus aureus (VRSA)
- Vancomycin resistant Enterococcus faecium (VREF)

**Viruses**: 1 minute contact time
- Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS)
- Hepatitis B Virus (HBV)
- Hepatitis C Virus (HCV)
- Hepatitis E Virus
- Hepepavirus Type 2 (HSV-2)
- Feline Panleukopenia Virus
- Feline Coronavirus
- HIV-1 (AIDS Virus)
- Influenza A H1N1
- Influenza A Virus
- Influenza B Virus
- Norovirus
- Poliovirus Type 1 (Mahoney Strain)
- Poliovirus Type 3
- Rotavirus
- SARS-CoV-2

**Fungi**: 1 minute contact time
- Athlete’s Foot Fungus
- Candida albicans
- Trichophyton mentagrophytes

**Kills Clostridium difficile** spores in 5 MINUTES

Follow special instructions for cleaning prior to disinfection.

**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

**FIRST AID**: If in Eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice. Call a poison control center or doctor for further treatment advice. Call a poison control center or doctor for further treatment advice. Call a poison control center or doctor for further treatment advice. Call a poison control center or doctor for further treatment advice.

**PHYSICAL OR CHEMICAL HAZARDS**: Clorox Healthcare® Bleach Germicidal Cleaner is an effective bactericide, virucide and fungicide in the presence of organic soil (5% blood serum).
Kills C. difficile spores

Bleach Germicidal Cleaner

- Kills 99.99% Bacteria, Viruses, & Fungi in 1 Minute on Hard, Non-Porous Surfaces
- Ready-to-Use 1:10 Dilution of Bleach and Detergent

KEEPS OUT OF REACH OF CHILDREN

CAUTION: READ COMPLETE DIRECTIONS AND PRECAUTIONS ON REAR PANELS.
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

ACTIVE INGREDIENT:
Sodium Hypochlorite..................0.65%
OTHER INGREDIENTS:..................99.35%
TOTAL:..................................100.00%
Contains no phosphorus.

1 GALLON (128 FL OZ) 3.78 L
**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Always refer to manufacturer’s care instructions before using on equipment or devices.

1. **Healthcare® Bleach Germicidal Cleaner**
   - **Use Sites:** Medical – ambulances, central service, critical care units, dialysis clinics, emergency rooms, exam rooms, home health care, hospitals, intensive care units, laboratories, neonatal nurseries, patient rooms, nursing homes, operating rooms, orthopedic clinics, patient rooms, physical therapy rooms, physicians’ offices, radiology, recovery rooms, respite care units, surgery rooms, patient care areas, and emergency rooms.
   - **Infectious Materials:** Miscellaneous – correctional facilities, day care centers, funeral homes, health club facilities, recreational centers, restrooms, and schools.

   **For any use site that includes electronics refer to manufacturer’s instructions before use.**

   **Hand surfaces:** Surfaces of ultrasound transducers and probes, behind and under wash basins, and wheelchairs. **Dental hard, non-porous surfaces:** chairs, counters, operating hard surfaces, and light knee covers. **Miscellaneous hard, non-porous surfaces:** all surfaces of inanimate objects or with blood/body fluids, and in which the surfaces/objects are likely to be soiled with blood/body fluids.

2. **Kills:** *Clostridium difficile* spores in 5 MINUTES

   **Follow special instructions for cleaning prior to disinfection.**

   **CAUTION:** Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. **FIRST AID:** In 1 Eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. If present, remove contact lenses after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, referring to emergency or hospital personnel. **Physical or Chemical Hazards:**

   - **Store this product in a cool, dry area, away from direct sunlight and heat. Nonrefillable container. Do not reuse or refill this container. When discarding container, place in trash collection or other recycling collection. Do not contaminate water, food, or feed by storage and disposal.**

   **STORAGE AND DISPOSAL:** Store this product in a cool, dry area, away from direct sunlight and heat. Nonrefillable container. Do not reuse or refill this container. When discarding container, place in trash collection or other recycling collection. Do not contaminate water, food, or feed by storage and disposal.
